a retired army officer named John Beach, pursued a similar sympathetic approach. The Street family did well by the 1842 negotiations. The appreciative Indians presented the General's widow with a section of land on the Indian Agency surrounding the grave of her husband. Perhaps remembering Black Hawk's fate, whose bones had been stolen from his grave within a year of his death in 1838, the Indians insisted that their former chief Wapello continue to rest in his grave near General Street, whom he had admired.

The present park comprises what was the garden area of the old Agency. This site contributes to a fuller appreciation of Iowa's early period of settlement and the course of Indian-white relations in general. On the one hand it indicates the deep enduring social consequences that accompanied white settlement, even upon particular Indians that were the other hand, as a generally very friendly to the whites. On reminder of the friendship that existed between General Street and Chief Wapello, the site refreshingly commemorates the spirit of accommodation and mutual tolerance that occasionally penetrated this sad history of conflict and despair.
