NPS Form 10-900 (Oct. 1990)

### United States Department of the Interior National Park Service

# National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

Narrative Description				

roadway wdt.: 18.0'

(Describe the historic and current condition of the property on one or more continuation sheets)

Located on the northeastern edge of Sumner, the Sumner Bridge spans the Little Wapsipinicon River in a rural Fayette County setting that has changed little since the structure's period of significance. A description of the structure follows:

span number: 3 43.0' span length: 125.0' total length:

construction date: 1916-17 construction cost: \$7058.00

current condition: good alterations: none

superstructure: concrete deck girder

substructure: concrete abutments, wingwalls and piers

floor/decking: concrete deck

other features: concrete guardrails with molded concrete balusters; bridge plate: Fayette County Board

of Supervisors / G. Gunderson Chr'm'n / P. Miehe / M. Fels / C.F. Chambers C. Auditor / G. Blunt Co. Engineer / Fred Boedeker Contractor

Other than maintenance-related repairs, the bridge remains essentially unaltered as it continues to carry vehicular traffic. The Sumner Bridge today retains a high degree of integrity of location, design, setting, materials, workmanship, feeling and association.

8. Statement of Significance					
Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)	Areas of Significance (Enter categories from instructions)

Paperwork Reduction Act Statement: This information is being collected for applications to the National Register of Historic Places to nominate properties for listing or determine eligibility for listing, to list properties, and to amend existing listings. Response to this request is required to obtain a benefit in accordance with the National Historic Preservation Act, as amended (16 U.S.C. 470 et seq.).

Estimated Burden Statement: Public reporting burden for this form is estimated to average 18.1 hours per response including time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding this burden estimate or any aspect of this form to the Chief, Administrative Services Division, National Park Service, P.O. Box 37127, Washington, DC 20013-7127; and the Office of Management and Budget, Paperwork Reductions Projects (1024-0018), Washington, DC 20503.

## National Register of Historic Places Continuation Sheet

Section Number	8	Page _	1	Sumner Bridge	Fayette/Bremer County; Iowa
----------------	---	--------	---	---------------	-----------------------------

Located on the periphery of the small town of Sumner, this concrete bridge spans the Little Wapsipinicon River. The structure is comprised of three concrete deck girder spans, supported by concrete abutments and piers with bullnosed cutwaters. Modest architectural expression is provided by the molded concrete balusters and slightly recessed rectangular panels on the spandrel girders. The Sumner Bridge dates to 1916. That June the Fayette County supervisors agreed with the supervisors of Bremer County to build this bridge on the line between the two counties. Under the agreement, each county would pay half of the cost, and Bremer County would be responsible for securing the design and contracting with the builder. On July 14th Bremer County awarded a construction contract to Fred Boedeker for \$7058.00. He began work on the substructural excavation soon thereafter, completing the bridge the following year. Since that time, the Sumner Bridge has carried vehicular traffic at this inter-county crossing, in unaltered condition.

Around 1910 the deck girder design began to find favor among Iowa county engineers for medium-span concrete bridges. One of the first standards developed by the state highway commission in 1913 was its so-called H Series, which delineated concrete deck girder bridges with 24- to 40-foot spans. As described in the highway commission's annual report for that year, the deck girder consisted of "a thin transverse flooring [that] transmits the stress to deep and narrow supporting girders, which in turn transfer the load to the abutments by simple beam action." From the initial 1913 design, the H Series standard was periodically modified, as the next several years proved to be the heyday of the concrete deck girder. From the hundreds built throughout the state, approximately 140 concrete deck girder bridges remain in use. Of these, about 100 of these structures are single-span examples, and about two dozen are made up of two spans. Only eleven multiple-span examples have been identified. The Sumner Bridge is thus distinguished among Iowa's early concrete bridges as a multiple-span example of this mainstay structural type.
