Photo #3 of 5

A black and white photograph of the Anderson Bank building facade. The image shows a low-angle view of the building's exterior, which is constructed of brick. The facade is characterized by a series of vertical piers and horizontal window bands. At the top of the visible section, there is a decorative cornice with intricate floral and scrollwork patterns. Below the cornice, the name "ANDERSON BANK" is prominently displayed in large, dark, block letters on a lighter-colored stone or concrete base. The overall architectural style is reminiscent of early 20th-century commercial buildings.
