National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, *How to Complete the National Register of Historic Places Registration Form*. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions.

1. Name of Property

Historic name: Coachella Valley Savings & Loan Association

Other names/site number: Coachella Valley Savings #1 (preferred)

Name of related multiple property listing:

The Architecture of E. Stewart Williams

(Enter "N/A" if property is not part of a multiple property listing)

2. Location

Street & number: 383 South Palm Canyon Drive

City or town: Palm Springs State: CA County: Riverside

Not For Publication: Vicinity:

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended,

I hereby certify that this nomination X request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60.

In my opinion, the property X meets does not meet the National Register Criteria. I recommend that this property be considered significant at the following level(s) of significance:

 national statewide X local

Applicable National Register Criteria:

 A B X C D

	<u>11/7/16</u>
Jenan Saunders/Deputy State Historic Preservation Officer	Date
<u>California State Office of Historic Preservation</u>	
State or Federal agency/bureau or Tribal Government	

In my opinion, the property <u> </u> meets <u> </u> does not meet the National Register criteria.

Narrative Description

(Describe the historic and current physical appearance and condition of the property. Describe contributing and noncontributing resources if applicable. Begin with a **summary paragraph** that briefly describes the general characteristics of the property, such as its location, type, style, method of construction, setting, size, and significant features. Indicate whether the property has historic integrity.)

Summary Paragraph

Coachella Valley Savings & Loan Association #1 (CVS #1) is located on the west side of South Palm Canyon Drive between West Baristo and West Ramon Roads at the north end of the Palm Springs banking district. Designed by E. Stewart Williams and completed in 1956, the two story with mezzanine International Style steel-framed, reinforced concrete building was clearly influenced by Le Corbusier's Villa Savoye in France. The building appears as a rectangular box of painted white stucco floating above a wide driveway and a small lobby. It is raised on piloti to create a covered driveway with parking spaces beneath the upper floor and around the west and south sides of the building. The east elevation frames a wall of glass with aluminum mullions fronted by vertical metal louvers to control the light. The rear, west side of the building is characterized by two rows of ribbon windows sheltered by metal awnings at the second floor and mezzanine levels. Although no longer used as a bank, CVS #1 exhibits sufficient architectural integrity to convey its significance.

Narrative Description

The first bank commission that the Williams office received was for a new branch of Coachella Valley Savings & Loan Association. The lot for the new bank was located on the west side of South Palm Canyon Drive and was relatively small for the program of a reception area, teller stations, offices, conference rooms, lunch room, two vaults, and automobile parking. Stewart's

Coachella Valley Savings #1

Name of Property

Riverside, California

County and State

solution was to raise the building on piloti in creating a covered driveway with parking spaces beneath the upper floor and around the west and south sides of the building. The overall design was similar to the Villa Savoye-influenced Oasis Commercial Building that the firm had completed the previous year.¹ Of Williams' stylistic choice, architectural historian Elizabeth Edwards Harris PhD wrote, "Although Williams never directly ascribed to any particular school of modernism, the International Style did lend itself well to building in the desert. In addition, it was a style that at this time conveyed both an efficient and au courant sensibility appropriate for his first financial institution clients."²

The building's steel reinforced concrete construction allows the rectangular box to be supported primarily by slender piloti. The small glazed entry lobby with its polished concrete floor serves to welcome customers, and is primarily designed to direct them up the floating staircase to the second floor. Behind the entry lobby reception desk was a large polished steel vault with a twin vault immediately above it on the second floor. A previous owner removed the steel doors of both of these vaults and added stucco bezels to frame the openings. Native rock clads the former vaults on both floors, softening the straight lines and man-made materials of the International Style. This integration of natural materials from the local environment with modern design precepts is a hallmark of Williams' architectural philosophy.

Entering the second floor from the lobby staircase finds the customer in an enormous, double-height open space. Filling the room with light is a wall of glass with aluminum mullions on the east elevation. Apparently, it was soon discovered that the east-facing glazing provided too much interior light. In response, adjustable vertical exterior metal louvers designed by Williams were installed to cover the windows. Teller windows and offices that were on the west side of the room have since been removed and replaced by a wall of offices. Directly above, unpainted vertical wood slats enclose the mezzanine, providing a visual contrast to the smooth white walls by bringing warm natural materials into a very modern space. Behind the circular former vault, a staircase leads to the mezzanine level where a conference room and break room are located.

The rear, west side of the building differs substantially from the east elevation in that ribbon windows sheltered by metal awnings provide light to the second floor and mezzanine levels. In maintaining the illusion of a floating box, Williams cantilevered the south end over tan-colored brick cladding. The brick wraps around the south elevation to the west side where a glazed rear entrance is located. This use of unpainted brick was yet another example of Williams contrasting the white box with warmer materials.

Both CVS #1 and the Oasis Commercial Building share elements of Le Corbusier's interpretation of the International Style. However, Williams' had concluded during his European travels as a young man that pure International Style buildings could be disagreeably austere. It was therefore Williams' intention to soften and humanize modern architecture by incorporating natural materials into his designs when appropriate. For his early houses, wood and natural rock

were generously applied. For the International Style commercial buildings that he designed in the mid-1950s, Williams often introduced natural rock cladding on ground floor elevations as well as interior surfaces. It was architecture that expressed the local environment.

As relates to physical integrity, building permits document unspecified interior alterations during a remodel in 1967, a few years after Coachella Valley Savings had relocated to their new, larger Williams-designed location a few blocks south (CVS #2). In 2006, the Prudential Company as the new owner remodeled the second story interior to house its Palm Springs real estate office. Also in 2006, another owner replaced the original boiler and air conditioning machinery with contemporary equipment. No additional building permits were located by the city.

A comparison of historic and contemporary photographs demonstrates that exterior alterations have been minimal. On the interior, the removal of the vault doors on both floors has lessened the feeling of the building having been a bank. The enclosure of the teller area with offices is unfortunate. Nonetheless, this loss of integrity is not sufficient to suggest that the property is unable to convey its significance because the overall integrity of design, materials, and workmanship of the former bank, interior and exterior, remains high. In addition, location and setting have not changed. As a result, Coachella Valley Savings & Loan Association #1 is able to convey its architectural significance, retaining the characteristic physical features associated with the work of E. Stewart Williams, namely, the integration of natural materials expressing the local environment into his modern architectural designs.

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A. Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B. Property is associated with the lives of persons significant in our past.
- C. Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D. Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply.)

- A. Owned by a religious institution or used for religious purposes
- B. Removed from its original location
- C. A birthplace or grave
- D. A cemetery
- E. A reconstructed building, object, or structure
- F. A commemorative property
- G. Less than 50 years old or achieving significance within the past 50 years

Statement of Significance Summary Paragraph (Provide a summary paragraph that includes level of significance, applicable criteria, justification for the period of significance, and any applicable criteria considerations.)

Coachella Valley Savings #1 is eligible for the National Register of Historic Places under Criterion C at the local level of significance in the area of Architecture. The property embodies the distinctive characteristics of mid-century commercial architecture as interpreted by E. Stewart Williams. In addition, the property meets *The Architecture of E. Stewart Williams* Multiple Property Submission registration requirements for commercial buildings in association with the historic context “Architecture as environmental expression in the greater Coachella Valley, 1946-1976.” The period of significance corresponds with the building’s date of construction, 1956.

Narrative Statement of Significance (Provide at least **one** paragraph for each area of significance.)

Coachella Valley Savings #1 exemplifies the distinctive characteristics of the commercial buildings E. Stewart Williams designed in the mid-1950s. Specifically, Williams adapted the International Style to the environment of the Coachella Valley by integrating natural materials into the design. Consistent with the style, Williams rejects historical references with emphasis placed on form following function. The flat-roofed, steel-framed CVS #1 features a rectangular second-story volume with smooth exterior surfaces and large expanses of east facing glazing. Vertical metal louvers control the bright sunlight. Supported by piloti, the upper story shelters a driveway, parking area, and a small lobby. Fenestration at the rear, east elevation consists of two rows of ribbon windows shaded by slatted metal awnings. By cladding ground floor and second story bank vaults in natural rock sourced from nearby mountains, Williams underscores his design philosophy that modern architecture should express the local environment.

Coachella Valley Savings #1 is significant within the oeuvre of E. Stewart Williams and fits within the historic context presented in the Multiple Property Documentation Form, “Architecture as environmental expression in the greater Coachella Valley, 1946-1976.” The property is a key example of the commercial building property type that maintains sufficient integrity to be readily identifiable as the work of E. Stewart Williams. As a result, the property meets National Register Criterion C because it embodies the distinctive characteristics of commercial buildings associated with master architect E. Stewart Williams, FAIA in the mid-1950s.

Abstract/Summary Comments: The Coachella Valley Savings and Loan Association (Coachella Valley Savings No. 1) meets National Register Criterion C (Architecture) at the local level. A modest, rectangular stucco box set on slender piloti over a paved parking area, the 1956 bank presents E. Stewart Williams' earliest experiments in commercial bank design, a property type that he would continue to revisit often during his significant career. As with many of Williams' commercial designs the building has a strong International Style character with broad wall planes, substantial glazing, and little decorative ornamentation except for the inclusion of selective elements of natural stonework (vault detail). The property embodies the distinctive characteristics of master architect E. Stewart Williams' early architectural approach to commercial design in the unique conditions of Palm Springs and meets the MPS' registration requirements for commercial architecture. Owner Objection

The Architecture of E. Stewart Williams Multiple Property Submission (MPS) Imperial, Riverside, and San Bernardino Counties Staff Report

The National Park Service (NPS) introduced the Multiple Property Submission (MPS) in 1984. The purpose of the MPS is to document as a group for listing in the National Register of Historic Places (National Register) properties related by theme, general geographical area, and period of time. It may cover any geographical scale—local, regional, state, or national. It is used to register thematically related properties simultaneously and establishes the registration criteria for properties that may be nominated in the future.

Technically the MPS acts as a cover document and is not a nomination in its own right. It is a combination of the **Multiple Property Documentation Form (MPDF)** and the **Individual Registration Form**. Information common to the group of properties is presented on the Multiple Property Documentation Form, and the Individual Registration Form is specific to the nominated individual building, site, district, structure, or object. Once an MPS is listed, additional associated property nominations may be submitted to the Commission at any time.

The Architecture of E. Stewart Williams MPS has a single associated historic context: “Architecture as environmental expression in the greater Coachella Valley, 1946-1976.” Four associated property types include single family residence, commercial building, cultural institution, and educational institution. The geographic area of the MPDF includes the greater Coachella Valley of Imperial, Riverside, and San Bernardino Counties, California.

Williams’ architectural impact in the Coachella Valley is revealed in the sheer number of his built projects, in the prominence of some of his buildings, and in the respect for his work by scholars and architectural aficionados drawn to the Coachella Valley to celebrate his design legacy. The work of E. Stewart Williams helped define desert modernism in the Coachella Valley. Desert modernism is the adaptation of modern architectural concepts to the climatic extremes of the Coachella Valley while embracing the area’s unique natural setting of mountains and open vistas. Williams successfully united the warmth of natural materials with the precision of International Style Modernism in designing buildings devoted to client needs while tailored to the local setting.

A 1986 oral history project captured William’ overall design philosophy in his own words. “I always have tried to use in any building I’ve done as many natural materials and natural finishes and let the beauty of the material be the thing that you see on the finish, not covered with stucco or covered with paint. And I think that, more or less, this rule has guided me all through the years that we’ve done work here.”

In November 2014, the Palm Springs Art Museum organized the exhibition “An Eloquent Modernist: E. Stewart Williams, Architect.” It featured drawings, renderings, models,

photographs, watercolors, etchings, and film clips to provide a comprehensive overview of Williams' creative output and afforded a view of his formative role in the development of Modern architecture in Palm Springs, the Coachella Valley, and beyond. The exhibition and catalog form the basis of the contextual framework utilized in this Multiple Property Submission for understanding the significance of the architect's work.

The first twelve properties nominated under this MPS are as follows, in alphabetical order, in two groups. Letters of objection have been received from the property owners in the second group. Those nominations were heard on the Discussion and Action portion of the agenda. All nominated properties are eligible for the National Register under Criterion C in the area of Architecture, at the local level of significance.

Consent Calendar

Coachella Valley Savings #2 is a blend of International Style modernism, Classical symmetry, and sculptural monumentality. It is of steel and concrete construction engineered for both seismic safety and to provide a single enormous banking space without interior columns. Its primary elevation is symmetrically arranged with inverted arches as columns supporting the flat roof. The composition is raised above a reflecting pool with fountains, emphasizing the building's monumentality and giving the

appearance that the massive structure is floating above the water. Although the interior has been remodeled and the exterior modified for disabled access and the addition of an ATM, it retains sufficient historic and architectural integrity to convey its significance. The property embodies the distinctive characteristics of mid-century commercial architecture as interpreted by E. Stewart Williams and meets the MPS registration requirements for commercial buildings. The period of significance corresponds with the building's date of construction, 1961.

Edris Residence, designed for William and Marjorie Edris, was set amidst a boulder-strewn alluvial fan of Mt. San Jacinto in Palm Springs. The goal was to integrate as much of the natural environment into the modern design as possible. Although of steel frame construction, the exterior of the modest sized house was clad in native rock and board-and-batten Douglas fir siding. Williams employed a triangular steel truss so that the living room roof would slope upward to celebrate the magnificent view. The residence retains an exceptionally high level of integrity, perfectly exhibiting Williams' philosophy that modern design should express the natural environment in which it is located. The property embodies the distinctive characteristics of mid-century residential architecture as interpreted by E. Stewart Williams and meets the MPS registration requirements for residential buildings. The period of significance corresponds with the building's date of construction, 1954.

Kenaston Residence is located near the Thunderbird Country Club in Rancho Mirage. U-shaped in plan, the dwelling's most striking feature is a swimming pool within the "U" where a natural rock wall (the west elevation of the living room) continues below the pool surface to several feet beneath the water level. The pool is visible from most of the interior rooms and hallways. This same natural rock, which clads a portion of the exterior north elevation, softens the strict rectilinear geometry of the flat-roofed house. Consistent with Williams' architectural philosophy, the Kenaston Residence adeptly demonstrates how he integrates natural materials expressing the local environment into his modern architectural designs. The residence retains integrity despite additions to the east end of the dwelling. The property embodies the distinctive characteristics of mid-century residential architecture as interpreted by E. Stewart Williams and meets the MPS registration requirements for residential buildings. The period of significance corresponds with the building's date of construction, 1956.

Koerner Residence was designed for the Vancouver-based couple of Leon and Thea Koerner in the Deepwell neighborhood of Palm Springs. The house was placed on a flat parcel with a panoramic view of Mt. San Jacinto to the west, sharing the upswept roof of Williams' earlier Edris Residence. Floor to ceiling windows bring abundant light into the wood post-and-beam dwelling. Internal courtyards wrapped in glass enclose planting and water features. The ubiquitous swimming pool outside of the living room features a shaded resting area near the pool steps. The celebrated Los Angeles-based firm of Eckbo, Royston and Williams designed the property's landscaping, much of which remains extant. Overall, the Koerner Residence exhibits a high level of integrity. The property embodies the distinctive characteristics of mid-century residential architecture as interpreted by E. Stewart Williams and meets the MPS registration requirements for

residential buildings. The period of significance corresponds with the building's date of construction, 1955.

Palm Springs Desert Museum is situated at the foot of Mt. San Jacinto in downtown Palm Springs. This important cultural institution was completed in 1976 with a major expansion occurring in 1996. Raised above ground level, the museum building houses art galleries, natural history exhibits, and a performing arts center. A tranquil sunken garden imparts a sense of visual lightness to the overall composition. The building's design embraces the New Brutalism in its massive scale and reinforced concrete construction. Williams clad the building in a natural material—volcanic cinder—to reflect the rugged textures and colors of the mountain while producing dramatic textural effects that distinguish the museum's presence. A noncontributing resource is the freestanding Williams-designed Marks Administration Building completed in 1981 and located north of the museum. The Williams-designed second story museum addition completed in 1996 is not visible when viewed from Museum Drive because it rises from the rear half of the original building. The addition features a smooth surface with an incised grid pattern that differentiates it from the original concrete surfaces of hammered or ribbed aggregate and volcanic cinder cladding. The Palm Springs Desert Museum possesses sufficient historic and architectural integrity necessary to convey its significance. The property embodies the distinctive characteristics of E. Stewart Williams' post-1965 architectural approach to cultural institutions and meets MPS registration requirements for cultural institutions. The period of significance corresponds with the building's original date of construction, 1976. Because of its architectural distinction and monumental presence as the city's premier cultural institution, the Palm Springs Desert Museum possesses exceptional importance sufficient to meet Criteria Consideration G: Properties That Have Achieved Significance Within the Past Fifty Years.

Palm Springs Unified School District Educational Administrative Center is located on the northeast corner of the Palm Springs High School campus. Strongly influenced by the International Style, the building is of steel frame construction. Prominent steel dogleg I-beams on the primary (east) elevation and exterior steel posts on the other elevations frame the building and support the flat roof. Aluminum-framed windows and enamel spandrels are recessed beneath the roof's deep overhangs. Non-structural concrete block walls extend south and east of the building each displaying the name "PALM SPRINGS UNIFIED SCHOOL DISTRICT" in a modern metal typeface. The building is in excellent condition exhibiting sufficient historic and architectural integrity to convey its significance. A noncontributing resource is a small wood-framed temporary building just west of the Center. The property embodies the distinctive characteristics of architecture designed for educational institutions as interpreted by E. Stewart Williams in the early 1960s and meets MPS registration requirements for educational institutions. The period of significance corresponds with the building's date of construction, 1960.

Santa Fe Federal Savings and Loan Association, now the Palm Springs Art Museum Architecture & Design Center, was strongly influenced by the International Style. The one-story building is a Miesian pavilion of steel frame construction on a raised concrete pad. Full height glazing on three sides creates a delicate "jewel box" effect, especially

when illuminated at night. Load carrying steel posts are placed outside the glass walls. Perforated sliding gold anodized aluminum panels cut glare on west and east elevations. Crowning the building is a flat roof that extends beyond the glazing to mirror the cantilevered concrete floor slab below. The building was rehabilitated following the Secretary of the Interior's Standards. It exhibits sufficient historic and architectural integrity to convey its significance. The property embodies the distinctive characteristics of International Style architecture as interpreted by E. Stewart Williams for commercial buildings of the early 1960s and meets the MPS registration requirements for commercial buildings. The period of significance corresponds with the building's date of construction, 1960.

Frank Sinatra Residence was E. Stewart Williams' first residential commission in Palm Springs. The single-family desert vacation house was commissioned by Sinatra in the summer of 1946. Williams' design for a modern ranch style house won out over the Georgian Revival mansion that Sinatra had initially requested. The 4,500 square foot dwelling is of wood frame construction with a flat and shed roof, open floor plan, large expanses of glazing including sliding glass doors, and a stucco exterior finish that replaced the original redwood siding. Original window frames, glazing, entry doors, and sliding glass doors have been replaced. In addition, concrete decking instead of flagstone now surrounds the large swimming pool. Despite these alterations, the overall building exhibits sufficient historic integrity to convey its significance. The property embodies the distinctive characteristics of mid-century residential architecture as interpreted by E. Stewart Williams and meets the MPS registration requirements for residential buildings. The period of significance corresponds with the building's date of construction, 1947.

The goal for the **E. Stewart and Mari Williams Residence** was to integrate as much of the natural environment into the modern design as possible. Located on a flat parcel that had once been a portion of the El Mirador golf course, the 2,380 square foot house is of wood frame, post and beam construction with stucco and board-and-batten sheathing. With his own home Williams was able to fully realize his design philosophy of bringing the natural environment into the living space. To this end, Williams designed a butterfly roof cantilevered out over three rows of side beams. This eliminated walls so that the landscape could flow through floor-to-ceiling glazing in each room. The house is essentially a roof over a garden, a shelter for a very hard climate. The Williams Residence retains a high level of integrity, perfectly exhibiting Williams' philosophy of architecture as environmental expression. The property embodies the distinctive characteristics of mid-century residential architecture as interpreted by E. Stewart Williams and meets the MPS registration requirements for residential buildings. The period of significance corresponds with the building's date of construction, 1955.

Discussion and Action

Coachella Valley Savings #1 is located at the north end of the Palm Springs banking district. The two story with mezzanine International Style steel-framed, reinforced concrete building was clearly influenced by Le Corbusier's Villa Savoye in France. The building appears as a rectangular box of painted white stucco floating above a wide

driveway and a small lobby. It is raised on piloti to create a covered driveway with parking spaces beneath the upper floor and around the west and south sides of the building. The east elevation frames a wall of glass with aluminum mullions fronted by vertical metal louvers to control the light. The rear, west side of the building is characterized by two rows of ribbon windows sheltered by metal awnings at the second floor and mezzanine levels. Although no longer used as a bank, CVS #1 exhibits sufficient architectural integrity to convey its significance. The property embodies the distinctive characteristics of mid-century commercial architecture as interpreted by E. Stewart Williams and meets the MPS registration requirements for commercial buildings. The period of significance corresponds with the building's date of construction, 1956.

Oasis Commercial Building in the heart of downtown Palm Springs is an International Style two-story, steel-framed reinforced concrete building that was clearly influenced by Le Corbusier's Villa Savoye in France. Ground floor shops are deeply recessed beneath the projecting second story, which is supported by piloti. The upper floor contains offices and a full-width loggia facing the busy street. A pleasant courtyard centers the composition. As relates to integrity, while most of the ground floor shops have seen innumerable tenants, their storefronts and footprints have not markedly changed. The interior of the northwest portion of the building has been extensively remodeled from a former drug store to a contemporary restaurant although its façade has only been slightly altered. The overall building exhibits historic integrity sufficient to convey its significance. The noncontributing resource is the remaining tower and commercial wing of the original Oasis Hotel designed by Lloyd Wright in 1923. While clearly differentiated from the 1955 Oasis Commercial Building, the older tower is attached to the newer elevator shaft that is connected by a bridge to the commercial building. The property embodies the distinctive characteristics of mid-century commercial architecture and meets the MPS registration requirements for commercial buildings. The period of significance corresponds with the building's date of construction, 1953.

Palm Springs Aerial Tramway Mountain Station is located at an elevation of 8,516 feet within the boundaries of Mt. San Jacinto State Park. It is the upper portion of a tram system inaugurated in 1963. The mountain station is based on a Swiss chalet, with angled wings with sloping roofs and large windows to take in views. The building with its wings and outdoor terraces is fitted to the topography. The lower base of the building, including the tower that contains the tram's mechanical equipment and receives the tramway cars, is constructed of reinforced concrete. The portion of the building above the concrete base is made primarily of wood and glass. The building is in excellent condition exhibiting sufficient historic and architectural integrity to convey its significance. The property embodies the distinctive characteristics of mid-century commercial architecture and meets the MPS registration requirements for commercial buildings. The period of significance corresponds with the date construction was completed, 1963.

The MPS, including the MPDF and twelve associated properties, is nominated on behalf of a group of private individuals. In its role as representative of the City of Palm Springs,

a Certified Local Government, the Historic Site Preservation Board was advised of the nominations. Three letters of support have been received for the Multiple Property Submission and associated nominations. Additional letters of support were received specific to Palm Springs Aerial Tramway Mountain Station and Sinatra Residence. Letters of objection have been received from the owners of Coachella Valley Savings #1, Oasis Commercial Building, and Palm Springs Aerial Tramway Mountain Station. The Mountain Station nomination was updated with information about alterations provided by the property owner. Oasis Commercial Building received a second letter of objection from the owner plus two additional letters of objection.

Mount San Jacinto Winter Park Authority, owner of Palm Springs Aerial Tramway Mountain Station and governing body of Palm Springs Aerial Tramway, is a public agency and public corporation of the State of California, created by the Mount San Jacinto Winter Park Authority Act Ch.1040 of the Statutes of 1945, as amended by Ch.70 of the Statutes of 1947 and Ch.1004 of the Statutes of 1951, of the State of California.

Staff supports the Multiple Property Submission, consisting of the Multiple Property Documentation Form and twelve associated nominations, as written, and recommends the State Historical Resources Commission approve The Architecture of E. Stewart Williams MPDF, and determine that Coachella Valley Savings #1, Coachella Valley Savings #2, Edris Residence, Kenaston Residence, Koerner Residence, Oasis Commercial Building, Palm Springs Aerial Tramway Mountain Station, Palm Springs Desert Museum, Palm Springs Unified School District Educational Administrative Center, Santa Fe Federal Savings and Loan Association, Sinatra Residence, and Williams Residence meet National Register Criterion C at the local level of significance, and Palm Springs Desert Museum satisfies Criteria Consideration G. Staff recommends the State Historic Preservation Officer approve the nominations for forwarding to the National Park Service.

Sacramento, CA 95816-7100

Dear Ms. Polanco,

The Palm Springs Modern Committee (PS ModCom) is a non-profit organization dedicated to the appreciation and preservation of Desert Modern architecture and design. We accomplish this through education, advocacy for threatened buildings, promotion of heritage tourism, and the celebration of successes in preservation and adaptive reuse. PS ModCom is one of the sponsors of the National Register of Historic Places Multiple Property Submission (MPS) for the work of architect E. Stewart Williams. As such, we have reviewed the nomination and believe that the MPS document and all 12 of the associated nominated properties clearly meet the criteria for National Register listing.

Apparently, there is owner opposition to two of the 12 nominated properties: Coachella Valley Savings #1 (CVS #1) and the Oasis Commercial Building. The letter from the owner of CVS #1 does not challenge any aspect of the nomination, simply stating opposition to it. PS ModCom believes that the nomination makes the case that CVS #1 meets the criteria and exhibits sufficient integrity for National Register listing and we encourage you to concur with this finding.

As relates to the Oasis Commercial Building nomination, the property owner and their representative Andrea Urbas identify three areas of concern: Integrity, Provenance, and Williams as master architect.

INTEGRITY

While most of the ground floor shops have seen innumerable tenants, their storefronts and footprints have not markedly changed. However, the interior of the northwest portion of the building has been extensively remodeled from a former drug store to a contemporary restaurant although its façade has only been slightly altered. Nonetheless, the overall building exhibits historic integrity sufficient to convey its significance.

In a unique approach to historic preservation, the Palm Springs City Council chose to designate only the second story of the Oasis Commercial Building as a local landmark in 2010.¹ As a result, while the upper office floor appears relatively unchanged there have been some alterations to the ground floor area, particularly the outdoor spaces around the north end of the building. A fence of multicolored posts encloses restaurant patios in the courtyard and adjacent to the sidewalk on the north side of the building. A fence also encloses the patio at the adjacent Starbucks store.

¹ Known as a City of Palm Springs Class One Historic Site.

In addition, some of the windows and entrances of the large restaurant space have been modified. Unfortunately, few building permits documenting these alterations were located by the city.

Ms. Urbas asserts that the historic relationship of the rear (west) elevation to the former Oasis resort has been lost because the resort portion has since been demolished. Because of this, she writes, "The Oasis building is only responsive to Palm Canyon Drive and Tahquitz Canyon Drive; the rear has now been relegated to the now commonplace rear elevation of typical commercial buildings. No longer are there storefronts opening to the back – the back is now a parking lot."

We strongly disagree. While the resort buildings are indeed gone, the key elements of the rear entrances to the commercial spaces remain. Specifically, the original metal-framed entrance doors, plate glass store windows, custom door pulls, natural rock cladding, piloti, dramatic exterior staircase and, in the case of the former Kreis Drugstore, the original metal-framed rectangular display window are all intact. Indeed, the existence of the parking lot provides – as intended – customer access to the rear entrances of the building's commercial spaces.

To summarize, overall integrity of design, materials, and workmanship remains high. Although the restaurant occupies the space of a former drugstore, it and the building's other ground floor spaces remain commercial. Similarly, the building's second story units remain offices. As a result, integrity of association and feeling is retained. Situated on a prominent corner in the center of town, the property's integrity of location and setting remains unchanged. This is true even with the presence of the 1923 Oasis Hotel tower and commercial wing on the south end of the property because these original elements existed when the Oasis Commercial Building was erected in 1955. To summarize, the subject building is able to convey its architectural significance, retaining the characteristic physical features associated with the work of E. Stewart Williams, namely, the integration of natural materials expressing the local environment into his modern architectural designs.

PROVENANCE - Attribution of Design to E. Stewart Williams FAIA

Architecture is a collaborative enterprise with various individuals contributing to the successful completion of a project. Outside of architects working alone, partners in an architectural practice typically share in the credit assigned to the completed building. However, within a practice, architects often focus on aspects to which they are attracted or especially adept. Of the firms with which E. Stewart Williams was a partner during his career – Williams, Williams and Williams from 1946 to 1956, Williams and Williams from 1957 to 1963, and Williams, Clark and Williams from 1963 to 1970 – Stewart generally assumed the role of lead designer.² Of his firm's many collaborations, the roles that the various architects played have been researched, identified and documented in the project list compiled by the Palm Springs Art Museum in its 2014 exhibition catalog "An Eloquent Modernist: E. Stewart Williams, Architect" pages 190-201. Based on the extensive research performed by these scholars, there is no doubt that E. Stewart Williams was responsible for the design of the Oasis Commercial Building.

WILLIAMS AS MASTER ARCHITECT

In November 2014, the Palm Springs Art Museum organized the exhibition "An Eloquent Modernist: E. Stewart Williams, Architect." It featured drawings, renderings, models, photographs, watercolors,

² Bricker, Lauren Weiss PhD. Williams, Sidney, ed. *An Eloquent Modernist: E. Stewart Williams, Architect*. Palm Springs, California: Palm Springs Art Museum, 2014.

etchings, and film clips to provide a comprehensive overview of Williams' creative output and afforded a view of his formative role in the development of Modern architecture in Palm Springs, the Coachella Valley, and beyond. A comprehensive 208-page catalog produced for the exhibition included essays by noted scholars Lauren Weiss Bricker, PhD; Elizabeth Edwards Harris, PhD; Erin Hyman, PhD; Volker M. Welter, PhD; Sidney Williams; and Wim de Wit.³ Both the exhibition and catalog decisively demonstrated that E. Stewart Williams FAIA was a master architect.

In summary, the Palm Springs Modern Committee urges the commission to affirm that the E. Stewart Williams Multiple Property Submission and all 12 individual nominations meet the necessary criteria for listing in the National Register of Historic Places.

Sincerely,

A handwritten signature in black ink, appearing to read "C Menrad", with a long, sweeping underline.

Subject: E. Stewart Williams National Register of Historic Places Multiple Property Submission Nomination

Dear Ms. Polanco,

On behalf of Palm Springs Art Museum (PSAM), I write to endorse the nomination of the National Register Multiple Property Submission for the architecture of E. Stewart Williams in Palm Springs, California, to be listed in the National Register of Historic Places.

The individual nominations included in the Multiple Property Submission represent some of the best work by E. Stewart Williams during his long career in Palm Springs and honors one of the city's most important architects who pioneered a new desert modernism in the mid- 20th century, including the two buildings of which we are property owners: Palm Springs Art Museum and Santa Fe Federal Savings (now known as Palm Springs Art Museum Architecture and Design Center).

Supporting this nomination for the work of such an influential architect, which has indelibly shaped the midcentury architectural fabric of Palm Springs aligns with the museum's mission to connect audiences to art, architecture, and culture and reinforces our unique position as one of the primary museums in California with a dedicated programmatic focus on architecture and design. Having organized *An Eloquent Modernist: E. Stewart Williams, Architect*, the major retrospective exhibition (and accompanying monograph) dedicated to Williams's work in 2014 we can attest to the important place the projects included in the MPS hold in the canon of modernist architecture.

The Commission's positive action on this nomination will be greatly appreciated by the museum and by our many visitors who come to Palm Springs to experience its unparalleled midcentury architecture.

Sincerely,

Brooke Hodge
Director of Architecture and Design

Subject: E. Stewart Williams National Register of Historic Places Multiple Property Submission Nomination

Dear Ms. Polanco

Modernism Week would like to endorse the nomination of the National Register Multiple Property Submission for the architecture of E. Stewart Williams in Palm Springs, California to be listed in the National Register of Historic Places.

The individual nominations detailed in the MPS represent some of the best work by E. Stewart Williams during his long career in Palm Springs and honors one of Palm Springs' most important architects who pioneered a new desert modernism in the middle decades of the 20th century.

Supporting this nomination for such an important midcentury resource in Palm Springs further enhances and supports the mission of Modernism Week, which is *"to celebrate and foster appreciation of mid-century architecture and design, as well as contemporary thinking in these fields, by encouraging education, preservation and sustainable modern living as represented in Palm Springs."*

The Commission's positive action on this nomination will be greatly appreciated by the thousands of Modernism Week enthusiasts here in Palm Springs, throughout the U.S. and around the world.

Sincerely,
The Modernism Week Board of Directors

Subject: **Coachella Valley Savings #1**
[The Architecture of E. Stewart Williams Multiple Property Submission]
Riverside County, California
National Register of Historic Places Nomination

Dear Mr. Loether:

The enclosed disk contains the true and correct copy of the request for determination of eligibility for COACHELLA VALLEY SAVINGS #1 to the National Register of Historic Places. On October 28, 2016 in Redlands, California, the California State Historical Resources Commission unanimously found the property eligible at the local level of significance under Criterion C in the area of Architecture with a 1956 period of significance.

The nomination is submitted under cover of the accompanying new Multiple Property Submission, *The Architecture of E. Stewart Williams*. Although no longer used as a bank, CVS #1 exhibits sufficient architectural integrity to convey its significance. The property embodies the distinctive characteristics of mid-century commercial architecture as interpreted by E. Stewart Williams and meets the MPS registration requirements for commercial buildings.

The property is nominated on behalf of a group of private individuals. In its role as representative of the City of Palm Springs, a Certified Local Government, the Historic Site Preservation Board was advised of the nominations. Three letters of support have been received for the Multiple Property Submission and associated nominations. A letter of objection was received from the property owner. If you have any questions regarding this nomination, please contact Amy Crain of my staff at (916) 445-7009.

Sincerely,

Jenan Saunders
Deputy State Historic Preservation Officer

**MEMORANDUM**

FOR: Control Unit, National Register of Historic Places
FROM: Amy H. Crain, State Historian II, Registration Unit
DATE: November 7, 2016
RE: The Architecture of E. Stewart Williams Multiple Property Submission

Enclosed please find the Multiple Property Documentation Form (MPDF) and individual nominations submitted under cover of a new multiple property submission, *The Architecture of E. Stewart Williams*.

Per an email exchange with National Register Historian Edson Beall last year regarding your preference for separate disks, each nomination has its own disk(s) and transmittal pages. Each correspondence file on disk includes the staff report and three letters of recommendation received for the group of nominations, followed as appropriate by individual documentation specific to that nomination.

The MPDF and staff report reference twelve properties whose individual nominations were submitted to this office and heard by the California State Historical Resources Commission at their meeting October 28, 2016:

- Coachella Valley Savings #1
- Coachella Valley Savings #2
- Edris Residence
- Kenaston Residence
- Koerner Residence
- Oasis Commercial Building
- Palm Springs Aerial Tramway Mountain Station
- Palm Springs Desert Museum
- Palm Springs Unified School District Educational Administrative Center
- Santa Fe Federal Savings and Loan Association
- Sinatra, Frank, House
- Williams, E. Stewart and Mari, Residence

Due to additional concerns expressed on behalf of the property owner, the Oasis Commercial Building request for determination of eligibility will follow under separate cover.

Please let me know if you have questions (916) 445-7009.
