NPS Form 10-900 OMB No. 1024-0018 (Rev. 10/90)

United States Department of the Interior National Park Service

National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

8. Statement of Significance

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

_____ A Property is associated with events that have made a significant contribution to the broad patterns of our history.

_____ B Property is associated with the lives of persons significant in our past.

- <u>X</u> C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- _____ D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations (Mark "x" in all the boxes that apply.)

_____ A owned by a religious institution or used for religious purposes.

_____ B removed from its original location.

____ C a birthplace or a grave.

____ D a cemetery.

____ E a reconstructed building, object, or structure.

____ F a commemorative property.

_____ G less than 50 years of age or achieved significance within the past 50 years.

Woelk House Clark County, Kansas

DESCRIPTION

The Woelk House is a one-story, two bedroom, front-gabled Lustron dwelling with a Westchester Deluxe Plan. The 31-foot by 35-foot house has "Desert Tan" walls with white trim and a dark green roof.

Resting on a concrete slab foundation, the dwelling has an west-facing, rectangular plan. Porcelain enameled steel panels clad all exterior surfaces. Two-foot by two-foot panels sheath the dwelling's four walls. Narrower, vertical panels, approximately one-foot wide, cover the gable ends. Square "shingles", approximately one-foot square, cover the roof. The eaves of the front-gabled roof overhang slightly on all sides of the dwelling. A Lustron panel clad chimney rises from the north roof slope just west of center.

One end of each gutter running along the long (north and south) sides of the dwelling terminates in a downspout that is angled slightly toward the house. A serpentine steel rod fills the space between the downspout and the dwelling wall to create a trellis.

Openings asymmetrically pierce the walls of the dwelling. The steel windows have enameled steel surrounds and appear in three configurations: 1) a tripartite bay window, featuring a large plate of fixed glass flanked by fourlight aluminum casements, projects slightly from the south wall of the building in a paneled steel surround just west of the dwelling's northeast corner; 2) tripartite windows of the same configuration but flush with the body of the dwelling pierce the dwelling's north, west and south elevations; and 3) single and paired three-light casements pierce the east and north elevations.

The front porch is recessed below the front gable at the southwest corner of the dwelling, with the front door in the west elevation perpendicular to the street. The back door is approximately centered in the north elevation. Both openings appear to retain their original doors as well as aluminum storm doors of a modern vintage.

The interior of the dwelling retains most of its original Lustron materials and built-in features. Like the exterior, porcelain-enameled steel panels clad the interior walls and ceilings. The wall panels typically measure two-feet by eight feet, with some larger panels below windows, while the ceiling panels are eight feet square. Modern carpet covers the original asphalt shingle flooring.

The living room-dining area occupies the southwest portion of the dwelling, with the kitchen and utility room filling out the northwest corner. The bathroom and two bedrooms are located off a central corridor at the east end of the dwelling.

This dwelling retains much of its original kitchen cabinetry as well as the built-in china cabinet in the dining area with the pass-through between the kitchen and dining area. This latter feature distinguishes the dwelling as a Deluxe edition of the Westchester house model. Other built-in features that characteristic of Deluxe Westchesters include the mirrored vanity in the master bedroom and the closets and overhead storage throughout the dwelling.

Woelk House Clark County, Kansas

Sheds

Behind the dwelling along the north property line are two small, prefabricated, front-gabled metal sheds of a modern vintage. Neither contributes to the significance of the property. The shed at the northwest corner of the lot faces south, while the shed at the northeast corner of the property faces west.

<u>Site</u>

This property occupies a mid-block lot on the north side of Sunset Street. A gravel alley runs behind (north of) the dwelling. A curvilinear walk leads from Sunset to the front door. A concrete driveway extends to just behind (north of) the dwelling where it connects to a concrete walk leading to the back door.

Three mature evergreens, interspersed with smaller evergreen shrubs, obscure visibility of the front (south) façade of the dwelling. A mature deciduous tree is located north of the house near the east property line.

INTEGRITY

The Woelk House is in good condition. Although it suffers from minor rusting at the downspouts, corner panels, porch, and bay window, nearly all of its original features remain intact, including the windows, exterior and interior doors, kitchen cabinetry, and built-ins. Alterations have been very minor, affecting only interior cosmetic features, such as the installation of carpet over the original tile flooring. From the exterior, the property is an excellent example of the Lustron property type. The non-Lustron sheds are appropriately placed behind the dwelling along the rear property line. Overall, the property retains integrity of materials, design, workmanship, feeling, association, location and setting.

STATEMENT OF SIGNIFICANCE

The Woelk House is significant under National Register Criterion C for the area of ARCHITECTURE. It is one of only one hundred Lustron houses documented in Kansas and one of four Lustrons extant in Russell. It is also an excellent example of the Westchester Deluxe Lustron, the original and most popular model.

Russell, Kansas, experienced a major economic boom following the discovery of oil in the county in 1923. From a population of 2,300 in 1923, the city grew to 5,513 residents in 1948. The City continued to grow during the following decade, reaching a population of 7,143 in 1955. Accompanying the growth in population was the development of new residential neighborhoods and community infrastructure. The community dedicated two new elementary schools in 1952 and built five new churches between 1950 and 1955. Also in the second half of the post-war decade the hospital was doubled in size with a \$400,000 addition. The Theron Addition, where all four of Russell's Lustron houses are located, was platted in 1938. The majority of dwellings in the Theron Addition, including the Lustrons, are typical of suburban expansion that occurred in communities across the country during and immediately after World War II (Rocky Mountain Directory Company 1948, 1952; ConSurvey 1955).

In an effort to solve the post-World War II housing crisis, the Lustron Corporation, lead by Carl Stradlund, applied porcelain-enameled steel technology to residential design, producing a pre-fabricated dwelling that was "... fireproof, ratproof, decay-proof, [and] termite proof. Will never deteriorate or stain, never fade, crack or peel, never need painting, refinishing or reroofing [sic]" (Lustron Corp). The Reconstruction Finance Corporation rewarded Stradlund's efforts with \$32.5 million in federal aid, plus the lease of a vacated airplane factory in Columbus, Ohio, for production of the dwelling components. Stradlund applied the tenets of automobile assembly-line mass-production to the Lustron. At the factory all of the components for each dwelling were loaded on a specially designed truck trailer and delivered to the building site, where company-trained builders erected the dwelling following the Lustron instruction manual. The company actively produced Lustron houses between April 1949 and June 1950. In Kansas Lustrons sold for around \$10,000. Dan Brack, the Great Bend dealer who built the Woelk's Lustron, sold the two bedroom Westchester Deluxe for \$10,500 (Puckett 2000). Stradlund targeted Lustron sales to middle-class, baby boom families. He hoped that these families, like the Woelks, would be attracted to the modern conveniences and low maintenance offered by the Lustron. However, sales of Lustron homes never exceeded 250 units per month, far short of the 17,000 units per month that the company promised. The RFC filed foreclosure in March of 1950, and the company ceased production in June of that year having shipped fewer than 2500 of these unique all-steel dwellings nationwide.

SITE HISTORY

Richard D. and Marva Beth Woelk purchased Lot 3, Block 5 in the Theron Addition in June 1949, and likely contracted with Great Bend Lustron dealer Dan Brack to build their two bedroom Westchester Deluxe that year. The Woelks only owned the property for two years, selling it in March 1951 to E.D. Bradstreet. Mr. Bradstreet and his wife, Edna, sold the property eighteen months later to George W. and Patricia Holland.

The Hollands were typical of the baby-boom families to whom Stradlund marketed the modern Lustron. George Holland was an attorney with the firm Holland Thompson and Holland as well as director of the Russell State Bank. Patricia Holland was a secretary and homemaker. This was the Holland's first home and they did not own a lot of furniture at the time, so they especially appreciated the many built in features as well as the Lustron's easy

NATIONAL REGISTER OF HISTORIC PLACES CONTINUATION SHEET

Woelk House Clark County, Kansas

maintenance. They felt the Lustron was a good deal for the price and "ahead of its time" in terms of its design. However, as other owners found, Mrs. Holland did not like the combination dishwasher/washing machine. The Hollands also found that the dwelling retained heat, and installed window air conditioners. Shortly before their second child was born, the Hollands sold the Lustron and moved to a larger dwelling (Holland 2000).

The Hollands lived in the Lustron for seven years before selling it to Elmer and Leona Sauers. The Sauers owned the property for nearly twenty years. They sold it to the current owners, Bobby and Lorraine Schultz, in April 1977. The Schultzes have used the residence as rental property since acquiring it (Russell County Deed Records 66:606; 69:333; 74:124; 97:463; ConSurvey 1955; Puckett 2000).
