## Significance (Indicate sources of information for all statements)

### 20. Architectural significance

- a. Key structure/individually may qualify for the National Register
- b. Contributing structure
- C. Not eligible/intrusion

## N/A

This unusual barn features a large, round central section--three stories in height--to which is attached a main-entrance section with gable roof hay dormer that projects outward to a point flush with the exterior walls of a wing shed surrounding the central section. Vertical wood siding clads the upper exterior walls.

Common Variation; Encircling Wing type.

### 21. Historical Significance

- 🖀 a. Key structure individually may qualify for the National Register
- 🗇 b. Contributing structure
- C. Not eligible/intrusion

Variations of the true-round barn were common in lowa during the peak years for construction of round barns, 1910-1920, and reveal the great diversity and personal expression found in this thematic group. The source of inspiration for this three story barn with encicling wing shed is unknown, although it is known that several articles describing round barns with encicling wings were published in popular farm journals of the early 20th century.
