Describe the present and original (if known) physical appearance

• The Grand Concourse Apartments is a four-story, multi-unit residential building designed in the Mediterranean Revival style. The building is irregular in plan with a central, four-story mass flanked by a pair of projecting two-story wings. Construction is of concrete block with a rough textured stucco exterior. Significant exterior features include round-arched and pointed-arch openings, an hexagonal tower and a crenellated parapet with a blind arched beltcourse. Original fenestration has been replaced with jalousie windows. The building is located in a residential section of Miami Shores at the intersection of N.E. 4th Avenue and Grand Concourse.

The central four-story mass of the building is covered with a low clay barrel tile hip roof. This roof closely resembles the original which was replaced due to deterioration. The main entrance to the building is marked by a triple pointed arched opening. The arches are supported by octagonal masonry columns with molded masonry bands. The fourth story of the central mass is stepped slightly back from the lower three stories and is embelished with a pair of large cast masonry finials on the courtyard side of the building. An octagonal stair tower with pointed arched windows and a low barrel tile hip roof projects to the southwest of the four-story central block. The fourth story of the tower was originally open but has been enclosed as an apartment extension.

The south wing extends from the central mass at a forty-five degree angle, placing it parallel to N.E. 4th Avenue. This portion of the building is covered with a clay barrel tile hip roof. A pointed arch entry door at the center of the east facade provides access to the wing from the courtyard. A group of seven windows, separated by unfluted columns of Corinthian influence, fronts the second story of the east facade. A masonry balustrade is located beneath the windows. A central full-length window on the second floor has jalousie panes set in the original windows in the building.

The north wing of the building projects at a ninety degree angle from the central mass, placing it perpendicular to Grand Concourse. The wing is covered by a flat tar and gravel roof with a crenellated parapet. A blind arched beltcourse is located immediately beneath the parapet. A stairway with masonry banisters leads from the courtyard to a round-arched doorway at the center of the first floor. A small wrought iron balcony is located above this doorway. A small utility tower extends above the center rear of the wing.

The first floor of the central mass originally served as a lobby for the building. The south two-thirds of this space has been enclosed as an apartment although the northern third still retains an original cast masonry fireplace faced with marble and containing a terra cotta tile hearth. The building contains sixteen (originally fourteen) medium to small apartments. Some have been expanded from their original size by the enclosure of formerly screened porches. Masonry walls with rounded or pointed arched bays or vertically routed square wood columns remain in place. Air conditioning units have been installed in the exterior walls of most apartments. The jalousie windows were installed in 1943; the metal sash in 1956.

Two detached masonry vernacular garages constructed in 1926 and 1929 are located behind the building.

Statement of Significance (in one paragraph)

The Grand Concourse Apartments is significant as the only large, multi-unit building constructed as part of the Shoreland Company's master plan for a series of grand hotels and apartments in Miami Shores. The building is significant architecturally as a notable example of the Mediterranean Revival style designed by locally prominent architect, Robert Law Weed. The large size of the building, coupled with its prominent location at a major intersection make the structure a visual landmark in the community.

The Grand Concourse Apartments was the first large structure built as a part of a master plan by the Shoreland Company for a series of grand hotels and apartments in Miami Shores. It was the only one of these structures completed before the development company failed in 1928. The Shoreland Company and its president, Hugh M. Anderson, had acquired 2,800 acres of land along Biscayne Bay immediately to the north of the city of Miami and had begun developing the land as the Miami Shores subdivision in 1924. Anderson had previous experience in this type of project, having been a partner in the company that had developed the Venentian Islands between Miami and Miami Beach.

The Miami Shores development was envisioned as a self-contained community with retail shops and apartments in the downtown area along N.E. 2nd Avenue, an elaborate railroad terminal, a country club, marina and several luxury hotels and apartments, including a hotel for women. Streets and sidewalks were built, the shoreline dredged and filled, construction started on a number of private homes, and street lights installed, including along Grand Concourse. Grand Concourse street was laid out as a wide curving boulevard extending SW-NE from N.E. 2nd Avenue to Biscayne Bay, then continuing as a causeway across man-made islands to Miami Beach. The mainland section of Grand Concourse was to have a canal in the center of the street and to be lined with luxurious hotels, apartment buildings and private mansions.

The Shoreland Company began suffering financial problems following the 1926 hurricane and the resulting collapse of the South Florida real estate boom. In 1928, the company failed and its assets were acquired by its largest investor, Bessemer Properties, which continued the development of homes but abandoned plans for the large apartments and hotels.

The Grand Concourse Apartments was the only major structure on Grand Concourse completed before the 1926 hurricane. Three commercial structures had been built or were under construction on N.E. 2nd Avenue at the time of the storm. All three are still in use but have been severely altered. Foundations were built for two of the hotels, but construction was never resumed and their foundations ultimately were destroyed. The Grand Concourse Apartments is the only major structure built as part of the Shoreland plan that has not been severely altered, demolished or recycled for another use.

The prominent location of the Grand Concourse Apartments may have been one reason it was among the first structures built in the development. The building is located at an extremely wide intersection of three major strees, providing a sweeping view of the structure from all directions. Buildings surrounding the Grand Concourse Apartments are limited to one and two-story residences, making it a prominent visual landmark. Present zoning prohibits construction of another building of its size in the area.

Robert Law Weed, architect of the Grand Concourse Apartments, designed many structures in the original Miami Shores development and continued designing private homes in the community into the 1930s. Most of his early designs followed the Mediterranean Rivival theme of the Shoreland Company's development, but his designs reflect a delicate, airy Italian influence such as is seen in Grand Concourse Apartments, rather than other architects working in the development whose designs followed the more massive Spanish style. In 1929, he collaborated with Robertson & Patterson on the Miami Shores Elementary School, breaking from the Mediterranean Revival style to design one of Miami's earliest Art Deco buildings. Some of his other major designs include the Art Deco Mahi Shrine Temple in downtown Miami in 1930 (now the Boulevard Shops), the Florida Model Home for the 1933 Chicago World's Fair, and the 1935 General Electric Model Home on LaGorce Drive in Miami Beach. The Grand Concourse Apartments is the only existing large Mediterranean Revival structure designed by Weed that has been identified. Most of Weed's blueprints have been preserved in the firm's files and are being donated to the Woodrow Wilkins Archives at the Historical Museum of Southern Florida by the firm's present owner, Richard Johnson.

The Grand Concourse Apartments was designated a historic landmark of Miami Shores by the Village Council on February 1, 1983, one of the first properties so honored under the local historic preservation ordinance. It is the only structure of size in Miami Shores reflecting the original plans and dreams Anderson and the Shoreland Company had for their elaborate development.
