Narrative Description

Summary Paragraph

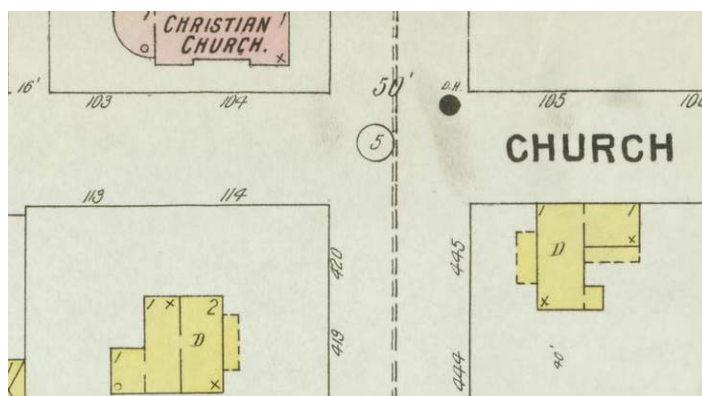

The First Christian Church (HIC-8) is located in Clinton, seat of Hickman County, Kentucky. It sits on a lot of approximately 1½ acres. The building occupies a corner lot northwest of the intersection of North Street and Washington Street (also US Highway 51). The church sits at the north edge of the historic downtown, where the north side residences meet the downtown. One block directly south of the church stands the Hickman County Courthouse, in the center of town, at the northwest corner of Washington Street and Clay Street. The nominated area consists of one contributing building. The building is being interpreted for its architectural values.

Character of and History of Site

The property is a flat site with two large trees at the north side of the lot. On the west side of the church is a driveway. The Hickman Christian Church group had occupied this site at least by 1876, when they erected their first worship house, a clapboard covered building. That church burned in 1896. The current church was completed in 1899, replacing the burned church.

Detail of Sanborn Map 1, Clinton KY, 1899
Brick Christian Church at top

Exterior Description

The Hickman Christian Church was built in 1899. The main entry to the church is on the Washington Street (east) side, near the building's southeast corner. A ramped wheelchair entry has been added to the North Street (south) side. The church has a Romanesque styling, resulting from the semi-circular arches over the windows and door openings. The facades facing the streets, on the east and south, have one-story brick buttresses topped by a stone cap. The windows have stone sills and brick arch lintels. The brick of the church is laid in common bond, with no header course.

The building has a squarish plan, with each side divided into 3 structural bays, each bay defined by large window or door openings. Several of the bays rise to a steeply pitched hipped roof covered with asphalt shingles and capped with a sheet metal cross. A prominent one-story flat-roofed addition was added to the building's north side in 1966; it contains class and meeting rooms. White wood molding and trim boards form the cornice. The building's formal massing imparts a heavy effect.

First Christian Church
Name of Property

Hickman County, Kentucky
County and State

The church's windows display a variety of types and effects. Several windows on the south and east sides—the primary façades—are stained glass. On the south and east sides, the focus of each side is a central bay containing a tripartite stained glass window which spans two floors. These windows light the sanctuary, each comprised of a larger central window flanked on each side by a narrower window. A decorative wooden spandrel separates the upper stained glass window from the lower one; that upper window terminates in a semi-circular arch. Elsewhere, many of the historic windows are double hung sashes capped with a semi-circular arch. Semi-lunette dormer windows are present in several faces of the hipped roofs that cap the bays, and those dormers are topped by long thin decorative finials.

The east façade's entry bay is defined by a pair of wooden doors capped by a semi-circular stained glass transom which is accented by a 2-course projecting arch. On the upper level of that bay, below the cornice level, are 3 double-hung-sash windows. That tower has the semi-circular dormers on all 4 of its sides. The east façade has a small amount of grass from the building foundation and the sidewalk, which has overgrown bushes. A Kentucky Highway marker stands in this landscaped area between the building and the sidewalk.

In the south façade's westernmost (left when facing the building) bay is a simple single wooden door with a small semi-circular stained glass transom. A wooden ramp provides wheelchair access to the door. The central bay has the double tripartite stained glass windows, and the easternmost bay has a double-hung stained glass window in the lower level, and 3 double-hung clear-glass windows reside in the upper level.

East façade

South façade

The west façade has a polygonal one-story apse lit with clear-glass double-hung windows. The roof is hipped and covered with asphalt shingles.

The north façade is partially obscured by the one-story addition. The portion of the historic façade, still visible, shows a 3-bay façade with similar articulation as on the south and east façades. It contains stained glass windows in approximately the same size and prominence as are found on the south side. If the north and south sides have parallel openings, then the attachment of the addition on the north side occurred where there was a door that matched the south side door location.

West façade, partial

Interior Description

The foyer stands just inside the entry doors. This was originally intended to be a bell tower, but a lower ceiling was installed, instead. That ceiling closes off the interior view of stained glass windows from above, that wrap the tower. Those windows in the bell tower are solid panes of glass in three shades, yellow, blue and pink.

The foyer has 12" baseboards that line the walls, and thick oak chair rail that lines the middle of the walls as well. Access to the sanctuary comes through two large pine doors with finely crafted hinges. This church has a polygonal plan with central axis. In harmony with its octagonal plan are curved pews. Each pew row is capped with a decorative Gothic pointed arch.

Three large stained glass window sections, each divided horizontally and twice again vertically, form six individual windows which visually dominate the walls of the nave interior. The result of the odd number of window groupings in a room with an even number of walls is an asymmetrical arrangement when viewed from the entrance, but a symmetrical presentation when viewed from the pulpit. Portions of the stained glass bear the names of the patrons of the windows. Portraits, said to be those of J.W. Higbee, and J. M. Samuels, crown two of the three primary stained glass groupings. The letters TPA appear in alternating triangles atop the third. TPA is a fraternal organization still active today.

First Christian Church
Name of Property

Hickman County, Kentucky
County and State

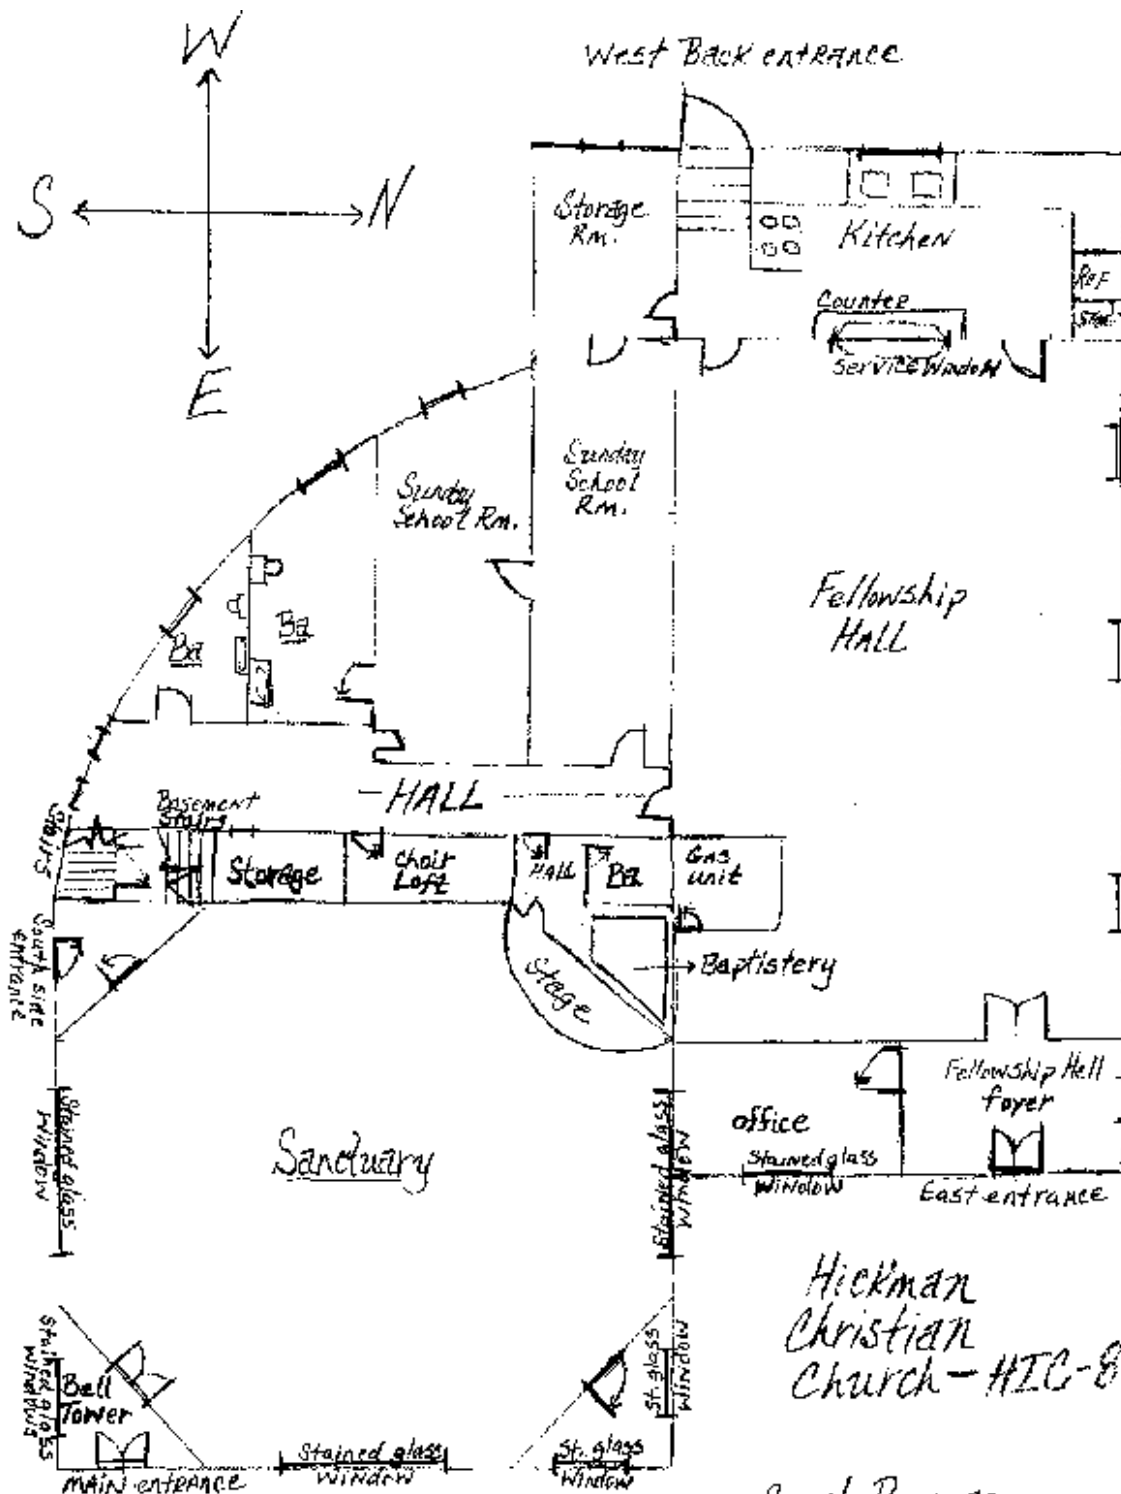

The church has an impressive exposed wood beam vaulted ceiling. The vaulting of the Hickman Christian Church is also what necessitates the use of buttressing, as seen in the tapering brick sections which stand perpendicular to its exterior walls. These buttresses provide the structural support necessary to counter the lateral thrust created by the building's ceiling.

Changes to the Church since the Period of Significance

In 1966 an addition was added on to the original church structure. A fellowship hall was built, which included a full kitchen in the back of the building. A small foyer has been added where the main doors from the front of the church enter the fellowship hall. An office to the left, adjacent to the foyer, contains a small, multi-colored stained glass window located on the east wall. There are wooden, double swinging doors as you pass into the fellowship hall. The layout of the room is a simple long rectangle with pull-out dividers braced to the west wall to create classrooms as needed. The kitchen is located on the west wall and occupies the entire back of the room.

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B Property is associated with the lives of persons significant in our past.
- C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D Property has yielded, or is likely to yield, information important in prehistory or history.

Areas of Significance

Criteria Considerations

(Mark "x" in all the boxes that apply.)

Property is:

- A Owned by a religious institution or used for religious purposes.
- B removed from its original location.
- C a birthplace or grave.
- D a cemetery.
- E a reconstructed building, object, or structure.
- F a commemorative property.
- G less than 50 years old or achieving significance within the past 50 years.

Period of Significance : The Period of Significance is 1899, the date of construction, a single year in accord with National Register conventions for a building qualifying for its architectural significance.

Criteria Considerations: This meets Criterion Consideration A. It is a property that was owned by a religious institution, though now is in private ownership. It derives its significance from its architectural design.

Statement of Significance

Summary Paragraph

The First Christian Church (HIC-8) of Clinton, in Hickman County, Kentucky, meets the first term of National Register Criterion C—it embodies the distinctive characteristics of a type of construction. Its type of construction is Romanesque Revival architectural style. The significance of the style is evaluated within the historic context, Romanesque Revival Buildings of the Jackson Purchase Region of Kentucky, 1875-1925. Using the Kentucky Heritage Council survey database, one sees Romanesque style prominently employed in governmental, commercial, and institutional buildings, and less so in residential buildings in far western Kentucky, where the First Christian Church is located. The building is locally significant for providing Hickman County its only recorded instance of the style. The building offers the local population a design that seemed sophisticated relative to others on the local landscape. For a church group intent on announcing the solidity, wealth, and social prestige of their congregation, the Romanesque Revival design provided those messages.

Historic Context: Romanesque Revival Buildings of the Jackson Purchase Region of Kentucky, 1875-1925

The Jackson Purchase Region is the farthest western part of Kentucky, made up of 8 counties. Water bounds these counties on three sides: The Tennessee River on the east, Ohio River on the north, and the Mississippi River on the west. The border with the state of Tennessee forms the southern line of the Jackson Purchase. This area was part of Kentucky when the Commonwealth became a state in 1792, but remained under the control of Chickasaw Indians until 1818. The first county governments to organize the region were Hickman, Graves, and Calloway Counties, all in 1821. Since then, those original counties have been divided, and joined by McCracken (1824), Marshall (1842), Ballard (1842), Fulton (1845), and Carlisle (1886) Counties.

A number of geographic features make the Purchase region a distinct cultural landscape from the rest of Kentucky. The large rivers that surrounded it made it more accessible to steamboat travelers from other states, or by land travelers from Tennessee, than to Kentuckians who traveled by roads. Its Loess soils differ from the other soils in most of Kentucky, and land elevations generally lower, with terrain having less relief than in many parts of the state. Until the era of railroads, the Purchase region remained the most remote part of the state from the capital city of Frankfort.

The Purchase is the only part of Kentucky whose land was organized by the rectangular land survey system, which was used to divide the Midwest and Western states of the U.S. The rest of Kentucky was developed through a metes and bounds survey system, which cites physical landmarks—such as prominent rocks or trees—and defines a property's boundary in distances and directions from the landmark reference point. The metes and bounds survey system had been used in England for centuries; it connects the older states of the US in a subtle way with European culture. In places where metes and bounds survey is used, landscape features play a more prominent role in the consciousness of space. In areas using the grid survey, cardinal directions had a greater impact on the first shaping of space that settlers of European descent encountered. The Purchase Region is a hybrid of these two systems. For instance, its county boundaries and network of roads exhibit a greater alignment with north-south and east-west than can be found elsewhere in Kentucky. Yet, the primary automobile roads—built in the early 20th century—find their way from town-to-town in more efficient paths than by adhering strictly to cardinal directions. The development of the Purchase Region by Euro-Americans began with the logic of the grid, but we can see that Kentuckians, who settled the area, shaped their spaces—at least at the macro level—in ways that were familiar to them, and which depart from the grid. The strong presence of the rivers surrounding the Purchase Region, both as a transportation corridor for people outside of

First Christian Church
Name of Property

Hickman County, Kentucky
County and State

Kentucky, as well as an impediment to travelers from within Kentucky, should be considered when examining the earliest development of this cultural region.

Romanesque Revival Style nationally

The architectural influences that became Romanesque Revival came to the United States in the mid-19th century, but found little acceptance until the 1870s, when architect Henry Hobson Richardson's distinctive work began to gain public awareness and popularity. Architectural historians have found his masonry designs so compelling that they named one version of the style after him: Richardsonian Romanesque. Richardson's designs found more use in institutional and public buildings, though also in some mansions in the post-Civil War era.

Trinity Church, Boston (1872-1877)

Ames Free Library, North Easton, Mass (1877)

Characteristics of Romanesque Style nationally

The Romanesque style flourished after the 1880s, as other architects attempted to achieve the critical and popular success that Richardson enjoyed. They developed a simpler version of the style, with these characteristics:

- Masonry construction
- Round arches at entrance windows
- Heavy and massive appearance
- Polychromatic stonework on details
- Round towers
- Squat columns
- Decorative plaques

Some outstanding examples of Romanesque style in Kentucky

Kentucky National Bank, Louisville
(1891)

Union Station, Louisville
(1891)

Romanesque Revival in the Jackson Purchase Region

Statewide, Kentucky has 480 buildings surveyed with Romanesque Revival style. With nearly 100,000 buildings in the entire survey, the style has less than 1% (.48%) presence. The style lends itself to identification with urban areas, as more than half of the instances occur in Lexington (156) and Louisville (105), as well as many larger county seat towns. The style also is strongly identified with the Victorian era. A construction date is given on 428 of the survey forms, with only 19 (4.4%) buildings dating before 1875, 313 (73.1%) dating between 1875-1899, and 96 (22.4%) occurring in the early-20th century.

While the style occupies a small portion of the entire survey population, the architectural significance of the style has been recognized through National Register listing. Of the 480 total buildings statewide, 287 (59.8%) are listed within historic districts, and another 45 (9.3%) are individually listed. It is beyond the scope of this project to test this hypothesis, but a guess is that few other styles have more than 70% of their buildings listed on the National Register. The strong relationship between the style and National Register listing suggests that Romanesque Revival buildings in Kentucky in general are seen to have architectural value or have housed significant activities.

In the Purchase Region, the presence of Romanesque Revival is slightly lower than is found statewide. With 3222 properties surveyed throughout the region's 8 counties, only 14 buildings (.43%) have been recorded with Romanesque Revival style. Romanesque style is an urban style in the Jackson Purchase region, with 12 of the 14 (85.7%) instances in Paducah, the Purchase Region's largest city. By 1891, when Romanesque style had gained popularity, the Jackson Purchase Region had at least 4 active railroads running through it, connecting it to markets outside of Kentucky. The relative isolation that marked the Purchase Region's culture in the early-19th century, gave way to a greater integration with the national culture by the end of the 19th century, which would have fostered a taste for fashionable architecture.

The First Christian Church in Clinton is Hickman County's only instance of the style. Without comparison buildings of similar design in Hickman County, recognizing the church's design significance at the local level is more difficult, given that it is not of such design quality that it would illustrate the style in an architectural textbook. Because the Jackson Purchase Region contains a reasonably small sample size, all of the buildings

First Christian Church
Name of Property

Hickman County, Kentucky
County and State

are being examined for this context. The buildings fall into 3 groups: churches, commercial buildings, and residential structures.

Romanesque style Churches in the Jackson Purchase Region

Grace Episcopal, McNP-110
HIC-8 Paducah (1874)

First United Methodist Church, CWM-66
Murray (1903)

First Christian Church,
Clinton (1899)

The Kentucky Heritage Council's (SHPO's) survey database yields 3 churches in a search for Romanesque styled buildings in the Purchase region: Grace Episcopal Church in Paducah, First United Methodist Church in Murray, and United Methodist Church of Barlow. The First Christian Church is not among them, as its style is given as Queen Anne, due undoubtedly to its complex façade arrangement. An examination of the church in Barlow shows that its style is mis-attributed; the lack of a bell tower or steeple and its flat roof make it more appropriately labeled as Neoclassical style. The three Romanesque style churches in the Purchase region share a few features: an emphasized steeple or bell tower and the style-defining round-headed windows, masonry construction, and heavy massing. All three buildings have rather varied applications of the style. One common aspect of the buildings—perhaps more a function of their identity as churches than a matter of style—is their emphasis on the vertical, in the form of steeply pitched hipped roofs or a steeple.

Commercial Buildings (all in Paducah)

632 6th Street (date unknown)

Rhodes-Burford Warehouse (est. 1875-1899)

428 Broadway (date unknown)

In all, 10 commercial buildings in Paducah—and nowhere else in the Purchase region—have been recorded with Romanesque styling. The buildings above are typical of those. The majority of the buildings have 3 structural bays on the main façade, and generally, the door centered in the storefront. The round-arched

First Christian Church
 Name of Property

Hickman County, Kentucky
 County and State

windows and doors provide the primary stylistic feature on this group of buildings, which includes the following:

SITE_NUMBER	DISTRICT_CODE	HISTORIC_NAME	LOCATION	STATUS_DESCRIPTION

Residential Buildings (all in Paducah)

Mayor Fisher House (c. 1900)
 901 Jefferson, McNP-119

Sinnott House (n.d.)
 228 9th Street, McNP-113

European Hotel (c. 1867)
 107 Second Street, McNP-23

Characteristics of Romanesque Style in the Jackson Purchase Region:

First Christian Church
 Name of Property

Hickman County, Kentucky
 County and State

- Masonry construction
- Round arches at entrance windows
- Heavy and massive appearance
- Polychromatic stonework on details
- Round towers
- Squat columns
- Decorative plaques

Three individual residences, and the European Hotel (categorized with the commercial buildings), exhibit the style. As with the commercial buildings, the only recorded residences with the style are in Paducah. However, these residences display much more variation than is found on the commercial buildings. Their facades are asymmetrical and complex. These designs required a skilled architect, to hold the composition together in a coherent whole. These buildings used light colored masonry, which contrasted with the brick walls, to draw attention to the building’s horizontal lines. The houses have a massive quality and great variety. The house at 335 Seventh Street (McNP-94, built c. 1890, demolished) has a three-story square corner tower. The Mayor Fisher House (McNP-119, c. 1900) plays a three-story circular corner tower against the prominent front gable. The Sinnott House uses limestone to accent the door, window openings, and horizontal banding. In contrast to the rather uniform appearance of the commercial buildings discussed above, these residences differ greatly from each other, and show a certain amount of grandeur, so that their owners could communicate their taste and wealth to the public. These three residences are identified in the Survey database the following way:

SITE_NUMBER	DISTRICT_CODE	HISTORIC_NAME	LOCATION	STATUS_DESCRIPTION
MCNP 94	065	HOUSE	335 7TH	N/R DISTRICT CONTRI. SITE
MCNP 113	065 Lowertown	SINNOTT HOUSE	228 N 9TH PADUCAH KY	N/R DISTRICT CONTRI. SITE
MCNP 119	065	MAYOR JOHN FISHER HOUSE	901 JEFFERSON PADUCAH KY	N/R DISTRICT CONTRI. SITE

Evaluation of the architectural significance of the First Christian Church within the context Romanesque Revival Buildings of the Jackson Purchase Region of Kentucky, 1875-1925

The design of the First Christian Church of Clinton is locally significant. This building is the only instance of Romanesque style recorded in the county, which makes it important for providing the local landscape with at least one example of this important late-19th –century style. Romanesque style was selected for public buildings, and to a lesser degree, residential structures. Its masonry material, chunky proportions, and heaviness of detail impart a solidity to the buildings on which it is found. The use of the style on the First Christian Church gives all these impressions.

The choice of this style in the 1890s, by the owners of the First Christian Church in Clinton, Kentucky, fits our understanding of style. That is, styles first appear in large urban areas, and then diffuse into smaller towns, such as Clinton. The selection of this style in 1899 did not cast the town of Clinton as taking architectural risk; it showed the townspeople as willing to select a style that had established itself as indicative of good taste. Prior to 1899, the several institutional and commercial buildings in the Jackson Purchase region of Kentucky, which had adopted the style, gave buildings using the style a connotation of organizational strength, of social heft—that the mass of the building’s material somehow indicated the user’s dependability. A church group would be pleased for their community to think of the church’s members this way. In this way, the church’s style has a social significance.

First Christian Church
Name of Property

Hickman County, Kentucky
County and State

The church design is also aesthetically significant. Designers had to apply the Romanesque style with variety, countering the weighty effect of the masonry mass with compositional complexity. The more complex the composition, though, the more expensive the overall project construction would be to the client. The design of First Christian Church in Clinton achieved a great deal of surface variety yet retained a compactness that surely kept the project's budget under control. The choice to build in brick, rather than in stone, also brought economy without sacrificing the overall effect of the style.

The building's design reaches a level of sophistication that is absent throughout the town. The town's architectural landscape is dominated by buildings with simple rectangular or square plans, symmetrical facades, and articulation that appears more at home in the Federal-era than the Victorian-era of design. An architectural conservatism appears to dominate. One conspicuous public building, the 1884-85 courthouse (HIC-5; NRIS 75000767), has fully-arched windows on its side—a hallmark of Romanesque styling—but its primary façade is so taciturn that its National Register nomination says it “belongs to no clear stylistic realm” (Jewell, Mrs. R.B., Jr., nomination form). The town's other buildings are comparably simple in their detailing, with little applied design from stylistic families. The single departure from this pattern, among the 13 Clinton forms in the Kentucky Heritage Council survey inventory, is the Emma Johnson House (HIC-12, 1904), which has a slightly complex massing. In light of this sampling from the local architectural arena, the First Christian Church seems exuberant, even giddy. It provides a great deal of relief from the rather blasé presentation of the local townscape.

Evaluation of the integrity between the architectural significance of the Clinton Christian Church and its current physical condition

A building in Hickman County meeting Criterion C, significant as a type of construction—Romanesque style—must have integrity of feeling if it is to convey the essential significance of its architectural type. A building in Hickman County will be said to have integrity of feeling if it has at least integrity of materials and design. The First Christian Church of Clinton retains integrity of not only materials, design and feeling, but also integrity of location, and setting.

A building will possess integrity of **Materials** if it retains the majority of its exterior surface materials that indicate the style's hallmarks. The First Christian Church of Clinton has this level of materials retention. The interior walls are unchanged. The exterior walls show their historic materials from the building's date of construction. All windows are also original to the church. There has been some alteration to the materials on the north side of the building, where the addition attaches to the main building. This is not extensive, and is on a secondary façade, the south and east sides being the most prominent sides.

A building will possess integrity of **Design** if it retains the majority of its exterior features that form the style. The First Christian Church has this level of design integrity. Very little of the original features have been altered through removal. The main change is the one-story addition affixed to the north side of the building. That addition was placed on a non-primary façade, a placement that minimizes the impact of the change on the more prominent facades.

The building retains integrity of **location** and **setting**. The church sits within its traditional landscaping and original site. It stands on the line between residential and commercial zones of the town. The commercial area south of the church remains the same density of business places that populated that same place in 1899. The

First Christian Church
Name of Property

Hickman County, Kentucky
County and State

residential area north of the church has been built up somewhat more densely than it was in 1899, but the property use in that area continues to be residential, as it was in 1899.

The building retains integrity of **workmanship** because it clearly embodies the work of skillful builders. The Romanesque style requires crisp lines and multiple arches to achieve its effect. After more than 100 years, and despite a great deal of deferred maintenance, the building's workmanship remains a visible and an important element of its design.

The First Christian Church possesses integrity of **Feeling** because it retains integrity of Materials and Design. A building in Clinton County, Kentucky, meeting Criterion C and which has integrity of feeling possesses the qualities to make it eligible for listing.

Kentucky Heritage Council
Mr. Craig Potts, SHPO
300 Washington Street
Frankfort, KY 40603
12/10/2015

Dear Mr. Potts:

Please help us save The Historic First Christian Church in Clinton, Kentucky. This building is very important to the community for at least three reasons:

- (1) It is the most architecturally important building in downtown Clinton, and arguably the most significant piece of architecture in Hickman County.
- (2) It is currently being used as a non-denominational gathering place for events and performances in Clinton, and capacity crowds are attending these events.
- (3) The building's interior, its hardwood pews, domed sanctuary, and priceless stained glass windows have been kept in good shape since the late 1800s, but the condition of the roof has placed this historic structure in jeopardy.

Please do what you can to help us place this building on the Historic Register, and to assist in preserving this important piece of Hickman County History.

Thank you very much.

Dear Mr. Potts:

The Historic First Christian Church of Clinton is a building that must be saved.

For years the sanctuary was used for church services but when the congregation dwindled to a dozen or so people they could no longer maintain it. Now the building is repaired by individuals and is used as a community space for events and performances.

The building is centrally located, the architecture is striking, and there is great natural sound. It is a perfect performance space because of the raised baptismal area and circular, wrap-around pews. Perhaps what contributes most to the high attendance at events at the Historic First Christian Church in Clinton is the fact that this is a non-denominational space, a place where everyone feels welcome, where everyone participates regardless of their beliefs.

Please help us by supporting an effort to place this building on the historic register, and by offering your advice and council as we try to keep this building and its role as a community gathering place intact.

Dear Mr. Potts:

I am writing to ask for your support the effort in placing The Historic First Christian Church of Clinton on the Historic Register.

The entire community is using this building as a gathering place for events and performances. Its architecture is very significant in historical terms, the stained glass windows are dramatic and unusual and the acoustics are beyond compare.

People from all walks of life are pitching in to save this church, and your help would be greatly appreciated.

Perhaps what contributes most to the high attendance at events at the Historic First Christian Church in Clinton is the fact that this is a non-denominational space, a place where everyone feels welcome, where everyone participates regardless of their beliefs.

Please help us by supporting an effort to place this building on the historic register, and by offering your advice and council as we try to keep this building and its role as a community gathering place intact.

Name: Kelly Arnett
Address: 341 Cain Creek Rd

Dear Mr. Potts:

Please help us save The Historic First Christian Church in Clinton, Kentucky. "This building is very important to the community for at least three reasons:

- (1) It is the most architecturally important building in downtown Clinton, and arguably the most significant piece of architecture in Hickman County.
- (2) It is currently being used as a non-denominational gathering place for events and performances in Clinton, and capacity crowds are attending these events.
- (3) The building's interior, its hardwood pews, domed sanctuary, and priceless stained glass windows have been kept in good shape since the late 1800s, but the condition of the roof has placed this historic structure in jeopardy.

Please do what you can to help us place this building on the Historic Register, and to assist in preserving this important piece of Hickman County History.

Thank you very much.

Dear Mr. Potts:

The Historic First Christian Church of Clinton is a building that must be saved.

For years the sanctuary was used for church services but when the congregation dwindled to a dozen or so people they could no longer maintain it. Now the building is repaired by individuals and is used as a community space for events and performances.

The building is centrally located, the architecture is striking, and there is great natural sound. It is a perfect performance space because of the raised baptismal area and circular, wrap-around pews. Perhaps what contributes most to the high attendance at events at the Historic First Christian Church in Clinton is the fact that this is a non-denominational space, a place where everyone feels welcome, where everyone participates regardless of their beliefs.

Please help us by supporting an effort to place this building on the historic register, and by offering your advice and council as we try to keep this building and its role as a community gathering place intact.

In the last year this church was rescued from the wrecking ball and is seeing new life as an all-community gathering place.

The building, with its Romanesque design, octagonal hardwood sanctuary, and historic stained glass represents the best of Hickman County's History.

Please do what you can to help us preserve this wonderful—and wonderfully useful-- piece of architecture.

Thank you so much for your time.

Dear Mr. Potts:

Please help us save The Historic First Christian Church in Clinton, Kentucky. This building is very important to the community for at least three reasons:

- (1) It is the most architecturally important building in downtown Clinton, and arguably the most significant piece of architecture in Hickman County.
- (2) It is currently being used as a non-denominational gathering place for events and performances in Clinton, and capacity crowds are attending these events.
- (3) The building's interior, its hardwood pews, domed sanctuary, and priceless stained glass windows have been kept in good shape since the late 1800s, but the condition of the roof has placed this historic structure in jeopardy.

Please do what you can to help us place this building on the Historic Register, and to assist in preserving this important piece of Hickman County History.

Thank you very much.

Dear Mr. Potts:

The Historic First Christian Church of Clinton is a building that must be saved.

For years the sanctuary was used for church services but when the congregation dwindled to a dozen or so people they could no longer maintain it. Now the building is repaired by individuals and is used as a community space for events and performances.

The building is centrally located, the architecture is striking, and there is great natural sound. It is a perfect performance space because of the raised baptismal area and circular, wrap-around pews. Perhaps what contributes most to the high attendance at events at the Historic First Christian Church in Clinton is the fact that this is a non-denominational space, a place where everyone feels welcome, where everyone participates regardless of their beliefs.

Please help us by supporting an effort to place this building on the historic register, and by offering your advice and council as we try to keep this building and its role as a community gathering place intact.

I am writing to ask for your support the effort in placing The Historic First Christian Church of Clinton on the Historic Register.

The entire community is using this building as a gathering place for events and performances. Its architecture is very significant in historical terms, the stained glass windows are dramatic and unusual and the acoustics are beyond compare.

People from all walks of life are pitching in to save this church, and your help would be greatly appreciated.

Dear Mr. Potts:

Please help us save The Historic First Christian Church in Clinton, Kentucky. This building is very important to the community for at least three reasons:

- (1) It is the most architecturally important building in downtown Clinton, and arguably the most significant piece of architecture in Hickman County.
- (2) It is currently being used as a non-denominational gathering place for events and performances in Clinton, and capacity crowds are attending these events.
- (3) The building's interior, its hardwood pews, domed sanctuary, and priceless stained glass windows have been kept in good shape since the late 1800s, but the condition of the roof has placed this historic structure in jeopardy.

Please do what you can to help us place this building on the Historic Register, and to assist in preserving this important piece of Hickman County History.

Thank you very much.

Dear Mr. Potts:

Our little town of Clinton KY has a rich heritage. It is a farming community. Many of the citizens are now senior citizens, but we have a bright future because we have a group of young professionals, young farmers, and business people who are interested in providing community events. They have organized parades, festivals, heritage week, family nights on the square and other events to bring out the people and create a sense of community.

I am excited about the effort to save the First Christian Church building. The congregation had dwindled down to just a few members. They could no longer afford to keep it maintained. Now Sarah and John Bowman have assumed the huge responsibility of keeping the building available to our community to be used as a gathering place. This year I have attended a wedding, an old fashioned hymn sing, a Christmas carol sing, and my wife attended a brunch there with her friends from high school. People from all different backgrounds and levels of life are trying to help save this building. It is an architectural treasure, with a rounded sanctuary with stained glass windows. Because of the design, the acoustics are amazing. Travelers on US Highway 51 stop by to admire the architecture.

Your support in placing the First Christian Church of Clinton on the Historic Register would be greatly appreciated.

Sincerely yours,

James F. Long, Col. USAF (Retired) and a Farmer

Dear Mr. Potts:

This letter is to ask your support in placing The Historic First Christian Church in Clinton on Kentucky's Historic Register.

This 19th Century structure is at the center of Clinton's downtown area. The circular sanctuary is notable for its architecture and excellent acoustics and is currently being used as for musical gatherings and performances.

In the fall over 200 local residents attended an Old Hymn Sing at the church, and a Christmas Carol Singing scheduled for December is expected to be standing room only.

In a small county like Hickman County it is crucial to keep this building up and running, as a non-denominational hub for local events. Your help would be greatly appreciated.

Dear Mr. Potts:

The Historic First Christian Church of Clinton is a building that must be saved.

For years the sanctuary was used for church services but when the congregation dwindled to a dozen or so people they could no longer maintain it. Now the building is repaired by individuals and is used as a community space for events and performances.

The building is centrally located, the architecture is striking, and there is great natural sound. It is a perfect performance space because of the raised baptismal area and circular, wrap-around pews. Perhaps what contributes most to the high attendance at events at the Historic First Christian Church in Clinton is the fact that this is a non-denominational space, a place where everyone feels welcome, where everyone participates regardless of their beliefs.

Please help us by supporting an effort to place this building on the historic register, and by offering your advice and council as we try to keep this building and its role as a community gathering place intact.

Dear Mr. Potts:

Please help us save The Historic First Christian Church in Clinton, Kentucky. "This building is very important to the community for at least three reasons:

- (1) It is the most architecturally important building in downtown Clinton, and arguably the most significant piece of architecture in Hickman County.
- (2) It is currently being used as a non-denominational gathering place for events and performances in Clinton, and capacity crowds are attending these events.
- (3) The building's interior, its hardwood pews, domed sanctuary, and priceless stained glass windows have been kept in good shape since the late 1800s, but the condition of the roof has placed this historic structure in jeopardy.

Please do what you can to help us place this building on the Historic Register, and to assist in preserving this important piece of Hickman County History.

Thank you very much.

Dear Mr. Potts:

The Historic First Christian Church of Clinton is a building that must be saved.

For years the sanctuary was used for church services but when the congregation dwindled to a dozen or so people they could no longer maintain it. Now the building is repaired by individuals and is used as a community space for events and performances.

The building is centrally located, the architecture is striking, and there is great natural sound. It is a perfect performance space because of the raised baptismal area and circular, wrap-around pews. Perhaps what contributes most to the high attendance at events at the Historic First Christian Church in Clinton is the fact that this is a non-denominational space, a place where everyone feels welcome, where everyone participates regardless of their beliefs.

Please help us by supporting an effort to place this building on the historic register, and by offering your advice and council as we try to keep this building and its role as a community gathering place intact.

Dear Mr. Potts:

I am writing to ask for your support the effort in placing The Historic First Christian Church of Clinton on the Historic Register.

The entire community is using this building as a gathering place for events and performances. Its architecture is very significant in historical terms, the stained glass windows are dramatic and unusual and the acoustics are beyond compare.

People from all walks of life are pitching in to save this church, and your help would be greatly appreciated.

Dear Mr. Potts:

I am writing to support the effort to place The Historic First Christian Church of Clinton on the Historic Register.

In the last year this church was rescued from the wrecking ball and is seeing new life as an all-community gathering place.

The building, with its Romanesque design, octagonal hardwood sanctuary, and historic stained glass represents the best of Hickman County's History.

Please do what you can to help us preserve this wonderful—and wonderfully useful-- piece of architecture.

Thank you so much for your time.

Dear Mr. Potts:

This letter is to ask your support in placing The Historic First Christian Church in Clinton on Kentucky's Historic Register.

This 19th Century structure is at the center of Clinton's downtown area. The circular sanctuary is notable for its architecture and excellent acoustics and is currently being used as for musical gatherings and performances.

In the fall over 200 local residents attended an Old Hymn Sing at the church, and a Christmas Carol Singing scheduled for December is expected to be standing room only.

In a small county like Hickman County it is crucial to keep this building up and running, as a non-denominational hub for local events. Your help would be greatly appreciated.

Dear Mr. Potts:

This letter is to ask your support in placing The Historic First Christian Church in Clinton on Kentucky's Historic Register.

This 19th Century structure is at the center of Clinton's downtown area. The circular sanctuary is notable for its architecture and excellent acoustics and is currently being used as for musical gatherings and performances.

In the fall over 200 local residents attended an Old Hymn Sing at the church, and a Christmas Carol Singing scheduled for December is expected to be standing room only.

In a small county like Hickman County it is crucial to keep this building up and running, as a non-denominational hub for local events. Your help would be greatly appreciated.

Dear Mr. Potts:

I am writing to support the effort to place The Historic First Christian Church of Clinton on the Historic Register.

In the last year this church was rescued from the wrecking ball and is seeing new life as an all-community gathering place.

The building, with its Romanesque design, octagonal hardwood sanctuary, and historic stained glass represents the best of Hickman County's History.

Please do what you can to help us preserve this wonderful—and wonderfully useful-- piece of architecture.

Thank you so much for your time.

Dear Mr. Potts:

I am a native of Clinton, Kentucky, Hickman County and was raised in the First Christian Church there. Although a longtime resident of Frankfort, Clinton is still very special to me and the First Christian Church building is a 139 year-old structure well worth saving.

The congregation, never large, aged and no longer exists. The church building which is a very unique structure inside and the stained glass windows are really special, inside and outside. Sarah and John Bowman now own the church building and are doing everything they can to save it. The major obstacle they face right now is an expensive roof repair. I think estimates are in the \$60,000 range and I understand they have raised around \$15,000 to go toward the roof repair. I know they have a meeting with you later this month and I write in strong support of their request of the Kentucky Heritage Council's support. If they can get the needed support I believe they will be well on their way to saving and utilizing this grand old church building for years to come.

Some of the activities that I know have been held in the church recently include weddings, old time hymn singing, carol singing and the "Girls of the Class of '61" (my graduating class of HCHS) recently held a brunch there.

All Hickman Countians and those who no longer live there, but still love the community, appreciate the Kentucky Heritage Council's consideration of the Bowman's request.

Sincerely,

Harry Lee Waterfield II

Dear Mr. Potts:

I need to make a correction to my letter to you of 12-8-15. The Clinton First Christian Church building is not 139 years old. The church was established on the site in 1876, a fire burned the first structure in 1896 and the current building was built in 1899. So the building is 116 years old.

Sincerely,

Harry Lee Waterfield II

Nov. 28, 2015

Mr. Potts,

The First Christian Church of Clinton, Ky is a remarkable building. It includes several features that I have never seen in my 70 years.

The curved seats are a sight to behold, especially when they are filled with people (as they were on Sept. 11, 2015). The stained glass windows are still in excellent condition. The baptistry is very unique - it is covered with a wood ^{door} that slides upward. The wool carpet is in good shape.

If it is placed on the National Register of Historical Places, it will be easier to get a grant to repair the many things to save this wonderful old building. It would also put Clinton & Hickman Co. in the news. Clinton is a special place where the people work

together to do more than any
other town I know of. I
volunteer at the Chamber of
Commerce in Mayfield Ky. and
I know how hard it is to
get people to do any thing!!
Thanks for your help!!

Sincerely,
Katie Wooley

Dear Mr. Loether:

Enclosed are the nominations approved by the Review Board at their December 15, 2015 meeting. We are submitting these forms so the properties can be listed in the National Register:

- First Christian Church**, Hickman County, Kentucky
- American Life & Accident Insurance Company Building**, Jefferson County, Kentucky
- Klotz Confectionary Company**, Jefferson County, Kentucky
- Louisville Cotton Mills (Boundary Increase, Additional Documentation)**, Jefferson County, Kentucky
- California Apartments**, McCracken County, Kentucky
- Clel Purdom House**, Marion County, Kentucky
- Sroufe House**, Mason County, Kentucky
- Bell House**, Metcalfe County, Kentucky
- Morehead Chesapeake & Ohio Railroad Freight Depot**, Rowan County, Kentucky
- Felix Grundy Stidger House**, Spencer County, Kentucky

We resubmit two previously-returned nominations with revisions addressing National Register staff comments:

- Sen. John and Eliza Pope House**, Fayette County, Kentucky (NRIS 05000785)
- Charles Young Park**, Fayette County, Kentucky (NRIS 15000413)

Finally, we submit additional documentation that updates three already-listed Kentucky archaeological-properties:

- Archaeological Site, No. 15Hr4**, Harrison County, KY (NRIS 86000269)
- Mt. Horeb Archaeological District**, Fayette County, KY (NRIS 98000088)
- Ramey Mound, 15BH1, Bath** County, Kentucky, (NRIS 98000089).

We thank you for your assistance in listing these properties.

Sincerely,

Craig A. Potts
Executive Director and
State Historic Preservation Officer
