BOUNDARY JUSTIFICATION

The previous set of boundaries for the district focuses on the buildings and the immediate surrounding area. The boundaries are being expanded to include the open land to the southeast, down the hill from the buildings which historically was athletic fields for the college and through much of this century included a parking lot. New construction has been made along the northeastern section of the original boundary which disturbs the historic character of that section of the campus and therefore is not included in the expansion.

BOUNDARY DESCRIPTION:

The boundaries are illustrated on the enclosed map.
