**NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM**

**NATIONAL
REGISTER**

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in "Guidelines for Completing National Register Forms" (National Register Bulletin 16). Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable". For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.

foundation concrete
walls wood/weatherboard

roof wood/shingle
other vertical board & batten,
stone, metal

Describe present and historic physical appearance.

Stevens Pass Guard Station #1044: 1936; 20' x 40'; rectangular, 1-1/2 story wood frame, poured concrete foundation, large coursed squared-rubble veneer, high gable roof with steep shed-roofed dormers extending across north and south slopes of roof, shed-roof bay abuts west elevation at northwest corner, center gable porch projects from plane of north (main) facade, single coursed squared-rubble chimney, metal cap, off-set on ridgeline. Horizontal clapboard exterior, vertical boards on east and west gable ends. Six-over-six double-hung sash windows, singly and in combinations of two and three with mullions, each flanked by vertical board decorative shutters. Main entry is in center of north facade, covered by gable porch, enclosed; porch pediment is closed by diagonal boards in chevron pattern, supported by massive squared-timber posts. Rear entry is slightly off-set on south facade. No decoration. Wood shingle roof material has been covered or replaced with a textured metal sheet roofing. The garage has been enclosed; however, the vertical placement of the enclosing wall materials evokes the appearance of the original board doors. The alteration does not greatly detract from the appearance or character of the building. The free-standing snow tunnel now abutting the main entry, though visually intrusive, obscures neither the guard station's historic identity nor function.

A woodshed, capable of holding ten cords, stands to the south of the station. Constructed in the 1980's, it has a shed roof and shingle sides. The boundary of the station excludes this shed, hence it is not counted as a non-contributing building.

State significance of property, and justify criteria, criteria considerations, and areas and periods of significance noted above.

The Stevens Pass Guard Station typifies the construction projects undertaken by the Civilian Conservation Corps and signifies the aid to the local community provided by the emergency work-relief program through employment of youth and experienced craftsmen, purchases of building materials and camp supplies, and personal expenditures of enrollees. The property represents the Forest Service's presence in the locality, as the headquarters for field operation, and denotes, via the physical facilities required to carry out the agency's expanding responsibilities, the critical transition in the Service's development from custodial superintendence to extensive resource management. The Stevens Pass Guard Station exemplifies the rustic architectural idiom developed by the Forest Service, Pacific Northwest Region, to impart Forest Service identity and to represent its purposes and ideals, and signifies the agency's particular interpretation of a singular expression of early twentieth century American architectural thought. Possessing high qualities of design and execution, the Guard Station is a very good example of an architectural locution invested with special aesthetic and associative values by the agency that created it.

Verbal Boundary Description

X See continuation sheet

Boundary Justification The boundaries are drawn to include the building and space that describe the Forest Service administrative use of the site. The area encompassed is limited to the portion of the tract designated for administrative withdrawal and containing the actual improvements and such spaces as may define the site function; it excludes a non-contributing woodshed and ski area improvements.
