The Old Bank Building, late Victorian in style, was built by the Catlettsburg National Bank in 1885. Its outer dimensions are 33 feet by 100 feet. The stone walls of its basement are Two stone lions of pressed brick laid in diamond cement. flank the stone steps that lead to the recessed main door. The door is topped by a glass transom and framed by a brick The windows were originally much higher; they exarchwav. tended to the arched brick lintels, and the pairs of windows at the extreme right and left of the enclosed photograph were originally single windows, with stained glass at the The roofing material, Pennsylvania slate, is attracttops. ively arranged in a pattern consisting of curved and rectang-The ornate roof has dormers; spires, a minaret, ular pieces. and wooden embellishments.

In The Big Sandy Valley, William Ely described the interior of the Old Bank Building as it appeared in 1887, when the Bank was "for beauty of architectural design, substantiality of construction, convenience of internal and external arrange+ ments, and general appearance...equal to the finest buildings for similar purposes in the great cities of the country. It (was) altogether the handsomest building in Catlettsburg..." The cellar, which extends the whole length of the building, was as light and dry as the upper floors. The bank vault rested on the bed-rock of the basement. The remaining space was available for "confectionery, cigar stands, barber shops, or other light mechanical or mercantile business." On the main floor, the lobby was large enough to hold a hundred or Opposite the front door was a more persons in comfort. carved wood counter which extended to the ceiling. Behind the counter was a large counting room where the officers and employees of the bank worked at their desks and money-tables. The rest of the space was reserved for other offices of the bank.

In 1916 the structure was sold to the Farmers and Merchants Bank. It was used for medical and dental offices for forty years. Although it has been flooded many times, and was almost completely submerged in 1937, the structure has been kept in good repair; the condition of the interior is excellent, but no traces of the original use remain. Presently the building is vacant, but the owner has plans for adaptive use.

The Old Bank Building, late Victorian in style, was built by the Catlettsburg National Bank in 1885. Its outer dimensions are 33 feet by 100 feet. The stone walls of its basement are Two stone lions of pressed brick laid in diamond cement. flank the stone steps that lead to the recessed main door. The door is topped by a glass transom and framed by a brick The windows were originally much higher; they exarchwav. tended to the arched brick lintels, and the pairs of windows at the extreme right and left of the enclosed photograph were originally single windows, with stained glass at the The roofing material, Pennsylvania slate, is attracttops. ively arranged in a pattern consisting of curved and rectang-The ornate roof has dormers; spires, a minaret, ular pieces. and wooden embellishments.

In The Big Sandy Valley, William Ely described the interior of the Old Bank Building as it appeared in 1887, when the Bank was "for beauty of architectural design, substantiality of construction, convenience of internal and external arrange+ ments, and general appearance...equal to the finest buildings for similar purposes in the great cities of the country. It (was) altogether the handsomest building in Catlettsburg..." The cellar, which extends the whole length of the building, was as light and dry as the upper floors. The bank vault rested on the bed-rock of the basement. The remaining space was available for "confectionery, cigar stands, barber shops, or other light mechanical or mercantile business." On the main floor, the lobby was large enough to hold a hundred or Opposite the front door was a more persons in comfort. carved wood counter which extended to the ceiling. Behind the counter was a large counting room where the officers and employees of the bank worked at their desks and money-tables. The rest of the space was reserved for other offices of the bank.

In 1916 the structure was sold to the Farmers and Merchants Bank. It was used for medical and dental offices for forty years. Although it has been flooded many times, and was almost completely submerged in 1937, the structure has been kept in good repair; the condition of the interior is excellent, but no traces of the original use remain. Presently the building is vacant, but the owner has plans for adaptive use.
