Summit County Hist. Soc.

27. Other Surveys in Which Included
included in "Ohio & Erie Canal historic civil engineering landmark, Ohio Council ASCE

Approx. Acreage: less than 1

28. No. of Stories

29. Basement? Yes No

30. Foundation Material

31. Wall Construction
load-bearing masonry

32. Roof Type & Material

33. No. of Bays Front _____ Side _____

34. Wall Treatment
cut stone/concrete

35. Plan Shape rectangle

36. Changes (Explain in #42) Addition Altered Moved

37. Condition ~~xxxx~~ fair

38. Preservation Underway? Yes No

39. Endangered? By What? Yes No

40. Visible from Public Road? Yes No

41. Distance from and Frontage on Road

42. Further Description of Important Features

Lock is standard mitered gate type. The lock chamber is 90 feet long by 15 feet wide. The cut sandstone construction was repaired with concrete c. 1905. Both gates are missing. There is water in the lock chamber. The remains of the feeder dam, also of cut stone, are adjacent to the canal lock.

43. History and Significance

One of two feeder dams on the Ohio & Erie Canal between Summit Lake and Cleveland (the other is at Lock No. 36). The dam was built across the Cuyahoga River to raise the water level sufficiently to allow a spillway to flow from the river to the canal and furnish the necessary water. The feeder dam

44. Description of Environment and Outbuildings

located in a secluded area between the Cuyahoga River on the west and a steep hillside to the east. Accessible only on foot. There is wildlife present.

45. Sources of Information

Fred W. Bishop, "Feeder Lock," Greater Brecksville News, 9 March 1945.

Canal Society of Ohio, Towpaths, Sesquicentennial Issue No 1: 150 Years of Ohio's Canals, 1825-1975 (n.p., 1975) p.7.
