National Register of Historic Places Registration Form

RECEIVED 413

APR 1 9 1994

This form is for use in nominating or requesting determinations for individual properties and districts See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin No.). Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "NA" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional

entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

Ouitman Depot

Section number	7	Page	1
----------------	---	------	---

The Quitman depot, circa 1910, lies on the western edge of the town's small commercial district alongside the old Mobile and Ohio railroad track. It is an archetypal railroad station for a small American town. The typical railroad station was a one story, frame building with at least one passenger waiting room, a freight section and an agent's office. The office was centrally located and usually had a projecting bay on the track-side elevation so that the agent could follow the comings and goings of the trains. A depot building was characterized by its agent's bay and its wide, overhanging roof which sheltered both passengers and railroad workers (Harwood 1985:129).

The railroad station at Quitman is an excellent example of this form. The horizontality of the frame depot is emphasized by its long, low, rectangular shape and its wide, overhanging, hip roof accented by struts. The horizontality is somewhat relieved by a projecting bay on each long elevation. On the west (railroad track) elevation is an integral box bay featuring a paired 2/2 double hung sash window. This served as the agent's bay. On the east (town) elevation is a larger box bay with a hip roof. In the south ell created by this bay is a small integral bay. The narrow south elevation is dominated by an integral portecochere displaying Doric columns mounted on brick piers. Located in the portecochere area is a six cross panel door and three 6/6 double hung sash windows. The north elevation of the depot has a clipped gable. A platform or loading dock spans the north elevation and continues down the eastern elevation to the projecting bay and also down the west elevation, stopping just short of the box bay. The platform approximately delineates on the building's exterior the freight room located on the interior. In the platform area are five cargo doors and two single-leaf entrances.

The depot is a one story, ten by four bay building resting on piers. It features a variety of window styles with the most common being 6/6 double hung sash. Its exterior wall treatment consists of a board-and-batten "wainscoting" above which the exterior walls are clad in asbestos shingles.

On the interior, the Quitman depot features cross panel doors and beaded board walls and ceilings. The walls display beaded board wainscoting with a chair rail and also beaded board above the wainscoting.

The only Sanborn map for Quitman that dates from the period of significance shows that two spur tracks ran along the depot's east side in 1930. They have since been removed. The building retains its 1930 configuration as depicted by the map. A couple hundred feet to the south of the depot and on the east side of the spur track was a one story freight shed which is no longer extant (Sanborn Fire Insurance Map 1930).

The depot in Quitman is located on the east side of the railroad track, just west of the junction of Main Street and Railroad Avenue. A large parking lot separates it from Railroad Avenue. There are no plantings or any landscaping around the depot.

Clarke County, Mississippi Multiple Property Submission Quitman Depot

The Quitman railroad station, located on the old Mobile and Ohio line in the central business district, is eligible for the National Register under Criterion A for transportation and under Criterion C for architecture. Built c. 1910, the Quitman depot symbolizes the importance of transportation facilities to industrial growth in Clarke County. The depot is an archetype of the station that was built in small towns all across the United States from the late 1830s to the 1930s. It is the only extant example of a combination passenger/freight depot in Clarke County and retains a high degree of architectural integrity.

In 1900, the Mississippi Lumber Company established a sawmill and mill village in Quitman which was located on the Mobile and Ohio Railroad, an important carrier of lumber from the Piney Woods region. Long Bell Lumber Company purchased this facility in 1917 and operated it until 1931 when the mill was shut down. The Quitman railroad station was constructed c. 1910 during a great period of prosperity for the community that was based on the lumber industry. It illustrates the significance of the railroad network to Quitman's industrial development and prosperity during the period c. 1910 to 1931. For more information please refer to the Multiple Property Submission Cover Document, pp. E-6, E-13, E-20 to E-24 and F-14 (Hickman 1962:158, 179 & Primm, 18 Dec. 1980:B-1).

By the late 1830s a definite form had evolved for railroad stations that would dominate their design for the next one hundred years. It comprised a one story, frame building with a projecting bay on the track-side elevation and a wide, overhanging roof. The purpose of the overhanging roof was to protect passengers and railroad workers from the weather. The station's floor plan generally consisted of one or two passenger waiting rooms, at least one freight room and the centrally located agent's office. The projecting bay on the track-side elevation was the agent's bay and enabled him to see the train movements. This was probably the most accepted form for Clarke County's railroad stations (Harwood 1985:129).

The Sanborn Fire Insurance Maps illustrate the depots that were located in Shubuta, Enterprise (the New Orleans & Northeastern station) and Quitman. No documentation was uncovered for the M & O depots in Enterprise and Stonewall. By 1895 Shubuta had a freight depot and a passenger depot. Each was a one story, frame building with an overhanging roof. The passenger depot is no longer extant. The deteriorating freight depot has lost a great deal of architectural

Clarke County, Mississippi Multiple Property Submission Quitman Depot

integrity and has been moved from its original site. The New Orleans & Northeastern station in Enterprise was first recorded on the 1906 Sanborn map, although it must have existed earlier. It was a typical one story building crowned with an overhanging roof that combined the passenger and the freight activities. The railroad station at Quitman, though modest, was Clarke County's most sophisticated example of a depot, judging from the available documentation. It followed the railroad station archetype but also incorporated a porte-cochere under its overhanging roof (Sanborn Fire Insurance Maps 1895 & 1906).

The Quitman depot is structurally sound and retains a high degree of architectural integrity. Efforts are underway by Historic Clarke County, Inc. to preserve the building for use as a county museum and community center. There is strong, countywide support for this endeavor.

Clarke County, Mississippi Multiple Property Submission Quitman Depot

VERBAL BOUNDARY DESCRIPTION: The boundary of the nominated property consists of a rectangle, the center of which is located at the center of the roof ridge. Measuring forty feet to the north and to the south from the center of the roof ridge and fifteen feet to the east and to the west from the center of the roof ridge, the resulting rectangle of land has sides that are eighty feet long and thirty feet wide and that run parellel or perpendicular to the ridge of the roof. This property is located in the SE 1/4, Section 2, T 2 N, R 15 E.

BOUNDARY JUSTIFICATION: The depot is located on a large parcel of land that is owned by the railroad company. There is nothing else of any historical or architectural significance located on this parcel. As of the summer of 1993, the depot itself is owned by Historic Clarke County, Inc. The boundaries were drawn to include the architecturally significant depot and exclude other buildings and structures in the area.
