The George W. Lackey House is a two-story, wood frame vernacular residence. Its gable roof shelters an "L"-shaped plan and a shed roof, single story porch wraps around the eastern and southern elevations inside the "L". It rests upon a continuous stone foundation.

Elaboration

The George W. Lackey House is a two-story, wood frame vernacular residence with early Craftsman details. Its gable roof shelters an "L"-shaped plan with a shed roof, single story porch wrap around porch on the eastern and southern elevations inside the "L" and a rear shed roof section with a gabled bay. It rests upon a continuous stone foundation. Two brick chimneys rise through the roof: one through the ridge in the center of the western section and the other through the ridge of the eastern section near the eastern gable end wall. The cornices throughout are decorated with exposed rafters. The house is roofed with composition shingles, sheathed with weatherboard and supported by a continuous cut stone foundation and cellar.

The southern elevation is composed of the inside walls of the two intersecting gabled elements. It is lighted throughout by one-over-one wood sash windows and entered through two single-leaf doors, one in the center of each section. A gable roof balcony projects from the eastern section and is placed directly above the entry below. The gable end features a single story, three-sided window bay. The shed roof, single story porch runs along both walls and continues around the eastern gable end. It is supported by round, wood Craftsman columns that rest upon stone piers. It terminates at the shed roof section which runs along the northern or rear elevation of the house and shelters a single-leaf doorway in the shed's southern wall. The eastern elevation is fenestrated by two one-over-one wood sash windows in the second story and two one-over-one wood sash windows in the northern shed.

The second story of the northern elevation is lighted with a one-over-one wood sash window to the east and a smaller window to the west, next to the projecting gable roof. The first story is lighted with two identical windows to the east of the gable end and another off-center in the gable end. A recessed, single story corner porch completes the elevation.

The western elevation features the recessed porch to the north, in the side of the rear gable roof section, and the flat wall of the western, two-story section of the house to the south. The recessed porch protects two two-over-two wood sash windows and a single-leaf entry. The wall to the south is lighted with four evenly-spaced one-over-one wood sash windows on each story.

The interior retains a stained wood, panelled mantelpiece, painted panel doors and a stair which features a turned balustrade and box newel posts. Some original hardware also survives.

The George W. Lackey House remains virtually unaltered since 1915, when George Lackey purchased a single story, wood frame residence and added the second floor, which resulted in the house as it appears today. Some alterations have taken place inside, but much of the original interior detail remains.

MAY 17 1990

National Register of Historic Places
Continuation SheetSection number 8 Page 1Summary

The George W. Lackey House is the property in Mountain View most closely associated with George W. Lackey, who served the local community as a prosperous businessman, mayor, school teacher and principal, and secretary of the school board.

Elaboration

In 1893 an application was made to the county to build and operate a private school, to be known as the Stone County Academy. A two story, frame school building was erected, but an inspection of the structure by directors from the stock company which had financed its erection discovered flaws in both the foundation and the flue which rendered the entire building unacceptable. The building was then sold at auction for \$731.21 and purchased by a committee of citizens committed to the establishment of a public school which would be both free and tuition (tuition being charged to students who attended from other communities). The new school (also called the Stone County Academy) offered courses of instruction in Greek, Latin and Philosophy in addition to the standard curriculum. The Stone County Academy attracted students from around the state, and the student population sometimes numbered more than one hundred. The professed mission of the school was to prepare students for matriculation at the University of Arkansas and other "lesser" state colleges of the day.

George W. Lackey was born in Izard County in 1874 came to Mountain View by the turn of the century, as he accepted a teacher/associated principal position at the Stone County Academy by 1901. He resigned this position in 1905 to enter into one-third partnership as part of the established mercantile firm of Brentley & McCurry of Mountain View. Within three years he had acquired sole ownership of the concern. He operated this concern in the first building until 1924, when his fortunes improved to the point that he could construct a new mercantile building, the Lackey General Merchandise and Warehouse (NR-listed 9/85). This building housed the largest mercantile business in the county for many years. Lackey later expanded his operations to include an automobile dealership, the Lackey Motor Company, which was the first such dealership in Stone County. Lackey added a new stone building to the 1924 structure for the sole purpose of housing this new enterprise.

George Lackey was also active in civic and social activities, having served as mayor of Mountain View during the growth of his business activities and as the secretary of the Mountain View school board. He was also active in the local chapter of Odd Fellows for many years.

The George W. Lackey House as it appears today is the direct reflection of the success and stature which Lackey both enjoyed and desired to project. Within ten years after he left his career in education and entered into business he had prospered to the point that he could add an entire second story to the original single story house. Albert Copeland, a local carpenter, performed the remodeling, and Bill Laroe, the stonemason who built many of the stone buildings in Mountain View, executed all the stone work. At that time he also added the wrap-around porch with its enclosed room to the rear which was constructed to house the Delco light system. The cellar was insulated with sawdust so as to serve the family as a refrigerator: butter, milk, canned fruits and vegetables from the family garden were all stored here. In 1937 the old cellar was replaced by a storm cellar which was furnished with benches and cushions for use in the event of a storm. Finally, the rear, recessed porch was latticed to screen the family well from view from the street and later an electric pump was installed.

As it stands today the George W. Lackey House is the building in Mountain View most closely associated with the various contributions made by George Lackey to the community during the entire span of his active life.

Reviewer's Comments

This nomination was submitted as previous additions to early multiple property (actually a multiple resource area) nomination forms. Originally, individual properties submitted under the "umbrella" of the multiple property forms were documented in varying formats (for example, on state inventory forms, with differing data elements, etc). This National Register policy was changed in 1988, to a different approach where individual properties were documented on individual nomination forms and the overall cover nomination was submitted on a specially designated form.

The National Register granted a few exemptions to SHPOs for specific individual property nominations which were in preparation at the time of the changeover to the new form. These nominations were accepted in the old format. The nomination for the George Lackey House was not one of these as far as our records show. Therefore, we request that you prepare an individual form nomination for this property. This is important because much of the data now required is not available on the nomination form as submitted.

As part of that, please complete the following information:

The documentation for the Lackey House does not make clear which Criterion the property is being nominated under, nor the area of significance for the property. It appears that the property is significant under Criterion B with areas related to Social History or Commerce. Is this correct?

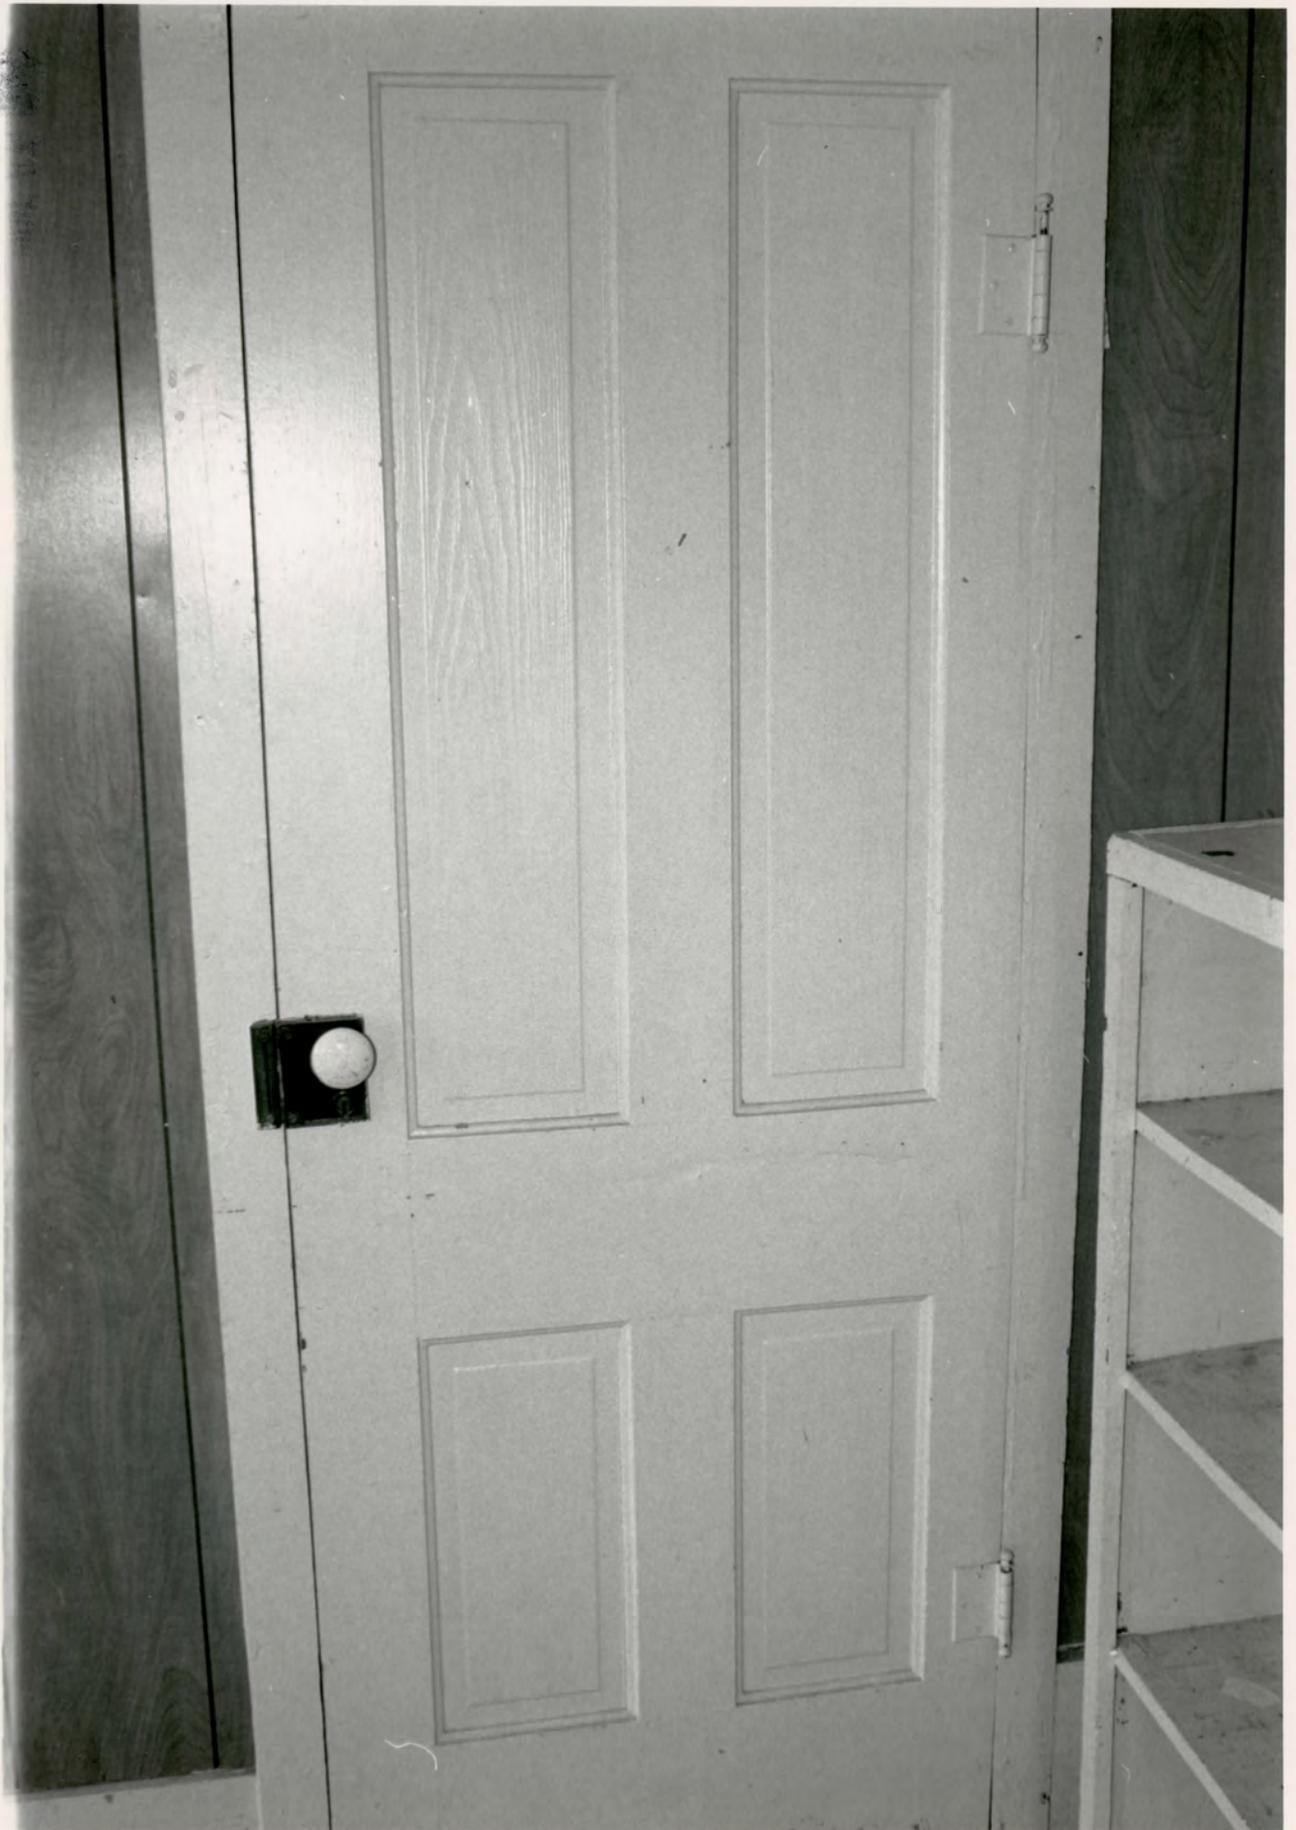

In addition, it seems that the current use of the property is as a gift shop, rather than a residence. Is this correct?

Please contact our staff should you have any additional questions.

RE: George W. Lackey House
Mountain View, Stone County

Dear Carol:

We are enclosing for your review the nomination for the George W. Lackey House. The Arkansas Historic Preservation Program has complied with all applicable nominating procedures and notification requirements in the nomination process.

Please note that the format for this amendment is the same as that which we have used previously in amending this nomination.

Thank you for your consideration in this matter.

Sincerely,

Cathy Buford

Summary

The George W. Lackey House is a two-story, wood frame vernacular residence. Its gable roof shelters an "L"-shaped plan and a shed roof, single story porch wraps around the eastern and southern elevations inside the "L". It rests upon a continuous stone foundation.

Elaboration

The George W. Lackey House is a two-story, wood frame vernacular residence with early Craftsman details. Its gable roof shelters an "L"-shaped plan with a shed roof, single story porch wrap around porch on the eastern and southern elevations inside the "L" and a rear shed roof section with a gabled bay. It rests upon a continuous stone foundation. Two brick chimneys rise through the roof: one through the ridge in the center of the western section and the other through the ridge of the eastern section near the eastern gable end wall. The cornices throughout are decorated with exposed rafters. The house is roofed with composition shingles, sheathed with weatherboard and supported by a continuous cut stone foundation and cellar.

The southern elevation is composed of the inside walls of the two intersecting gabled elements. It is lighted throughout by one-over-one wood sash windows and entered through two single-leaf doors, one in the center of each section. A gable roof balcony projects from the eastern section and is placed directly above the entry below. The gable end features a single story, three-sided window bay. The shed roof, single story porch runs along both walls and continues around the eastern gable end. It is supported by round, wood Craftsman columns that rest upon stone piers. It terminates at the shed roof section which runs along the northern or rear elevation of the house and shelters a single-leaf doorway in the shed's southern wall. The eastern elevation is fenestrated by two one-over-one wood sash windows in the second story and two one-over-one wood sash windows in the northern shed.

The second story of the northern elevation is lighted with a one-over-one wood sash window to the east and a smaller window to the west, next to the projecting gable roof. The first story is lighted with two identical windows to the east of the gable end and another off-center in the gable end. A recessed, single story corner porch completes the elevation.

The western elevation features the recessed porch to the north, in the side of the rear gable roof section, and the flat wall of the western, two-story section of the house to the south. The recessed porch protects two two-over-two wood sash windows and a single-leaf entry. The wall to the south is lighted with four evenly-spaced one-over-one wood sash windows on each story.

The interior retains a stained wood, panelled mantelpiece, painted panel doors and a stair which features a turned balustrade and box newel posts. Some original hardware also survives.

The George W. Lackey House remains virtually unaltered since 1915, when George Lackey purchased a single story, wood frame residence and added the second floor, which resulted in the house as it appears today. Some alterations have taken place inside, but much of the original interior detail remains.

Summary

The George W. Lackey House is the property in Mountain View most closely associated with George W. Lackey, who served the local community as a prosperous businessman, mayor, school teacher and principal, and secretary of the school board.

Elaboration

In 1893 an application was made to the county to build and operate a private school, to be known as the Stone County Academy. A two story, frame school building was erected, but an inspection of the structure by directors from the stock company which had financed its erection discovered flaws in both the foundation and the flue which rendered the entire building unacceptable. The building was then sold at auction for \$731.21 and purchased by a committee of citizens committed to the establishment of a public school which would be both free and tuition (tuition being charged to students who attended from other communities). The new school (also called the Stone County Academy) offered courses of instruction in Greek, Latin and Philosophy in addition to the standard curriculum. The Stone County Academy attracted students from around the state, and the student population sometimes numbered more than one hundred. The professed mission of the school was to prepare students for matriculation at the University of Arkansas and other "lesser" state colleges of the day.

George W. Lackey was born in IZARD County in 1874 came to Mountain View by the turn of the century, as he accepted a teacher/associated principal position at the Stone County Academy by 1901. He resigned this position in 1905 to enter into one-third partnership as part of the established mercantile firm of Brentley & McCurry of Mountain View. Within three years he had acquired sole ownership of the concern. He operated this concern in the first building until 1924, when his fortunes improved to the point that he could construct a new mercantile building, the Lackey General Merchandise and Warehouse (NR-listed 9/85). This building housed the largest mercantile business in the county for many years. Lackey later expanded his operations to include an automobile dealership, the Lackey Motor Company, which was the first such dealership in Stone County. Lackey added a new stone building to the 1924 structure for the sole purpose of housing this new enterprise.

George Lackey was also active in civic and social activities, having served as mayor of Mountain View during the growth of his business activities and as the secretary of the Mountain View school board. He was also active in the local chapter of Odd Fellows for many years.

The George W. Lackey House as it appears today is the direct reflection of the success and stature which Lackey both enjoyed and desired to project. Within ten years after he left his career in education and entered into business he had prospered to the point that he could add an entire second story to the original single story house. Albert Copeland, a local carpenter, performed the remodeling, and Bill Laroe, the stonemason who built many of the stone buildings in Mountain View, executed all the stone work. At that time he also added the wrap-around porch with its enclosed room to the rear which was constructed to house the Delco light system. The cellar was insulated with sawdust so as to serve the family as a refrigerator: butter, milk, canned fruits and vegetables from the family garden were all stored here. In 1937 the old cellar was replaced by a storm cellar which was furnished with benches and cushions for use in the event of a storm. Finally, the rear, recessed porch was latticed to screen the family well from view from the street and later an electric pump was installed.

As it stands today the George W. Lackey House is the building in Mountain View most closely associated with the various contributions made by George Lackey to the community during the entire span of his active life.
