DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

Of Mission San José only a part of the living quarters remains today, a long one-story building of sun-dried brick made from native soil, which dates from about 1810. In 1916, the Native Sons and Daughters of the Golden West began work to preserve and restore this building, and a roof was put over the whole structure in order to prevent the winter rains from washing away the adobe walls. Further restoration was accomplished in 1950, and the building is now a museum. The adobe mission church was destroyed by the earthquake of 1868, and a steepled wooden church, which still stands, was erected soon thereafter on the old site. The present pastor, Rev. John Williams, who is very interested in history, has tentative plans to remove the wooden church to another location and reconstruct the adobe church according to old photographs and plans, under the guidance of Harry Downie, the eminent missionrestoration expert. Ultimately the entire complex would be reconstructed around the existing restored original building.

(Some thought might be given to the entire community of Mission San Jose, including the mission proper, as a historic district or complex. The settlement was an important way-station during the early American period, and a number of buildings remain from the second half of the nineteenth century.)

(Incidentally, the correct title of the mission is Mission San Jose, not Mission San Jose de Guadalupe. "De Guadalupe" refers to the Pueblo San Jose de Guadalupe, now the city of San Jose, a considerable distance to the south.)

The present dimensions of the building is about 7,968 square feet which is but a small fraction of the original.
