APPENDIX B HERMITAGE PLANTATION HISTORIC DISTRICT

DESCRIPTION

Hermitage Plantation is located on the North side of Borck Creek one of the several secondary inlets of Coral Bay. The buildings of the plantation are clustered along the ridge of a hillside spur that extends southward from the main spine of the East End peninsula of St. John. The road that from Coral Bay settlement leads to the East End village passes below the plantation site and access to Hermitage is provided by the trail to Brown Bay and North Shore that branches off the East End Road just West of the plantation site. The plantation house remains with associated service buildings, warehouse and shop buildings are located on the higher elevation at the apex of the spur. The ruins of five barracks like structures with a cistern and other service structures are sited south and below the plantation house. Two wells and associated watering troughs in the valley below complete the list of Hermitage known structural remains.

Hermitage Plantation post-dates 1780 but by 1800 was already a well developed site with several buildings. It was then exclusively devoted to the cultivation of cotton. At an unknown date during the mid-19th century it became a cattle farm and continued as such into the early decades of the 20th century. The remains of most of the existing 15 structures appear to date from the 19th century, the plantation house, warehouse and shop however, contain elements of the pre-1800 buildings and were part of the early cotton production.

STATEMENT OF SIGNIFICANCE

The Hermitage Plantation is significant as an example of the plantations exclusively devoted to the cultivation of cotton and raising of cattle.

Latitude Longitude
Acreage: 8 acres 18° 21' 31" 64° 42' 01"

VERBAL BOUNDARY DESCRIPTION

Starting at a point on the East End Road 200 feet west of this roads intersection with the Brown Bay Trail the boundary leads north for 200 feet and then east parallel to the road to the Brown Bay Trail then follows the trail for 500 feet and then east-southeast across the ridge of the spur for 350 feet and then southerly parallel to the Brown Bay Trail to the East End Road and then along the road to the starting point. The boundaries are defined to include all parts of the historical resource and follows existing man made features as trails and roads or straight lines between identifiable fixed points.
