National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word process, or computer, to complete all items.

1. Name of Property

historic name Takoma Avenue Historic District
other names M:36-51

2. Location

street & number 7906, 7908, 7910, 7912, 7914 Takoma Avenue not for publication
city or town Takoma Park/Silver Spring vicinity
state Maryland code MD county Montgomery code 031 zip code 20910

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1966, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments).

Section 7 Page 2

Description Summary:

The Takoma Avenue Historic District consists of five single-family dwellings, properties number 7906, 7908, 7910, 7912, and 7914, on the northwest side of Takoma Avenue on the border of Takoma Park and Silver Spring in Montgomery County, Maryland. All five houses were constructed in 1951, are identical in their layout and construction, and were designed by Charles M. Goodman. In Goodman's parlance, the house was titled Unit House No. 1-2L (presumably, Unit No. 1 with two levels). The houses sit on the border of the railroad suburb of Takoma Park (one house is technically within the suburb while the other four are just over the line in Silver Spring), just to the north of the Takoma Park Historic District, which is both a local and National Register historic district. The area immediately surrounding the Goodman houses was primarily developed between the 1910s and 1940s with two-story Colonials, Cape Cods, and bungalows. The street pattern is a modified grid. Mature trees line the streets.

Architectural Description

The architect Charles M. Goodman pioneered the development of Contemporary housing for single-family residences in metropolitan Washington in the post-World War II period. When other architects were designing traditional Colonial Revival houses, Cape Cods, ranches, and basic split-levels, Goodman was inventing wood, used brick, and glass boxes that nestled into the landscape and defined Washington's version of "Contemporary" architecture. Goodman's work was well-known at the time as being progressive in its approach. His houses were featured prominently in all of the shelter magazines of his day.

Exterior

The houses on Takoma Avenue, some of Goodman's earliest work in Montgomery County, exhibit signature features of Charles M. Goodman's design credo: angled or "skew" siting on their lots, the actual placement of the houses within the lot to conform to topography, the interesting juxtaposition of a variety of materials (brick, wood, plywood, and glass), and a preponderance of glass to provide a connection between the interior and exterior environments.

Goodman's designs were noteworthy for making a small house seem quite spacious by employing an open plan and large expanses of glass that reached out to incorporate the outdoors. The Takoma Avenue houses follow Goodman's "Unit House No. 1-2L" plan, comprising a brick-veneered ground-level mass set up as a base for a framed first-floor block that cantilevered out over it on two sides. The light-filled house was set into the landscape in such a way that the ground floor had some excavated, finished space and some crawl space. Poured concrete steps led up from street level to a first-level side entry, the door of which was recessed under an overhanging roof and featured an exterior planting bed. Four of the five

houses have enclosed this porch using transparent materials (windows, sliding glass doors, etc.) in order to gain more interior space. Since these alterations do not obscure the original recessed entry area and are reversible in nature, the overall integrity of the houses is not compromised in a significant way. Windows were a combination of steel casements and wood-framed “view walls” of plate glass.

The kitchen and living/dining room zone took up the back end of the house while the bathroom and three bedrooms occupied the street end. The rear living/dining room wall featured a striking exposed-frame end wall that was almost entirely glazed except for a door. The bedroom zone’s elevation – the end-gable street side – featured vertical tongue-and-groove wood siding with a center infill component of fixed glass, steel casements, and plywood panels. Goodman’s sensitivity to issues of siting and privacy are evident in that the street elevation typically featured more solids and fewer voids, whereas the non-street elevations – the more private part of the house – were almost entirely glass.¹

As with most Goodman houses of the period, the original roofing material was built-up tar and gravel. All five of the houses now employ asphalt shingle, a material Goodman used in many of his designs from the late 1950s. The roofs were vented through circular vent holes in the side overhanging eaves. The front and rear end gables featured only two small vents. The houses featured Goodman’s typical 4”x 4” metal box gutters.

Interior

The Takoma Avenue houses exhibit the “open floor plan” that was characteristic of all of Goodman’s work. The open floor plan was primarily used in the postwar Contemporary idiom as a means of providing more flexibility for the American family. It facilitated a more casual style of living, and responded to the changing status of women by integrating the kitchen area into the activities of the household. In addition, Goodman was well known for making the most out of small spaces. The Takoma Avenue houses exhibit his trademark tools for accomplishing this, including using ceilings that matched rooflines, having short hallways, and siting windows across from bedroom doors for more expansive sight lines.

The square-shaped living/dining room had a plastered “cathedral” ceiling that matched the roofline. The living/dining room was separated from the kitchen by a varnished tongue-and-groove knotty-pine wall that was left open near the window wall, providing an opening between the kitchen and the dining area. The kitchen featured metal cupboards with chrome pulls manufactured by Amerock. Above the cabinets were Masonite sliding cupboards mounted close to the ceiling.

The typical excavated area on the ground floor contained a narrow recreation room with floor-to-ceiling triple windows on the street side, plus laundry and heater rooms. The flooring was asphalt tile.

¹ This principle is evident elsewhere in Goodman’s work, e. g. in the Wheatoncrest subdivision (see MPDF).

Section 7 Page 4

The large single bath featured a counter that ran the length of the room and incorporated a single sink. A window that spanned the distance from the ceiling to the countertop was located to the right of the basin. The gray ceramic-tile floor was laid in a basketweave pattern while the walls feature standard square gray ceramic tiles.

The Takoma Avenue houses generally retain a good level of integrity. Where alterations have occurred, most of the changes are reversible, or utilize compatible substitute materials. Typical changes include the enclosure of porches with windows and glass doors, and the replacement of double-casement steel windows with single-casement metal or wood-based windows. In one house, a rear addition has obscured the original exposed-frame glass wall, but this situation is reversible. These changes do not affect the properties' ability to meet the registration requirements specified in the associated Multiple Property Documentation Form.

The following table lists the properties within the Takoma Avenue Historic District:

Address	Date of Construction	Architect	Builder Co.	Builder Name	Contributing (Y or N)
7906 Takoma Avenue	1951	Charles M. Goodman	Twin Construction Company	Albert Abramson	Y
7908 Takoma Avenue	1952	Charles M. Goodman	Twin Construction Company	Albert Abramson	Y

7912 Takoma Avenue	1952	Charles M. Goodman	Twin Construction Company	Albert Abramson	Y
7914 Takoma Avenue	1952	Charles M. Goodman	Twin Construction Company	Albert Abramson	Y

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A** Property is associated with events that have made a significant contribution to the broad pattern of our history.
- B** Property associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

Significance Summary

The Takoma Avenue Historic District is eligible for the National Register of Historic Places under Criterion C because its component properties meet the registration requirements for Merchant Builder Houses specified in the Multiple Property Documentation Form "Subdivisions and Architecture Planned and Designed by Charles M. Goodman Associates in Montgomery County, Maryland" (Section F, pp. 125-126). The houses at 7906-7914 Takoma Avenue retain integrity of location, design, materials, setting, and association, and are good representative examples of their type.

History and Context

The houses at 7906-7914 Takoma Avenue represent the Contemporary idiom in architecture as practiced by Charles M. Goodman in the Washington, DC area in the post-World War II period.¹ Goodman was one of a small group of American architects whose work propelled the Contemporary vocabulary onto the national scene. In addition, he played a primary role, nationally, in incorporating the trained architect into the merchant-builder housing process.

In a metropolitan region known for its architectural nostalgia, the houses on Takoma Avenue represent an avant-garde architectural statement. With their cantilevered, glazed first stories perched above the ground-floor used-brick box, these houses are strikingly distinct from the small Cape Cods, bungalows, and Colonial Revival houses in their immediate environs. The Takoma Avenue Historic District meets National Register Criterion C for its association with the architecture of the American Contemporary movement, especially as it was developed in the mid-Atlantic region by Charles Goodman. The exteriors of the Takoma Avenue houses exhibit the features that make Goodman residences so distinctive: extensive use of glass, exposed window frames as structure, expanses of used brick, innovative positioning of the house on its lot, and lack of superfluous trim. Inside, the houses feature open and flexible floor plans, handled in a subtle way to expand the sense of space and volume. As one homeowner said, "If you can see straight through from front to the garden in back, it must be a Goodman."

Charles M. Goodman is increasingly recognized as a pioneering and innovative architect of the post-World War II period who, in addition to other accomplishments, brought affordable, Contemporary housing in naturalistic settings to middle-income people. The full extent of Goodman's legacy, particularly in Montgomery County, Maryland, is described in the National Register Multiple Property Documentation Form titled "Subdivisions and Architecture Planned and Designed by Charles M. Goodman Associates in Montgomery County, Maryland." This nomination has been developed by the Maryland-National Capital Park and Planning Commission,

¹ Refer to MPDF pp. 1-2 for discussion of the use of the term "Contemporary" by Goodman and his contemporaries, and its relationship to the larger Modern Movement.

Section 8 Page 3

Montgomery County Department of Park and Planning, Montgomery County Historic Preservation Section by Elizabeth Jo Lampl (October 2003).

Early Origins of Takoma Park

As described in the Takoma Park Amendment to the Montgomery County Master Plan for Historic Preservation:

Takoma Park is historically significant as both an early railroad suburb and a streetcar community. It was one of the earliest railroad suburbs of Washington – second after Linden was established in 1873. The community was given new lifeblood in the early-20th century with the opening of streetcar lines, which led to the development of new subdivisions in Takoma Park. . . . In 1883, Benjamin Franklin Gilbert, a Washington real estate promoter, purchased a 90-acre farm for the establishment of Takoma Park. Gilbert promoted the healthy quality of Takoma Park’s natural environment – fresh water, trees, and a high elevation to escape the malaria-ridden District of Columbia. Gilbert’s choice of names emphasized the natural setting. He initially called the community “Takoma,” based on a Native American word meaning “exalted” or “near heaven.” Later he added the “Park” appellation to draw attention to its healthy environment. He named the streets for trees which grew in the area, including Chestnut, Hickory, Holly, and Oak.

The first streetcar line in Takoma Park, operated by the Baltimore and Washington Transit Company, opened in 1897. The establishment of this line, in addition to the Washington and Maryland line (1910-27) led to the creation of eight additional subdivisions extending out from the trolley lines. By 1922, the population had soared to 4,144, making Takoma Park the tenth largest incorporated town in Maryland. . . . Among the streets which developed during the 1910s and 1920s in response to the establishment of streetcar lines are Willow, Park, Philadelphia, and Carroll Avenues. Scores of bungalow- and Craftsman-style houses and catalog-order houses were built in this era.²

Section 8 Page 4

In 1951, Benjamin Abramson, his son Albert Abramson, and Albert's brother-in-law Oscar Margulies bought a parcel of land on the northwest side of Takoma Avenue between Boston and Richmond Avenues at the Takoma Park/Silver Spring line. The plat shows that the owners had purchased 13 lots in Block 67 of the T.P.L.&T. Co. (Takoma Park Land and Trust Company) Subdivision of Takoma Park, Maryland. The three owners had bought the land from Friends House, Inc. in June 1951 and wanted to erect Contemporary houses on the site. One month later, Charles M. Goodman completed a set of drawings for a 3-bedroom Unit House for Albert Abramson.

In Goodman's parlance, the house was titled Unit House No. 1-2L (presumably, Unit House No. 1 with two levels). It was designed for the Twin Construction Company. The five houses were constructed on Takoma Avenue according to his design in 1951 and 1952. They are reminiscent of some of the houses Goodman built in Hollin Hills, in their use of a cantilevered upper floor.

On April 20, 1952, the *Washington Post* real estate section featured an advertisement on the houses, calling them "Terrace Homes for Modern Living." The Twin Construction Co. was identified as the builder, and Colonial Investments of Washington DC was the real estate agency. The advertisement promoted the houses as being located within a five-block walk to shopping in Silver Spring, and close to good schools.
