National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

DESCRIPTION

Located on Sellars Street, formerly Main Street, at the point where it crosses the Silver Smith Branch, the Main Street Bridge is of the closed-spandrel stone-masonry arch type. The bridge is a single span bridge constructed of locally quarried stone. The bridge's total length is 19 feet with a width of approximately 20 feet. The arch is constructed entirely of stone, as is the deck with its dirt and gravel surface. The bridge was constructed in two sections, with the south portion being completed first. The bridge has not been altered since its construction in 1922.

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- ☐ **A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- ☐ **B** Property is associated with the lives of persons significant in our past.
- ☒ **C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- ☐ **D** Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply.)

Property is:

- ☐ **A** owned by a religious institution or used for religious purposes.
- ☐ **B** removed from its original location.
- ☐ **C** birthplace or grave of a historical figure of outstanding importance.
- ☐ **D** a cemetery.
- ☐ **E** a reconstructed building, object, or structure.
- ☐ **F** a commemorative property
- ☐ **G** less than 50 years of age or achieved significance within the past 50 years.

Continuation Sheet

Section number 8 Page 1

SUMMARY

Constructed in 1922, the Main Street Bridge over Silver Smith Branch in New Blaine, Arkansas, is being nominated to the National Register of Historic Places with **local significance** under **Criterion C** as the best example of a stone masonry bridge in the town and surrounding area. It is being submitted under the multiple property listing "**Architectural Resources of New Blaine, Arkansas**" in conjunction with the historic context "**History and Architecture of New Blaine, Arkansas: 1920-1940**".

ELABORATION

The Main Street Bridge is located on Sellars Street in New Blaine, Arkansas. The bridge spans Silver Smith Branch. The branch gets its name from a gentleman named Smith who came to the area to prospect for silver. After having some luck in the branch's water, he set up a small business selling silver bracelets and spoons. The branch took on the name Silver Smith Branch after Mr. Smith started his business.

When the bridge was built Sellars Street was Main Street, hence the bridge's name. The bridge was built in 1922 as the town of New Blaine was beginning to flourish. A wood bridge had crossed Silver Smith Branch, but as the commercial area began to thrive with the arrival of the railroad, the townspeople saw the need for a more durable bridge to handle the increased flow of people and goods to and from the depot.

Local stonemasons Steve Robinson and Freeborn Lasater constructed the bridge under the supervision of Aaron Moore. The bridge was constructed in two phases. The south half was completed first, then the wood bridge was removed and the north half of the stone bridge was then completed. The bridge was the primary route of entry into the town's commercial area and depot.

The bridge has continuously been used since its construction in 1922. It has survived both time and nature. In 1927 the railroad was disabled when floodwaters destroyed the nearby trestle. The stone bridge was unharmed by the raging waters.

Today, the Logan County Road Department maintains the bridge. Although traffic over the bridge has dramatically decreased since the town's heyday in the 1920s, the bridge still performs a vital task to those who live in the former commercial area of New Blaine.

Statement of Significance

Constructed in 1922, the Main Street Bridge over Silver Smith Branch in New Blaine, Arkansas, is being nominated to the National Register of Historic Places with **local significance** under **Criterion C** as the best example of a stone masonry bridge in the town and surrounding area. It is being submitted under the multiple property listing "**Architectural Resources of New Blaine, Arkansas**" in conjunction with the historic context "**History and Architecture of New Blaine, Arkansas: 1920-1940**".
