DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The ground plan of the house is T-shaped. The cross bar of the T is two stories high with a simple gable roof aligned north and south. In the center of this part of the house is a door with a small front porch and a single window on either side. Above are three windows. The stem of the T, which is the oldest part of the house, is a story and a half high with a gable running east and west. There is a small bay window in the southeast angle where the two parts of the T join one another. The home is wood construction throughout with clapboard siding.

A photograph of the house in 1885 shows the house to have then had almost exactly its present form.¹ A very complete discription of the house as it existed during the youth of Elbert Hubbard likewise suggests that the essentials of this house are as they were in the nineteenth century.²

The stem of the T was constructed in 1857 of local walnut lumber cut by Dr. Silas Hubbard.³ The two story cross bar of the T was built about 1872 in part with materials and labor solicited by Elbert Hubbard as he rode from farm to farm collecting his father's bills.⁴

STATEMENT OF SIGNIFICANCE

This house was the boyhood home of Elbert Hubbard, one of the most important late nineteenth and early twentieth century American essayists, author of "A Message to Garcia," and founder of The Roycrofters Shops.

Silas Hubbard, Elbert's father, came to McLean County from Buffalo, New York, in 1855. Elbert was born in Bloomington in 1856. The following year Silas Hubbard moved to Hudson, became the first doctor in that town, and built the east portion of this house. Elbert grew up in this house, attended school in Hudson, and many of his later writings contain scenes drawn from his boyhood surroundings. At the age of sixteen young Hubbard began to travel and sell soap from door to door. He prospered, moved to Buffalo, became a partner in the soap company, and earned a modest fortune.

In 1892, quite suddenly, he gave up the soap business and decided to become a writer. His first important efforts were a series of Little Journeys, each one to the home of some successful or famous person. Eventually he produced 170 such journeys and they became one of the most widely read series of popular essays in the United States in the two decades before the outbreak of the first world war. In 1895 Hubbard brought out the first issue of the Philistine, an iconoclastic journal which soon became the most popular of the so called "little journals" that marked a significant change in American reading habits.

In March, 1899, the magazine printed a short and at the time untitled essay by Hubbard which became known as "A Message to Garcia." The essay was inspired by the journey of Lieutenant Andrew S. Rowen to the Cuban rebel leader leader Calixto Garcia. Only three paragraphs concern Rowen. The remainder of the 1,500 words are an admonition to the workers of the world to act promptly, with energy, and accomplish their assigned task. The work is **AMONG** the most widely reprinted essays in American history. By 1913 an estimated 40 million copies had been printed. It was widely reprinted in text books and standard reading for two generations of American school children. By 1939, when the Roycrofters copyright expired, over 80 million copies had been printed and the essay had been translated into every major language in the world.

After returning from a trip to England, in 1895, Hubbard

established the Roycroft community at East Aurora. Under Hubbard's direction this artistic community developed a wide range of craft products, particularly finely printed books. At the height of its productivity the Roycroft community employed several hundred craftsmen. The Roycrofters buildings have recently been placed on the National Register of Historic Places.

On May 1, 1915 Hubbard boarded the Lusatania ramarking, "Well if they sink her....I will have a chance some day to meet the Kaiser in hell."¹ He was perhaps the best known American to go down with the ship.

It is a measure of Elbert Hubbard's importance that since his death he has been the subject of six full length biographies.
