---

Section 8: Applicable Criteria

93001266 Larson Bridge Codington County

Criterion C should be checked and not A to be consistent with bridge's significance in engineering for its method of construction.

Section 8: Period of Significance

93001266 Larson Bridge Codington County

Period of significance is amended to read "1917" to indicate date of construction and to be consistent with significance in engineering.

93001281 Red Shirt Bridge Custer County

Period of significance is amended to read "1943-1944" to cover the period of construction.

93001278 South Dakota Dept. of Transportation Bridge No. 12-503-230  
Faulk County

Due to typographical error, period of significance is corrected to read " 1920-1943."

93001265 South Dakota Dept. of Transportation Bridge No. 15-210-136  
Codington County

Period of significance is amended to read "1917" since significance is under criterion C in engineering and the date of construction should be entered.

National Park Service

National Register of Historic Places  
Continuation Sheet

Section number 3 Page 5

---

93001262 South Dakota Dept. of Transportation Bridge No. 25-380-  
142 Faulk County

Period of significance is amended to read "1902" because the area of significance is engineering and the period of significance should be based on the date of construction. The bridge was moved from its original site in 1955.

Section 8: Date of Significance

93001308 Eighth Street Bridge Minnehaha County

"1977" is deleted because the date lies outside the period of significance.

93001317 Hall Bridge Spink County

"1904" is deleted because bridge is significant under criterion C for engineering and the move in 1904 falls outside the period of significance which is based on the date of construction and does not appear to have particular importance.

93001286 South Dakota Dept. of Transportation Bridge No. 20-153-  
210 Deuel County

"1960" is deleted because the date lies outside the period of significance.

93001262 South Dakota Dept. of Transportation Bridge No. 25-380-  
142 Faulk County

"1955" is deleted because the date lies outside the period of significance.

93001302 South Dakota Dept. of Transportation Bridge No. 44-212-  
090 McCook County

"1960" is deleted because the date lies outside the period of significance.

---

93001267 South Dakota Dept. of Transportation Bridge No. 50-200-  
035 Minnehaha County

"1935" is deleted because the date lies outside the period of significance which is based on the date of construction.

93001311 South Dakota Dept. of Transportation Bridge No. 56-117-  
123 Sanborn County

"1905" is deleted because the date lies outside the period of significance and does not appear to have particular importance.

-----

Melissa Dirr, architectural historian, of the South Dakota State Historic Preservation Office was notified of the above-mentioned amendments by telephone on December 09, 1993.

\_\_\_ See continuation sheet.

Verbal Boundary Description: \_\_\_ See continuation sheet.

The nominated property consists of a rectangle, 23 feet wide by 101 feet long, whose vertices coincide with the outside corners of the bridge abutments at each end of the bridge, and includes only the bridge superstructure and substructure.

Boundary Justification: \_\_\_ See continuation sheet.

Because the bridge is located on a public road, there are no legal boundary lines for the ends of the bridge. Therefore, these boundaries are drawn to encompass only the superstructure and substructure of the bridge itself.

Section number 7

Bridge No. 58-062-270

Page 6

=====  
Bridge no. 58-062-270 is located 1 mile south and 2.8 miles west of Redfield and carries a local road over Turtle Creek. This single-span, 96-foot riveted steel Warren pony truss bridge rests on concrete abutment with wing walls. The superstructure is composed as follows: the polygonal upper chords consist of two channel sections riveted with a continuous steel cover plate along the upper flanges and with batten plates along the lower flanges; the lower chords consist of two channel sections riveted with batten plates; the vertical members consist of two angle sections riveted with batten plates. The diagonal members have three structural variants which from the ends to the center of the bridge are as follows: two diagonals each consisting of two angle sections riveted with batten plates; and two diagonals each consisting of two angle sections and alternating with a single diagonal consisting of two channel section riveted with batten plates. The vaulted corrugated steel deck has a gravel wearing surface and is supported by steel I-beam stringers which rest atop I-beam floor beams. The floor beams are riveted to gusset plates suspended below the lower chord. Angle section cross-braces provide bottom lateral bracing. The railings along each side of the bridge are formed by three angle sections.

The bridge retains excellent integrity.

United States Department of the Interior  
National Park Service

NATIONAL REGISTER OF HISTORIC PLACES  
CONTINUATION SHEET

Section number 8 & 9 Bridge No. 58-062-270 Page 7  
=====

8. Significance

Bridge no. 58-062-270 is being nominated to the National Register of Historic Places as part of the "Historic Bridges in South Dakota" Multiple Property Nomination. It is related to the historic context of "Historic Bridges in South Dakota, 1893-1942" and is classified with the associated property type for iron and steel frame bridges. This bridge is individually eligible for the National Register under Criterion C as the longest riveted Warren pony truss with a polygonal upper chord in South Dakota. The bridge retains excellent integrity.

Although a bridge was recommended at this site by the County Bridge Committee in 1907 and again in 1910, it was not until November 1911 that the County Commissioners finally took action ordering it built. The Iowa Bridge Company of Des Moines had the annual contract for all bridge work in the county that year. The bridge was built in 1912.

Among the ten bridges of this type that were surveyed, Bridge No. 58-062-270 is the longest riveted Warren pony truss with a polygonal upper chord in South Dakota.
