National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name PRITCHARD, DR. WILLIAM B., HOUSE

other names/site number Foggy Bottom

2. Location

street & number 29994 Polks Road N/A not for publication

city or town Princess Anne vicinity

state Maryland code MD county Somerset code 039 zip code 21853

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments.)

SEE CONTINUATION SHEET NO. 1

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B** Property is associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply.)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

DR. WILLIAM B. PRITCHARD HOUSE
Somerset County
Maryland

Section number 7 Page 1

DESCRIPTION SUMMARY:

The Dr. William B. Pritchard house is a 2½-story, five-bay, frame dwelling constructed in several stages between ca. 1860 and 1906. Supported by a low brick foundation, the single-pile frame house is sheathed with plain weatherboard siding, and it is covered by a steeply pitched, asphalt shingle roof. The house substantially achieved its present Colonial Revival configuration in a remodeling campaign carried out in 1904-06. At that time, it was enlarged with additions and Tuscan columned porches that stretch across the south (main) and north (creek) elevations. Attached to the east end of the porch is a distinctive octagonal gazebo. A single-story west end addition, attached in 1947, joins a 1½-story frame kitchen to the main block. The interiors feature a mixture of mid-to-late nineteenth century and early-to-mid-twentieth century woodwork. Also on the property is a ca. 1900 frame dwelling now used as a guest house.

National Register of Historic Places
Continuation Sheet

DR. WILLIAM B. PRITCHARD HOUSE
Somerset County
Maryland

Section number 7 Page 2

GENERAL DESCRIPTION:

The Dr. William B. Pritchard house is located at the end of a tree-shaded lane that intersects Polks Road approximately a mile west of the Princess Anne-Allen Road in the vicinity of Princess Anne, Somerset County, Maryland. The 2½-story, five-bay, frame house faces south with the gable roof oriented on an east/west axis.

Dating from four periods, the 2½-story, frame dwelling rests on a part brick, part poured concrete foundation, and the entire structure is sheathed with plain weatherboards. The steeply pitched gable roofs are covered with asphalt shingles. The oldest section, estimated to date ca. 1860, is the two-story, two-bay, east end of the five-bay, frame dwelling. Around 1880, the two-story building was enlarged into a 2½-story, three-bay, cross-gabled farmhouse. In 1904-1906, the three-bay farmhouse was enlarged with a two-bay west gable end addition, and porches were built spanning the front and rear elevations with an octagonal gazebo at the east end. Also around 1904-1906, a 1½-story kitchen was erected off the southwest corner of the south porch. Finally in 1947, a single-story frame addition, built on a poured concrete foundation, was erected against the west gable end of the main block in order to connect the kitchen to the main block. Since the mid-1940s, only modest changes have been made to the structure.

The south (main) facade is an asymmetrical five-bay elevation sheltered by a single-story porch that stretches the full length of the house and wraps around the east gable end. A fully glazed front door is flanked by six-over-six sash windows, hung with louvered shutters. Seams in the weatherboard beneath a slightly larger adjacent south wall window indicate the former location of a doorway. The Tuscan columned porch features a rooftop balustrade that stretches across the length of the south elevation. The second floor of the south facade features a gable roofed, one-room extension of the main block, which is supported by the porch roof. The second floor is lighted by six-over-six sash windows fitted with louvered shutters. At the west end of the second floor there is a small shed-roofed enclosure which protects an exterior staircase that provides access to the flat-roofed porch. The roof is marked by a series of three hip-roofed dormers with six-pane

See Continuation Sheet No. 3

Continuation Sheet

DR. WILLIAM B. PRITCHARD HOUSE
Somerset County
Maryland

Section number 7 Page 3

windows.

An octagonal gazebo is located at the southeast corner. The gazebo is supported by Tuscan columns, and the eight-sided roof rises to a wooden finial. The rafters have chamfered edges, and the flooring is cut in shape of narrow pie slices that meet in the center.

The one-story porch wraps across the east gable end. Rising against the gable end of the house is an exterior 11-course common bond brick chimney stack with corbelled shoulders at the second floor level. Six-over-six sash windows with louvered shutters light the first and second floors. Small two-over-two sash windows illuminate the attic.

The north (creek) elevation also is asymmetrical, with a Tuscan columned porch stretched across the entire first floor. A portion of the porch has been enclosed with weatherboard siding and six-over-six sash windows. The western three bay section remains screened, with a square baluster handrail stretching between columns. The second floor is lighted by five unevenly placed, six-over-six sash windows flanked by louvered shutters. Formerly centered on the nineteenth century farmhouse but now located off center, is a large cross-gable pierced by a six-over-six sash window. Three hip-roofed dormers mark the roof slope, and each of the six-light windows has small louvered shutters. Rising through the west end of the house is an interior brick chimney stack finished with a corbelled cap.

The west gable end of the house is partially covered by a single-story, flat-roofed wing, topped a balustrade that marks the perimeter of the addition. A triple set of six-over-six sash windows mark the north wall, and a tall exterior brick chimney stack rises against the west wall with single six-over-six sash windows to each side.

At the southernmost end of the building is the ca. 1904-06 1½-story, rectangular frame kitchen wing distinguished by a gable-roofed, two-story porch attached to the west side. The first floor of the porch is enclosed while the second floor remains open and accessed through a four-panel second floor door. An interior brick

Somerset County
Maryland

Section number 7 Page 4

stove chimney rises through the south gable end. The steeply pitched roof has exposed rafter feet. Attached to the east side of the kitchen is an enclosed shed roof addition. Originally freestanding, the kitchen now is connected to the main block of the house by a one-story hyphen constructed in 1947.

The interior of the house reflects a mixture of mid-to-late nineteenth century and early twentieth century features. The east end living room contains a turned baluster staircase anchored by a late nineteenth century turned newel post. A shallow four-panel door opens into a stair closet. Fixed against the east wall is a plain ca. 1860-1870 mantel with undecorated pilasters rising to a plain frieze topped by a thick shelf. Built-in bookcases have been added to the east wall and they frame the fireplace.

The room adjacent to the entrance, formerly used as a dining room, features a plain ca. 1860-1870 mantel and early twentieth century built-in corner cupboards. The mantel features unadorned pilasters that rise to a plain frieze and simple end brackets supporting a thick board shelf.

The west end of the 1904-1906 house was remodeled when the 1947 addition was attached. The end wall was removed to make one large dining room/living room area. Brick fireplaces were built in both rooms with the larger fireplace in the 1947 addition. A small alcove on the south wall in the 1904-1906 house formerly was part of the kitchen and has been converted to a bar. There is a one-step shift in floor level between the two rooms.

The first floor interior of the kitchen is plainly finished with a ladder-type stair providing access to a second floor bedroom. Beaded board wainscoting covers the lower portion of the walls. The second floor walls and ceiling are covered with four-inch boards, and a shallow four-panel door in the west side provides access to the second floor porch.

The second floor of the main block is simply finished. The second floor hallway has wide five-inch pine flooring, which contrasts with the narrower two to three-inch flooring in the 1880 section. The turned baluster handrail continues across the second floor hallway and abuts an enclosed attic staircase. A shallow

Continuation Sheet**

DR. WILLIAM B. PRITCHARD HOUSE
Somerset County
Maryland

Section number 7 Page 5

four-panel door opens into the attic stair. The east bedroom is plainly finished, and the mantel has been removed from this space. The rooms on the west side of the hallway were remodeled during the 1904-06 and later 1947 renovations. A brick fireplace is located in the far west bedroom.

The attic is finished with four-inch board walls and ceiling. A wide pine floor distinguishes the east attic bedroom, and small rectangular mortises in the flooring around the stairwell indicate the former location of a rectangular stick balustrade which has been removed. A vertical beaded board partition separates the east bedroom from the rooms west of the stairwell. There is a consistent shift to narrower flooring in the rooms on the west side of the stair.

Standing on the east side of the house is a two-story, three-bay, frame guest house which dates to the turn of the twentieth century. The weatherboard frame structure is covered by a steeply pitched gable roof with exposed rafter ends. The first floor is sheltered by a Tuscan columned porch and the house is lighted by six-over-six sash windows. Two-story additions extend the single-pile main block to the rear.

Somerset County
Maryland

Section number 8 Page 6

SIGNIFICANCE SUMMARY:

The Dr. William B. Pritchard House is significant under Criterion A for its association with a trend at the turn of the twentieth century in which purchasers from outside the region acquired rural properties on the lower Eastern Shore and remodeled them to serve as country estates. The attenuated, single-pile, Colonial Revival dwelling has at its core a traditional nineteenth-century farmhouse, which was reworked extensively around 1904-1906 by New York physician, Dr. William B. Pritchard. Pritchard's acquisition and remodeling of the house are reflective of an early twentieth century trend in which rural Eastern Shore properties were purchased by urban professionals for country retreats. The buildings located on these tracts were frequently remodeled in the Colonial Revival style, which evoked romantic associations with Eastern Shore history and gentility. The Pritchard House derives additional significance under Criterion C as an expression of the Colonial Revival style in Somerset County, one of several well-executed remodelings in this style attributed to local master builder Richard A. Malone. The period of significance, ca. 1860-1906, spans the original construction and early twentieth century remodeling of the house.

Section number 8 Page 8

HISTORIC CONTEXT:

Beginning around the time of the Civil War, non-resident buyers began to acquire large acreages on the Eastern Shore. Many local families, who had held title to their ancestral land for several continuous generations were forced to sell in the wake of agricultural downturns and bankruptcy settlements. In Somerset County, some of the most visible of these transfers involved the mid-eighteenth century plantation dwellings such as "Arlington" and "Westover". Westover's distressed condition was described in an 1879 article in the national publication Harper's Weekly; author Bayard Taylor called the house a

fine building, broad and roomy, with an air of vanished grandeur about it. Decaying as the old Westover mansion now is, fallen into ruin here and there through years of neglect and ill usage, it still stands a monument of former Eastern Shore magnificence and hospitality.... Such it might have been in the old times; but alas! it is crumbling to ruin, and its glory is rapidly departing. The ballroom is used as a granary.

In November 1886, Frederick Baldt purchased Westover from Edmund B. and Sarah Cook, and it was during Baldt's twenty-one year occupation that the house was thoroughly reworked with Colonial Revival designs.

Although nowhere near the scale of Westover, the nineteenth century farmhouse acquired by Dr. Pritchard in 1904 was enlarged and modernized with the Colonial Revival aesthetic in mind. He added a two-bay addition on the west end and hip-roofed dormers were installed along the north and south roof slopes in order to light the finished attic bedrooms. Broad porches, with the Tuscan columns characteristic of the Colonial Revival style, were built spanning the south facade and east gable end, and a decorative octagonal gazebo was added at the corner.

The early twentieth century restyling of the house was executed by a local builder, Richard A. Malone from the nearby village of Allen, whose work is documented on several other Wicomico Creek dwellings. Malone's "signature" details include the

Maryland

Section number 8 Page 9

hip-roofed dormers and the Tuscan columned porches that end in an octagonal gazebo. Similar porches and Colonial Revival features are found at Brentwood (S-38), Happy Hollow Farm (S-401), and the Tull Farm (S-403). This local group of dwellings are among the finest examples of early twentieth century domestic Colonial Revival designs in Somerset County.

Dr. William B. Pritchard was one of several New York physicians who moved to Somerset County and established country estates on Wicomico Creek. Dr. Edward E. Tull purchased the old Adams plantation (S-29) and Dr. George Wallace Jarman acquired Brentwood (S-38). The Eastern Shore counties were favorite destinations of northern industrialists, businessmen, and professionals from New York, Philadelphia, and from as far west as Chicago and Detroit.

At the turn of the twentieth century, the American public wholeheartedly embraced the Colonial Revival as a particularly appropriate style for domestic architecture. Following the Centennial celebration in Philadelphia (1876), the public's fascination with the country's colonial past grew tremendously. American architects and builders responded by adopting eighteenth century forms in often exaggerated ways. Furthering the country's devotion to America's colonial architecture was the World Columbian Exposition in Chicago, held in 1893. The centerpiece of the fair site was a great "White City" based on neoclassical forms of Old World civilizations in Italy and Greece. The various states supplied their own exhibits, often focusing on replicas of eighteenth century life.

American architects and builders aggressively borrowed from colonial and classical building vocabularies, and employed various architectural elements in new ways to achieve individualistic designs unintended to replicate the past. The long Tuscan columned porches and octagonal gazebo on the Pritchard house do not duplicate eighteenth century forms, but the porches convey a sense of generous space, leisure, and hospitality that were often perceived during the early twentieth century as an integral part of eighteenth century life.

The history of the land during the second half of the

See Continuation Sheet No. 10

National Park Service****National Register of Historic Places
Continuation Sheet**DR. WILLIAM B. PRITCHARD HOUSE
Somerset County
MarylandSection number 8 Page 10

nineteenth century involved continuous ownership by the Cooper family, who first acquired the property in 1867. George Cooper, of Luzerne County, Pennsylvania, bought the farm, then 425 acres, from George B. and Emeline Jones for \$12,000. Due to the late nineteenth century architectural character of the core farmhouse, it is estimated that the structure was erected during George Cooper's ownership, which stretched from 1867 to 1887 when his heirs transferred ownership to John D. Cooper. The farm remained in the Cooper family until 1903.

Dr. William B. Pritchard's association with this Somerset County property began in 1904 with his purchase of eighty-nine acres of upland, twenty acres of woodland, and twenty acres of marshland along the south shore of Wicomico Creek. Identified as part of the "Edinburgh" tract, the property was held by William B. Pritchard until his death in 1942, when the farm and its improvements were sold to Norma Dare Owen, a New York fashion designer who operated under the name, Norma Dare. She and her husband, William B. Owen, Jr., called the property "Pigs In Clover". They held the property a short time, and sold it three years later to Isabelle Stuart Danziger. She and her husband sold the farm two years later, in 1947, to Andreas H. VanWagenberg, a Hollander who came to America around World War II. The VanWagenbergs ultimately established an import business on the property, which they named "Foggy Bottom".

Around 1947, the VanWagenbergs made some modifications to the house which included a single-story west end "Great Room" addition with a basement that joined the main block to the semi-detached 1½-story kitchen. A few alterations were made to the 1880s farmhouse as well. A section of the Tuscan columned porch was enclosed, and the north wall of the living room was removed to enlarge that space.
