South Hampton Town Center District

The Town Center District extends southeast along Main Avenue to the Massachusetts state line, westward along Hilldale Avenue to include the Isiah Palmer House (Site 156), and north along Main Avenue to the Nettle Hiller House (Site 217).

The area includes the municipal core of South Hampton as represented by a stylistically cohesive, Greek Revival style complex of public structures oriented towards an open town green, Barnard Square. These public structures are the Town Hall (Site 164), the Barnard School (Site 165) and the Baptist Church (Site 116). The town center core also includes two cemeteries which contribute to the historic character of the area through reinforcing the boundaries of the municipal core and providing additional public space.

Surrounding the town center proper are residential structures dating from the eighteenth and nineteenth centuries, as well as important scenic vistas affording views of open fields and wooded land. Structures range in scale from 1 to 2½ stories and are of wood frame construction. The stylistic distribution of the Town Center District residential development includes eight Georgian, four Federal, three Greek Revival, four Vernacular and two Colonial Revival style dwellings, the majority of which retain their original open, agricultural sites.

The architectural character of residential development surrounding the town center proper, is in large a result of the 1912 "Hilltop Fire," which destroyed many of the early residential structures adjacent to the town green. Sympathetic residential construction dating from the early and mid-twentieth centuries has subsequently occurred in the areas affected by the fire. Later construction maintains historical low-scale and density. The existing ratio of early structures (50 years or older) to modern buildings is 3 to 1.

Town Center District

The Town Center District presents an intact microcosm of South Hampton history centered on Barnard Square. A group of late eighteenth and early nineteenth century houses constitute the architectural evidence for the original farming community, while the Greek Revival grouping of Baptist Church, Barnard School, and Town Hall reflects the prosperity and modernity of the town in the first half of the nineteenth century. In addition, views of the agricultural landscape remain essentially unchanged. The Town Center retains architectural and site integrity relating to the most significant periods of South Hampton history and should be preserved as a superb built and natural record thereof.

The Town Center District includes the physical and symbolic center of South Hampton. This center is represented by three cohesive Greek Revival style public buildings: the Baptist Church (Site 116), the Barnard School (Site 165), and the Town Hall (Site 164). Constructed in the 1830's, during the town's period of peak prosperity, these structures reflect the major intellectual and social concerns of the period. The nineteenth century character of the town center is reinforced through intact, open vistas visible from all directions. These vistas, preserving original agricultural land divisions, tangibly document the town's historical agricultural economy which made possible the construction of its municipal core.

Associated farm dwellings, dating primarily from the Georgian and Federal periods, surround the town center and relate in scale, orientation and materials to the center proper.

Representative of these early dwellings is the Israel Sawyer House (Site 224, c. 1765) an unusual "double" 2½ story double house begun as a traditional five-bay, double pile Georgian farmhouse. The original exterior design was duplicated to the west of the principal block in the nineteenth century. This mirror addition possibly dates to the Greek Revival period as suggested by interior detailing.

NAME: Town Center District

VERBAL BOUNDARY DESCRIPTION: The Town Center District boundary commences at the southeast property line of Site 59 (2-60) adjoining the Massachusetts state line and continues southwest across Main Street to include the southeast property line of Site 60 (2-61). Proceeding to the southwest corner of Site 60 (2-61) the district boundary proceeds northeast along the western boundary of Site 60 (2-61) to the intersection with the centerline of Main Avenue and continues northwest along Main Avenue to a point perpendicular to the southeast property line of Site 73 (2-67A). Turning southwest, the boundary traces the property line of Site 73 (2-67A) and turns south to the point of intersection with the east property line of Site 74 (2-68) and proceeds south to the north bank of the Pow Wow River. Tracing the north bank of the river, the boundary proceeds west to the point perpendicular to the west property line of Site 77 (2-70) and traces the irregular property line north, northeast, east and then west co-terminus with the east side of Jewell Street continuing north then east then north again to the southwest corner of Site 115 (2-72), tracing the property line of Site 115 east, then northeast then west across Jewell Street to the western side, then due south to a point co-terminus with the southeast corner of Site 116 (2-20). The boundary then turns west and follows the southern property line of Sites 116 and 165 (2-21). At the southwestern corner of Site 165 (2-21) the boundary turns south along the property line of Site 163 (2-23) and turns east to trace the east and south irregular property line of Site 163 (2-25). At the southern intersection of Parcel 2-25 and 2-26, the boundary proceeds south then west along the southern boundaries of 2-26 and 2-28 (Site 156). At the southwesternmost corner of Site 156, the district boundary turns northwest and continues along the property line of Site 156 (2-28) to the mid-point of Hilldale Avenue. Proceeding along the mid-line of Hilldale Avenue to a point perpendicular to the western property lines of Site 159 (2-38), the district boundary proceeds northeast along (2-39) parallel to the mid-point of Main Avenue. Proceeding northwest to a point perpendicular to the southwestern corner of Site 217 (5-29), the boundary turns northeast along the western property line of Site 217 (5-29) to include the northeast border of Parcel 5-29 to the intersection with the property line of Site 219 (5-30). Turning northeast, the boundary proceeds along Site 219 (5-30) to its northwest corner and continues southeast along the property line to the intersection with the west boundary of Site 86 (2-45) and proceeds northeast and turns east along the northern boundary of (2-45), tracing the property line of Site 86 east and southwest, the boundary turns southeast to encompass the northern border of Site 82 (2-49). Turning southwest the boundary follows the eastern property line of Site 82 (2-49) to its intersection with the property line of Site 72 (2-52) and turns northeast to follow the northern border of Site 72 (2-52), turning southwest on the eastern border of the property to include its northeast perimeter. The district boundary proceeds southeast to include the northern border of Parcel 2-53. Continuing to the northeast corner of that parcel, the district boundary turns abruptly southwest to trace the eastern perimeter of Parcel 2-53 to its intersection with the northwest corner of Site 64 (2-56). Tracing the northeast border of Site 64, the district boundary runs northeast at the intersection of Site 64 and Site 69 (2-60) and traces the perimeter of this property northeast, southeast and southwest to its intersection with the Massachusetts state line following the state line to the point of origin.

Continuation sheet DISTRICT DATA Item number 10 Page 2

BOUNDARY JUSTIFICATION:

The district boundaries of the Town Center District were established to encompass properties reflecting the agricultural, municipal and residential development of the district. Owing to the historical development of the Town Center District, the boundaries encompass significant undivided agricultural divisions, built resources and major transportation arteries.

The southeastern border of the district proceeds along the mid-point of Main Avenue to exclude recent unsympathetic subdivision. The large percentage of undeveloped acreage included within the district boundaries significantly contributes to the New England agricultural character by providing uninterrupted vistas, visible from the town center and outlying areas, as well as maintaining the historic integrity of original land divisions.

The boundary determinations were also established by shifts in density and district architectural integrity. This justification is most evident along the northwest portion of Main Avenue where excluded parcels are occupied by unsympathetic new construction and the character of the district is no longer evident.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

A typical Georgian style, the Kiely house is characterized by its large prominent roof, massive central chimney, and plain ornamentation. The windows are all 12 over eight lights with wide, molded surrounds. The central entry door is topped by a transom with lights, and on either side of the door are pilasters supporting a full entablature. Treatment at the eaves consists of a boxed cornice with a wide molding applied to the frieze on the lateral eaves, and close raking eaves with fascia. The entire structure rests on a granite block foundation.

RELATED STRUCTURES AND CONTEXT:

BOUNDARY AND ACREAGE DESCRIPTION:

24 acres north-Mazur, Wallem, south-Main Avenue, east-Mazuv, state line West-Levesque, Syvenski, Hartwell.

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This is an excellent example of Georgian architecture which has been totally restored and is aesthetically pleasing both inside and outside. Sitting on an incline and overlooking Main Avenue, the house is a visual anchor and is the first property that one sees when crossing the state line from Amesbury, Mass. into South Hampton. This fine house coupled with several acres of open fields in back, contributes greatly to the character of this agricultural environment.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The Woodman house is a modest example of a Georgian half house. The main features of this two and one-half story structure include: a six-panel sidehall entry with pilasters supporting a triangular pediment: six-over-six windows with plain surrounds; a boxed cornice on the lateral and raking eaves with a molded frieze on the lateral eaves; plain and narrow corner boards; and a low-pitched roof topped by an offset chimney.

RELATED STRUCTURES AND CONTEXT:

BOUNDARY AND ACREAGE DESCRIPTION:

One acre bounded on the N by Main Avenue, E by Main Avenue, S by the Mass. Stateline, and W by Ducharme.

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Built c. 1795, there are only two Georgian half houses in South Hampton, the other being the Spencer Farm (site #10). This house combines with the Kiely house (site #59) to form a visual anchor when crossing the Massachusetts state line into South Hampton.

Photographer: Scott Novak
 Negative with: S.R.R.C.
 Negative File Number: SH-79-3-c/#19 & 20

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

This early 20th century vernacular structure sits on a granite slab foundation. It has Greek Revival massing, gable end facing the street, and the main entry in the gable end. The entry door is located within a plain, one story, hipped roof porch. Treatment at the eaves consists of a boxed cornice with a wide molded frieze, and gable end returns. All windows are two over two with plain surrounds.

RELATED STRUCTURES AND CONTEXT:

There is a large barn behind the house.

BOUNDARY AND ACREAGE DESCRIPTION:

12 acres bounded to the north-Mazur, south-Main Avenue, east-Kiely & Levesque, west-Palmer & Mertinooke.

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This is a plain utilitarian structure, typical of early 20th century vernacular architecture. Its significance derives from the harmonious way in which it blends with its surrounding agricultural environment.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

This superb example of a Georgian saltbox is characterized by its simplicity of ornamentation and massive central chimney. The main features of this two and one-half story structure include: a raised-panel center entry door which has a transom with lights; nine-over-six windows on the first story and six-over-six on the second; close raking and lateral eaves; narrow, plain corner boards; and a fieldstone foundation.

RELATED STRUCTURES AND CONTEXT:

BOUNDARY AND ACREAGE DESCRIPTION:

$1\frac{1}{2}$ Acres bounded on the N by Palmer, E by Syvenski, S by Main Avenue, and W by Palmer.

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Built c. 1720, the Jeremiah Ordway house is the only Georgian saltbox style home in South Hampton making it worthy of preservation. It has retained its architectural integrity and the additions, similar in color, texture and mass successfully maintain the Georgian style. Aesthetically pleasing, the home is a visual anchor along this section of Main Avenue.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The Hartwell House was built c. 1847 and exhibits many characteristics of the Greek Revival style. The massing of the main block is typically Greek Revival and the house is situated with its pedimented gable end facing the street. Other Greek Revival features include: a boxed cornice; wide corner boards suggesting pilasters; six over six windows (on the second story); and sidelights extending the height of the door. A two story wing has been added (date unknown) to the east and is now the main entry way. It has a five panel door arranged four vertically and one horizontally. The entry has an open porch which is supported by a free standing, tapering, polygonal column.

It is probable that the original door was a sidehall entry located on the gable end where there is now a window, and that the open porch was built at the same time as the wing. The house rests on a granite block foundation and has a medium pitched roof topped by two narrow chimneys, one of which has a corbelled cap.

RELATED STRUCTURES AND CONTEXT:

BOUNDARY AND ACREAGE DESCRIPTION:

Forty-eight acres bounded on the north-Wilhelm and Merrill, east-Merrill, Mazur, and Palmer, south-Main Avenue, and west-Sewell.

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

The Hartwell house is an imposing presence on the landscape. Though the barn was torn down in 1972, the house with its 48 acres of open fields makes a strong statement about rural nineteenth century life in South Hampton and serves as a visual link to its agricultural heritage.

The 1892 map lists the owner as G.B. Palmer. (This house was torn down in 1979, after this survey was begun.)

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The Sewell house is a good example of the Colonial Revival style characterized by its large portico, balustrades, and prominent roof. The center entry has a one story portico supported by square columns and topped with an ornamental balustrade. The same style balustrade can be found above the screened porch located to the east. Another feature is the recessed porch located on the west front facade. It has a free standing square column and a suspended balustrade. The medium pitched roof is topped by two narrow chimneys with corbelled caps. The treatment at the eaves is a boxed cornice with a wide molded frieze and gable end returns. The corner boards include one piece of molding at the top, suggesting capitals. All of the windows on the main block are two over two with plain surrounds. The house rests upon a stone foundation with a brick facing.

RELATED STRUCTURES AND CONTEXT:

Separate 2 car garage and shed.

BOUNDARY AND ACREAGE DESCRIPTION:

Forty-four acres bounded on the north-unknown, east-Hartwell, south-Main Avenue, and west-Currier and Berry

REFERENCES:

(1) Notes of Mrs. Cyril Embree, Local Historian, South Hampton

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Built c. 1900 the Sewell House was once located in Newton along the trolley line from Amesbury and was known as "The Piggery" where rum could be purchased by thirsty travelers. The Paige brothers moved the house in 1906. (1) This rambling late 19th century farmhouse blends in well with the other houses on Main Avenue and adds character to this section of the town.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

Built c. 1870, the Griset house exhibits Federal, Greek Revival, and Italianate details. Federal characteristics are visible in the massing, symmetrical fenestration, low pitched roof, and shutters on all the front facade windows. Greek Revival details include a boxed cornice with a wide molded frieze and gable end returns supported by pilasters. Finally, the Italianate style is evident in the projecting flat roof doorhood which is supported by heavy brackets with ornamental drop pendants. The center entry to this two and one-half story structure has double-leaf doors. All of the windows are two-over two with architrave trim and the house rests on a stone and brick foundation. There is an enclosed porch to the west with six over six windows and an open porch to the east supported by square columns with decorative balusters. The open porch serves as an entrance to a two story ell with a gable roof and two-over-two windows.

RELATED STRUCTURES AND CONTEXT:

BOUNDARY AND ACREAGE DESCRIPTION:

Seven acres bounded on the north-Main Avenue, east-Ella Currier, south-Donald Currier and west-Donald Currier

REFERENCES: Religious History of South Hampton, Newsletter 1881, page 31.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

The fine rambling farmhouse in conjunction with the Sewell House (site #72) provides an important link to South Hampton's past. Overlooking Main Avenue from a small hill, the house is a visual anchor and maintains the rural character of the surrounding environment. The house is on the site of the old David Currier house which, in 1783, served as a Baptist meeting place.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The Santosuosso house is a large twin chimney Federal style structure which has had many additions (dates unknown). All of the entrances to the house have been enclosed by porches with the most prominent being the five bay of the front facade. The low pitched roof is topped by two large inset chimneys and the treatment at the eaves is a boxed cornice with gable end returns. The front corner boards are polygonal in design. Most of the windows are two over two with architrave trim. The house rests on a granite slab foundation. A two story ell with a gable roof extends to the south and has a multi-bay enclosed porch.

RELATED STRUCTURES AND CONTEXT:

BOUNDARY AND ACREAGE DESCRIPTION:

25 acres bounded north-Main Avenue, south-Powwow River, Amsler, east-Gertreau, Donald Currier, west-Michael Santosuosso, Jewell Street, Marsh, Anderson, Merrill

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Resting on a slight incline, this house is a visual anchor on the south side of Main Avenue. The house is particularly significant as it was once known as the Parker Merrill Tavern and was a stopping point for tired travelers on their way to Newburyport.

Side (west)

Photographer: Scott Novak
Negative with: S.R.R.C. SH-79-3-c/#34 house
Negative File Number: #36 barn

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

This typical Georgian house is characterized by its massive central chimney, steeply pitched roof, symmetrical fenestration, and plain ornamentation. The original six panel center entry door has sidelights on either side, and a louvered transom with lights, above. Pilasters support a full entablature over the door. The narrow windows are nine over nine on the first story, and nine over six on the second story, all with window caps. Cornice treatment is close raking eaves with fascia, and molded lateral eaves. The house has narrow, feathered clapboards, and the entire structure rests on a fieldstone foundation.

RELATED STRUCTURES AND CONTEXT: A separate barn with a gable-roof (site #80) is located to the north. It has wood shingle siding and a fieldstone foundation. On the southeast facade a shed-roof shed has been added. This barn has been converted into an art studio.

BOUNDARY AND ACREAGE DESCRIPTION: 44 acres bounded to the north-Old Peck Road, south-Main Avenue, east-Currier and Jewell, west- Old Peak Road (Imbrescia).

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Plain and boxy in appearance, the Berry house is a good example of Georgian style architecture. Although this house has had many alterations, the alterations since 1960 have been to restore the interior of the house to its original appearance. When the old meeting house was being used by other denominations, the Baptists would meet here c. 1831. This house narrowly escaped destruction in the Hilltop fire of 1912, as it was located just to the east of the main portion of the town center that burned. The outside appearance of the home has retained its architectural integrity making it worthy of preservation.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The Imbrescia house is characterized by its simple design, symmetrical fenestration, and plain ornamentation. The center entry has been enclosed by a gable-roof porch with six over six windows. The low pitched roof is topped by two narrow inset chimneys, and the eave treatment includes: a boxed cornice with a narrow molded frieze on the lateral eaves and close raking eaves with fascia. All of the windows on the main block are eight over eight with plain surrounds. The siding on the front facade is clapboard while the sides are covered with wood shingles. The house is supported by a stone and brick foundation. A shed roof ell with a shed dormer extends the length of the house and has the same eave treatment as the main block. To the east a porch with a gable roof serves as an entrance to the ell. A shed/garage with a gable roof and wood shingle siding has also been added to the east.

RELATED STRUCTURES AND CONTEXT: Separate gambrel-roof barn to the northeast has been converted to a residential structure.

BOUNDARY AND ACREAGE DESCRIPTION:

Ninety acres bounded on the north-unknown, east-Old Peak Road, (Berry) south-Main Avenue, and west-Harper and Vazzella

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Built c. 1850 the Imbrescia house is a modest late Federal style structure which has had many additions (dates unknown). The house narrowly escaped destruction during the Hilltop fire of 1912. It combines with the Harper house (site #83) and Berry House (site #78) to maintain the historical character of the center of town. For a brief period, after the fire of 1912, the home was used as a boarding house by Mr. Frank Perry.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

A good example of Georgian architecture, the Harper house is characterized by its prominent roof and symmetrical fenestration. It has a six-panel center entry door with a full entablature above, and sidelights extending halfway to the floor on either side. The windows are two over two and 12 over eight on the first story; and nine over six on the second story, all with plain surrounds. Cornice treatment is close raking eaves with fascia and molded lateral eaves, also with fascia. The cornerboards are plain, and meet with a wooden watertable. The original fieldstone foundation had granite slabs placed on it when the house was moved to this site. There is a one story shed roof ell with the same cornice treatment as the main block.

RELATED STRUCTURES AND CONTEXT:

Separate garage

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

This two and one half story Colonial Revival style structure is characterized by its impressive scale and open one story porch. This shed roof porch extends along both the south and east facades, is supported by round, nonderivative tapering columns, and has square balusters. Eave treatment on the porch is the same as that on the main block. The sidehall entry within this porch consists of a victorian door with an oval light, and plain surrounds. The house has two over one light windows with shutters and projecting window caps. Treatment at the eaves consists of a boxed cornice with molding applied to the frieze; and there are Greek Revival pediments on both the main block and on the two and one half story wing to the east. The wing has the same foundation, windows, and eave treatment as the main block. The entire structure rests on a random rubble foundation.
.....

Cont. Related Structures: silo with a circuler mansard roof.

RELATED STRUCTURES AND CONTEXT: There is a separate barn to the west of the house that has a pyramidal hipped roof cupola with louvers on it's eight windows. It has two sliding vertical board doors; two over two windows; and the same eave treatment as the house. Attached to this is a one and one half story structure with a gable roof, fieldstone foundation, dormer with two windows, and clapboard siding. There is also a

BOUNDARY AND ACREAGE DESCRIPTION: 240 acres bounded to the north-Bonah, south-Main Ave., east-Michael Santosuosso, Imbecia, west-Currier, Kennison, Bonah

REFERENCES: Mrs. Cyril Embree, Local Historian

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

The Vozzella house was built shortly after the Hilltop Fire of 1912, which consumed nine buildings. Surrounded by 240 acres of land, and with a large barn and silo, it is reminiscent of South Hampton's agricultural past. Being located right across the street from the town hall, it contributes greatly to the rural quality of downtown South Hampton and is worthy of preservation.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

The Anderson house was built in the Greek Revival style c. 1913 with the purpose of re-creating the Baptist parsonage after it burned in the Hilltop fire of 1912. It is architecturally sympathetic with the other major buildings in Barnard Square, i.e. the Church, School, and Town Hall.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

Originally built in the Greek Revival style, the appearance of the church was altered c. 1906 when the original louvered belfry and two symmetrically placed entries were removed and replaced with a single entry set beneath an open square belfry set into the northeast corner of the main block.

The belfry has three major horizontal sections. The first section is sheathed in clapboards and terminates at a projecting belt course. Each elevation of the middle section contains a round-stilted arch with a simple balustrade spanning the opening. Above this belfry section is a pyramidal roof, the slopes of which have a slightly bell-curved profile. The sidehall entry is sheltered by a pedimented entry hood supported by turned posts.

Centered on the facade wall is a raised, round-arched molding designed to suggest a 2-story window. The arched molding gives the illusion of paired Gothic arches.

The side elevations contain paired sanctuary windows set beneath louvered fan blinds and enframed in a keystone architrave surround.

Two 1-story, gable-roofed ells project from the rear elevation.

RELATED STRUCTURES AND CONTEXT:

BOUNDARY AND ACREAGE DESCRIPTION: One and one-half acres bounded to the north by Barnard School, south by Syverton, east by Jewell Street, west by Town Cemetery.

REFERENCES:**STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):**

Long a landmark near South Hampton's town center, the Baptist Church occupies a prominent location at the southern edge of Barnard Square. It serves as the visual terminus of the Square and as such helps to establish the southern boundary of the town center. In combination with the architecturally similar Town Hall, it makes a substantial contribution to the historic character of the Town center.

Built in 1832, it still exhibits traditional church form although its original appearance was altered c. 1906 with the addition of a simply ornamented belfry. The pointed-arch tracery on the facade is an interesting detail that shows the influence of the Gothic Revival style.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

Symmetrical and self contained this impressive Georgian house faces east toward Barnard Square at a 90 degree angle to Hilldale Avenue. Features include: a large central chimney; a central door capped by a five light transom; and a pedimented door hood supported by plain pilasters. Windows have nine over nine sash, framed simply with architrave trim; ground floor window shelves exhibit two-part entablature; second story window shelves are incorporated into the soffit and frieze molding. A one story connecting ell runs between the house and barn.

RELATED STRUCTURES AND CONTEXT:

The shingled barn's gable faces Hilldale Avenue.

BOUNDARY AND ACREAGE DESCRIPTION:

59 acres bounded to the north-Hilldale Avenue, south-Unknown, east-Rosal Bryant, west-Lutes

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Built in 1796, the Isaiah Palmer house is a remarkably intact example of the Georgian carry over into the Federal period. It is locally believed that Isaiah Palmer, an early South Hampton farmer, built this home for his bride. With its 59 acres of fields and farm land it beautifully maintains the early, agricultural character of South Hampton.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The Delaware home is a small late 19th century vernacular home. The center entry is beneath a drop bracketed hood and flanked by bay windows. Other features of the house include: simple corner pilasters; a boxed cornice with a return; a plain frieze; a small center chimney; and simply framed second floor windows with a small shelf and molding around the window. A one story ell is attached to the rear of the house and a post and beam shed is attached to the ell. An enclosed porch projects off the east gable of the house.

RELATED STRUCTURES AND CONTEXT:

BOUNDARY AND ACREAGE DESCRIPTION:

4 acres bounded to the north by-Hilldale Avenue, south by-Bryant, east by-Bryant, west by-Robinson.

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This modest country home was built by Oliver H. F. Delaware, a unique character in South Hampton history. In the mid-1800's Delaware resided on land claimed by neither New Hampshire or Massachusetts. He, therefore, declared himself governor and secretary of state for the Delaware Territory, an independent territory. In addition to its association with Oliver H.F. Delaware this house is a structurally sound and attractive dwelling.

Negative File Number: Sh/79/C/A 5A-6 6A-7

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

A fine example of Federal residential architecture the main features of the Fraser home include: symmetrical fenestration; two over two windows; with simple surrounds with architrave trim; a multi-paneled door, topped by a louvered semi-elliptical fan, flanked by sidelights and plain pilasters supporting an entablature; a soffit-frieze molding; hip roof; and twin-inset chimneys. Features of the three-bay, gable roof ell include; a six paneled side entry above which is a transom with eight lights; six over six windows with architrave trim; a central chimney; and a small porch supported by simple columns. The west four by three enclosed sun porch has paneled outside walls, two over two windows, and a slightly hipped roof.

RELATED STRUCTURES AND CONTEXT: A gable roof barn whose main features include a bracketted cornice; wide pilasters. Long windows with shutters and semi-circular heads; an 8 sided cupola with cornice brackets; and a round, keystone casement type wind in the gable.

BOUNDARY AND ACREAGE DESCRIPTION: 6½ acres bounded to the north-Hilldale Avenue, south-G. Buxton, east - Town/Syverston, west- J. Buxton, G. Buxton.

REFERENCES: Interview with Mrs. R. Fraser 2/27/79

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Built c. 1827 the Major Moses Eaton Jr. house is one of the few examples of High-style Federal residential architecture in South Hampton. Located on the fringe of Barnard square the Eaton home is an important contributor to the aesthetic value and cohesiveness of the town center. The house was built on a tract of parsonage land which was "remised, released, and quick claimed for 900 years to Major Moses Eaton Jr," a prominent businessman known as a gentleman, harness-maker, Boston retailer, and chaise maker. He also held the public positions of; representative; selectman; post-master; and deputy sheriff. Major Eaton died in 1862 with an estate worth \$60,000.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The town hall, built in the Greek Revival style, was erected in the same period as the church and schoolhouse and is stylistically similar to both. Like the church the town hall has paired windows on the side walls, distinctively topped by louvered semi-circular fans. The town hall was originally capped by a large belfry which would have related its design even more closely to the church. Other architectural features include a pedimented gable oriented toward the street; a louvered attic vent; wide cornerboards; and modern fire doors beneath a flat hood supported by drop scroll bracketts. Appendages include the fire station; a garage like structure, attached to the southwest corner; a one story hip roofed ell; and a one story gable roofed wing extending from the southeast corner with an attached shed.

RELATED STRUCTURES AND CONTEXT:

BOUNDARY AND ACREAGE DESCRIPTION: Bounded to the north-Main Avenue, east-Barnard School, south and west-Fraser

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

The town hall is important both visually and socially to the town center of South Hampton. Architecturally it is linked with the Barnard School and Baptist Church forming a nucleus of Greek Revival public buildings. Traditionally town halls have been the center of town activity throughout New England and it is important that the South Hampton town hall continue in its original function today.

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

Barnard School is a simply styled, heavily massed, Greek Revival structure. The front gable is pedimented and contains a square vent and the Barnard School sign. Other features include corner pilasters, a six-paneled main door (three bays, recessed panels over three short recessed panels) flanked by pilasters rising to an entablature, two other simply styled entrances, two-over-two windows, and a hood shading the second-story windows on the rear of the building. A wing, equal in size to the main block, is attached to the rear of the building.

RELATED STRUCTURES AND CONTEXT:

BOUNDARY AND ACREAGE DESCRIPTION: Bounded to the north by Hilldale Avenue, south by Syverston, east-Jewell Street, west by the Town Hall/Cemetery

REFERENCES: Amesbury Daily News, March 9, 1900

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

Dating from the same era as the Town Hall and the Baptist Church, the Barnard School is an integral component of the Barnard Square streetscape. The school was founded by Benjamin Barnard, whose 1832 will established a permanent fund, the income from which was to be used for the support of a free school. To this day the school building is owned by the trustees of the Benjamin Barnard estate. The school was designed sympathetically with its surrounding structures and has been used as a school since it was built.

Description of View: S Elevation

Photographer: Gretchen Langheld
 Negative with: S.R.R.C.
 Negative File Number: SH-70-4P-#14

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The house has its gable end facing the road. It has a plain box cornice and cornice returns and a corbeled chimney cap. A closed porch, a subsequent addition, runs the length of the south gable (facing the road) and the west side of the house. The north end of the west face of the porch has a gabled roof with a closed triangler pediment and box cornice.

RELATED STRUCTURES AND CONTEXT:

The shed in back has wooden shingles and a stone foundation.

BOUNDARY AND ACREAGE DESCRIPTION:

Thirty acres bounded on the N by Hellen E by Bonah, S by Main Avenue and W by Donald Hellen.

REFERENCES:

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This house is a vernacular farmhouse built c. 1850 and as such is a significant part of the agricultural heritage of South Hampton.

SURROUNDING ENVIRONMENT: Open Land Woodland Scattered Bldgs Moderately Built Up
Densely Built Up Residential Commercial Industrial Agricultural
Roadside Strip Development Other

Recorded By: Gretchen Langheld

Date: 2/16/79

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

Greek Revival elements of the house include the gable end facing the street, box cornice with returns, and interior detail typical of the period such as tapered door trim and four-panelled doors. The main entry, now located on the gable end, was originally located to the west, on a small porch that has been closed in. The window treatment is very simple, with six over six sash, thin muntins, and the original cylinder glass. A 1918 photograph shows shutters on the windows, a typical feature of the Greek Revival period. Wood shingles have been added to the house, date unknown.

RELATED STRUCTURES AND CONTEXT: Large shingled barn with shed attached at back. Barn is connected to the house by a long carriage shed, now used as garage. The barn, with a random rubble and brick foundation, seems to predate the house. Inside the barn is a brick vegetable cellar.

BOUNDARY AND ACREAGE DESCRIPTION:

Eighty-nine acres bounded on the N by East Kingston line, E by Cressy, S by Main Avenue and W by Hellen.

REFERENCES: Interview with Mrs Cyril Embree, 2/6/79, and Ernest Bonah, present owner, 2/16/79.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

In combination with its long carriage shed and massive barn, the Bonah House is an imposing presence on the landscape, and makes a strong historical statement about rural nineteenth century life. In spite of cosmetic alterations to the exterior of the house, its basic integrity remains intact. More serious alterations to the interior, particularly in the rear of the house, tend to confuse the original layout, but significant period detail has been well preserved, including mantel pieces, doors and door trim of the Greek Revival period.

MAIN AVENUE

MOORE HOUSE

PHOTO

Description of View: SE elevation

Photographer: Gretchen Langheld

Negative with: S.R.R.C.

Negative File Number: SRR 40

ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The original, eastern half of the house is a typical two-story Georgian farmhouse with large center chimney and center entry facing the road. The western half of the house, a subsequent addition, creates a symmetrical format, with the exception of the small porch added to the west end. The only exterior differences between the two halves are the later, smaller chimney on the small porch on the west end. Both door surrounds are identical and features simple entablatures. The window are trimmed simply and have six over six sash, some with the original wide muntins. The interior detail is well preserved and includes, in the east side of the house, raised panelling and a bolection molding surrounding the fireplace, and in the west side of the house, detail typical of the Greek Revival period.

RELATED STRUCTURES AND CONTEXT:

A large barn attached to the house by a connecting ell. It is locally believed that this barn, now shingled, was moved to the site from across the road.

BOUNDARY AND ACREAGE DESCRIPTION:

Two acres bounded on the N by Bonah and Vozzella, E by Miller, S by Main Avenue and W by Gosselin.

REFERENCES:

Interview with Mrs. Cyril Embree and Mrs. Peter Coffin, present owner, 2/6/79.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

The Israel Sawyer House is historically, architecturally and aesthetically an outstanding South Hampton structure. A local landmark since it was built c. 1765, its architectural character is enhanced by the fact that the original structure was duplicated at the west side of the main block at a later period, possibly during the Greek Revival period as reflected in the interior trim of the second half of the double house. The present house is well preserved and retains its historical integrity and makes a strong aesthetic statement in the rural landscape. Local legend has it that Israel Sawyer built the house for his bride, Jemima Eastman, whom he married in 1763.
