The Louis Hirsig house remains today essentially as it was constructed, and is in excellent condition.

The house represents a compact-cubical form of Prairie architecture, rather modest in scale and is a form found in the Madison area as designed by Alvan Edmund Small.

The Louis Hirsig house exhibits characteristics of the Prairie School in a variety of ways. The gable roof has a generous overhang that suggests shelter, and provides a shadow line that emphasizes the horizontality of the composition. This roof is richly endowed with a red flat clay tile roof. The earthiness of the tile, along with natural stain colors, brown, on the trim imparts a feeling of materials in common with the ground, a trait that many Prairie architects developed.

The walls of the house are of stucco, rough textured, that gives the impression of closure against the elements without mass, and the entire composition is one of simple geometry, in keeping with Prairie design concepts.

Brick is used as a base for the home, and the contrast of materials makes a strong statement of the solid placement of the structure on the ground. The brick is repeated in pilasters at the door, and in smaller pilasters at the corners. Wood trim is used about the sash, and a decorative pattern is created by the vertical wood pieces set at the corners. Decoration is simple, limited and of natural materials.

The Louis Hirsig house is of local architectural significance as it represents a form of Prairie architecture found in Madison. The Louis Hirsig house is one of Madison's better examples of a compactcubical form of Prairie architecture. Its forms are simple and easily related to the work of other prominent Prairie architects, particularly the work of George W. Maher, in the suburbs of Chicago. Alvan Edmund Small, the architect, was a Wisconsin man, born in Sun Prairie, but educated in the architectural profession through the route of apprenticeship.

Alvan E. Small first was employed by the Madison architectural firm of Conover (Allan D.) and Porter (Lew F.). After 12 years with the firm, Small worked for one year with Louis H. Sullivan in Chicago. He then returned to Madison, first in a partnership with Lew F. Porter, his former employer, then as a sole proprietor until 1922 when a partnership with John J. Flad was established that terminated in 1927. Mr. Small died in 1932.

Mr. Small exerted an architectural influence upon Madison, and the Prairie style was a form at which he was particularly adept. Most of his buildings in this period were modest in size, for important, yet not the most affluent, members of Madison's business and educational community. The Louis Hirsig house represents that period and type of home.
