DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Havre de Grace lighthouse structure, constructed in 1827, is the only structure remaining from the original complex authorized by the Maryland General Assembly in 1826. The original complex consisted of the lighthouse, keeper's quarters and an outhouse. Presumably, the specifications for the lighthouse structure were developed by staff personnel of the Treasury Department.

The lighthouse is a conical structure of stone painted white, 26 feet high, situated on a plot of land 7' above mean low water. The focal plane of the light was 32 feet above the base. A cupola constructed of metal with rectangular glass panes surmounts the stone tower. Access to the cupola is gained by means of a circular granite stairway which occupies the entire core of the structure.

The lighthouse originally had nine lamps with 16 inch reflectors. The last equipment used in this tower was a fifth-order classical lens with a fixed green light.

SPECIFIC DATES 1827

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The Havre de Grace Lighthouse was built in 1827 by Mr. John Donohoo who was responsible for many of the early lighthouses on the Chesapeake Bay. The lighthouse was built at the junction of the Chesapeake Bay and the Susquehanna River in Harford County, Maryland. The General Assembly of Maryland in 1826 authorized the construction of this lighthouse because of the numerous vessels lost in this area.

Although the official name given to the lighthouse has always been Havre de Grace, the local citizenry still refer to this lighthouse as the Concord Lighthouse. The name apparently dates back to the seventeenth century when this area was known as Point Concord. Augustine Herman on his map of 1670, designates the point at the mouth of the Susquehanna River as Point Conquest and from this name Point Concord has been derived.

Havre de Grace Lighthouse was attended by Mr. John O'Neill, an Irishman, who was given this job by the city in recognition of his heroism in defending Havre de Grace from the British during the War of 1812. The O'Neill descendants attended the light until it was automated in the 1920's. This dedication on the part of the O'Neill's is unrivaled in the history of Chesapeake lighthouses.

The lighthouse was discontinued by the Coast Guard as an active light 17 November 1975.
