National Register of Historic Places Registration Form

JUN 2 3 1989

NATIONAL

This form is for use in nominating or requesting determinations of eligibility for individual properties or district Structions in Guidelines for Completing National Register Forms (National Register Bulletin 16). Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.

Description

Originally known as the Spanish Apartments, 16 E. Davis Boulevard, now the Villa de Leon, is a picturesquely massed Mediterranean Revival style apartment building designed by Martin L. Hampton for developer D.P. Davis in 1925. Located on the northern tip off the main island in the Hyde Park Section of the subdivision, the building is the only "gateway" structure to survive the construction of the present modern bridge. Professional and medical office buildings, parking garages, and modern apartment buildings now surround it. Although primarily a three-story building, the structure includes a one-story wing and two five-story arcaded towers. It is constructed of stuccoed hollow tile on a continuous poured concrete foundation and features gable and hip roofs covered with clay barrel tile. The truncated, diamond shaped plan opens to the north but encloses a simple courtyard with a centrally placed tiled fountain.

References to the vernacular tradition appear in the irregular fenestration, while the entrances carry a more formal treatment. Windows are rustically detailed with pecky cypress lintels and grills of wooden spindles. The double hung sashes and casements are grouped in units of two, three, and four on the courtyard elevation. Round headed arches light the second floor in the main block of the building and at various tower levels. At each of the five entrances Plateresque style frontispieces of cast concrete imitate the stonework of Italian and Spanish building prototypes.

The Villa de Leon includes twenty-two apartments, ranging from studio size to one and two bedroom flats, some of which have tower bedrooms. Most of the units follow simple rectangular plans; however, several incorporate triangular closets and halls, or pentagonal living rooms, to accommodate the unusual exterior plan. Decorative detailing is confined to the cast concrete fireplaces and arches between the rooms. Many of the original fittings, such as built-in ironing boards, Murphy beds, breakfast nook furnishings, and art glass cabinet doors still survive.

Because the apartment complex covers nearly all of its two and a half lots, there are no other structures associated with the site. United States Department of the Interior National Park Service

Statement of Significance

In plan, massing, and detail the Villa de Leon is significant as a fine example of the Mediterranean Revival style adapted to a large multi-residential structure in Tampa. By placing the complex at the northern tip of the island, D.P. Davis visually announced the Mediterranean theme of his planned community. The structure is one of the few surviving buildings designed directly by Martin L. Hampton, the Miami architect that Davis hired to supervise construction in the subdivision. In all, Hampton prepared designs for six model homes, two hotels, and several apartment buildings. All were intended to conjure images of "castles in Spain" for the potential buyer.

The Spanish Apartments, as the building was originally named, was one of two "gateway" structures planned by Davis and Hampton. The other was the Venetian Apartments, which were demolished when the present bridge was constructed. Construction of the \$135,000 building began in mid-February of 1925, with Grayburn H. Cooper as the contractor and Franklin O. Adams, Jr. as the supervising architect. In June of that year, while the building was still under construction, the property was sold to Chicago hotel operators Victor Polakow and Henry Bloomfield for \$235,000.

The Chicago entrepreneurs did not hold the property long. Mary West Thatcher and her husband Samuel purchased the building in 1931 and managed the complex until 1941 when it was sold. The apartment building has had a number of owners since that time.
