National Register of Historic Places
Registration Form

DEC 20 1988

NATIONAL REGISTER

This form is for use in nominating or requesting determinations of eligibility for individual properties. See instructions in *Guidelines for Completing National Register Forms* (National Register Bulletin 16). Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.

1. Name of Property Golden West Lodge Historic District
historic name Golden West
other names/site number Stehekin Lodge

2. Location Lake Chelan National Recreation Area
street & number Stehekin Landing not for publication
city, town Stehekin vicinity
state Washington code WA county Chelan code 007 zip code 98852

Describe present and historic physical appearance.

Golden West Lodge Historic District

This proposed district is located in the small community of Stehekin, in Lake Chelan NRA. Situated at the head of the fiord-like lake, the Golden West Lodge and its associated outbuildings have a strong presence on the land. The complex sits high on an uphill slope overlooking water and craggy snow-covered peaks--clearly sited to take advantage of the area's scenic views. The seven contributing buildings within the district were built between 1926 and 1945.

The Golden West Lodge was originally built to accommodate tourists in 1926. In function it replaced an earlier structure, the Field Hotel, which stood on land destined to be flooded because of a hydroelectric project downlake. When the Field was dismantled, building materials were salvaged and reused in the construction of the Golden West. The lodge was also built on the site of a former homestead and early Stehekin hostelry, the Mountain View House. Typical of the period's tourist accommodations, the Golden West was a spacious resort hotel which blended rustic simplicity with some elements of comfort and elegance. The landscape around the lodge is characterized by a series of dry-laid, rock-walled terraces and a cluster of small, one-room log cabins which were added to the property in the 1940s in response to a changing tourist trade. In earlier years a road allowed cars to travel from the landing (the arrival and departure point for Stehekin) up to the lodge, cutting through an open pine forest to reach the front porch of the Golden West. Circulation patterns in and around the complex remain much the same today; the road is now a pedestrian path supplemented by smaller, secondary walkways linking the cabins to each other and the lodge.

The lodge is characterized by its simple and functional appearance. Of wood-frame construction, it towers 2-1/2 stories over the smaller, rustic log cabins nearby. The gabled-roof is broken by small, gable-roofed dormers, and the building's symmetrical primary facade is accented by a central, 2-story entrance portico. A wide sill board delineates wood clapboard siding above from the mortared rock foundation below. This foundation may be --in part-- from the former Purple homestead which stood on the site from the late 1890s until 1926.

The individual log cabins are expressed in a more rustic manner. They are a combination of materials: cut logs and milled wood. All have gabled roofs and front and/or rear entry porches. One exception, known locally as "The House that Jack Built," is a cabin (#14) of notched log construction. The cabins are sited irregularly so as to appear less obtrusive in their natural setting. Behind the Golden West is a simple, wood-frame garage, contemporary with the lodge, and used for storage today.

Recreational Development: 1880s-1945

Since the late 19th century, hundreds of thousands of outdoor enthusiasts have been lured to the North Cascades for physical and mental challenge, rest and relaxation, and a scenic grandeur not found in their daily experience. Tourists made their way into this region via the east side as early as the 1890s; because of difficulties in access, the west side did not experience the arrival of tourists until well into the 20th century. Sightseeing, fishing, hunting, boating, horseback riding, and mountain climbing were some of the more favored activities. In 1899 the Portland Mazamas, the northwest's oldest mountaineering club, visited Lake Chelan and the Stehekin valley. Their presence was billed as being of inestimable importance in spreading information about ". . . a great but scarcely-known wonderland of the Pacific Northwest."

Tourists had more choices for lodging on the east side. Although camping was always an option, early travelers often chose the comfortable inns and hotels conveniently sited along the lakeshore between Chelan and Stehekin. The most prominent of these was the Field Hotel, situated at the head of the lake. Touted as one of the most popular resorts in the state by some, the Field Hotel had humble beginnings. It was originally built, owned and operated by George Hall, an early Stehekin settler and entrepreneur. Originally a simple 2-story wood-frame structure with a wrap-around porch, it was enlarged over the years to become an elegant hotel serving miners and tourists. The hotel facility was self-sufficient in every manner: a barn, woodshed, chicken house, ice house, and laundry building were all sited on the property. Land was cleared to grow hay for the hotel's packhorses, and fruit trees and vegetables were grown to supply hotel guests with the freshest produce available. This structure brought Stehekin a fame and recognition that was felt long after the hotel was razed in the 1920s with the raising of the lake.

Early settler and miner William F. Purple established the Mountain View House overlooking Lake Chelan shortly after his arrival in 1897. Purple's residence served as the inn, and by 1900, he had built a dock on the lakeshore with steps leading up to the house. The surrounding

National Park Service****National Register of Historic Places
Continuation Sheet**Section number 7 Page 2

Modest in appearance, the Golden West Lodge has not changed substantially since first constructed. It retains its original materials, design quality, scale, proportions, and workmanship. Alterations to the lodge include the reorienting of the front steps ninety degrees because the presence of a large pine tree adjacent to the original steps prevented free passage; handicap-accessed bathrooms added in the basement level of the lodge, recessed into the rubble foundation; and the removal of lattice-work from the lower porch. None of these changes have compromised the structure's integrity to a significant degree. Its use has changed from that of a resort facility to a seasonal visitor center by the National Park Service. The associated outbuildings--integral components of the historic complex-- also retain a high degree of integrity. Materials, workmanship, design quality, scale, and proportions have not been altered; only their use has changed, from strictly residential to a combination of commercial and residential. The landscape has changed minimally from when the complex operated as a resort lodge. However, only remnants of the former teardrop-shaped swimming pool (located behind the lodge) and fish pond remain, and a small, wood-frame structure formally housing lodge employees was removed from a lower terrace in front of the main building (and believed to have been less than 50 years old at the time of its removal).

The Golden West Lodge Historic District is significant on a local level for its associations with recreation and recreational developments in the North Cascades between 1926 and WW II. Further, it represents the only extant example of large-scale wilderness resort development in the North Cascades. The area nominated includes (approximately) 4 acres. See attached sketch map.

**United States Department of the Interior
National Park Service****National Register of Historic Places
Continuation Sheet**Section number 8 Page 2

landscape was embellished with ornamental plantings, rock-lined paths and terraces, and decorative rock piles. Tent platforms were located beneath trees for those guests who wished to sleep outdoors.

The Mountain View House functioned as a lodge until Purple left the area in 1918, selling his property to the power company developing hydroelectricity on Lake Chelan. The Field Hotel continued to serve tourists until the raising of Lake Chelan. The main portion of the hotel was then dismantled and materials such as windows, doors, stairways, and moldings were salvaged and reused in the construction of a hotel which stands today, the GOLDEN WEST LODGE (#6, 9-15/301 40-301 47).

Built in 1926 on the site of the old Purple homestead, the Golden West continued in the Field's tradition. Owner and local Stehekin resident Jack Blankenship built an inn which was fairly typical of the day's tourist accommodation: a spacious resort hotel located in a scenic area which blended rustic simplicity with some elements of elegance and comfort. Inside, the atmosphere was casual, with a grouping of davenport and chairs around a large native stone fireplace, all set in an open lobby. A dining room overlooking the lake was separated from the main lobby by a pair of french doors. A central stairway in the lobby led to a second floor and open balcony supported by massive peeled and varnished log posts. Blankenship had earlier built a small, one room rustic log cabin farther up the valley and moved it to a site north of the main lodge, for use as a rental cabin.

When the lake boat began making daily trips to and from Chelan, day visitors to Stehekin increased. Because they needed no overnight accommodations, the nature of tourism at the head of the lake changed. Fewer visitors came uplake, most preferring to remain downlake with their cars on roads which led them to new and perhaps more exciting places. World War II brought an end to most pleasure travel. Both lodges operating in Stehekin at the time, the Golden West and the Rainbow, closed their doors.

After wartime travel restrictions and gas rationing were lifted, only the Golden West re-opened for business. To expand their facilities, the lodge's new owners built five small log veneer and wood-frame cabins, adding to the one built earlier. Fully furnished and fitted with plumbing and electricity, the rustic cabins allowed guests to come and go as they pleased and added a new dimension to the resort on the lake. A small swimming pool was built behind the lodge and kept filled with water diverted from Purple Creek; a fish pond and shuffleboard court were also added to the site. Rock walls and terraces, and flower beds and fruit trees further enhanced the picturesque quality of the Golden West.

The lodge went through a series of owners and proprietors over the years of its operation. The short tourist season and the distance from supply centers were partially responsible. After the establishment of the national park in 1968, the company which owned the lodge sold its interest in the property to the government. Today, the Golden West represents the oldest large-scale resort in the national park. It has not changed substantially since first constructed. Though no longer used in its

Continuation Sheet**

Section number 8 Page 3

original capacity(it is a visitor center today),it remains an important part of the Stehekin landscape. A well-defined historic district, it is significant for its association with the Field Hotel and the recreation theme, and for its status as the only extant example of a major wilderness resort in the North Cascades. The complex retains its cluster of associated outbuildings and many landscape features including a sophisticated series of rock-walled terraces. Although the five rustic log cabins do not meet National Register age requirements, they were built as an integral part of the Golden West Lodge operation, expanding the lodge's ability to accommodate ever-increasing numbers of recreationists. They are significant additions to the historic scene,and are integral parts of the historic district which meets criteria for listing.

SIGNIFICANCE *The GWL HD is significant under Criterion A: for its association with recreational development in the NOCA; and under C: as the only example of early resort architecture in NOCA. The complex as a whole exemplifies how a rustic resort evolved to accommodate changes in the recreation industry over time. Although the cabins are only 1 year away from meeting Nat. Reg. age requirements, these rustic buildings were built specifically as integral components of the GWL resort to enhance its operation. They reflect the changing nature of the tourist business: originally the lodge provided accommodations; as tourists needs and demands turned to more private lodgings, the GWL owners responded by expanding their operation to include self-contained units in proximity to the main lodge. Tourists in the cabins still had use of the main lodge. As a complex, the GWL HD possesses integrity of design, location, setting, materials, workmanship, feeling, and association. Park managers intend to manage the complex as a property eligible for the Nat. Reg.*

DESCRIPTION AND BACKGROUND HISTORY INCLUDING CONSTRUCTION DATE(S), PHYSICAL DIMENSIONS, MATERIALS, MAJOR ALTERATIONS, IMPORTANT BUILDERS, ARCHITECTS, ENGINEERS, ETC. <i>(continued from card one)</i> <i>the new lodge site. By 1928 the lodge was operating and grew in size over the years. Several cabins and outbuildings were built in 1940 and a teardrop-shaped swimming pool constructed of native rock and cement (with a waterfall at one end) was put in. A gambrel-roofed sleeping cabin was erected directly behind the lodge near the garage and workshop. The cabins were rented to guests, and each one was outfitted with cooking facilities. Other features added over time included concrete walks, a stone fountain, a lily pond with a wishing well, a concrete shuffle board, and terraced stone paths. Guests in the 1920s included individuals with mining interests in Horseshoe Basin. Blankenship operated the lodge until 1940 when he sold to George and Peter Miller. The Miller family owned the lodge in the early 1940s and expanded the operation by opening up the lodge's third floor and building cabins. They sold to Glen Ashmead in 1945. Ashmead added another cabin to the complex. The lodge closed down during W.W.II but reopened shortly thereafter. After the Ashmead's sold the lodge the property went through a series of owners until a Seattle corporation purchased it in 1967 and renamed it the Stehekin Lodge. The small cabins became housing for lodge employees. The National Park Service bought the property in 1969. In 1976 six outbuildings east of the lodge were demolished, having fallen into disrepair; six cabins and the garage remain. The only principal change to the lodge itself occurred in 1981 when public restrooms were added in the lower level.</i>			CURRENT USE		ORIGINAL USE

DESCRIPTION AND BACKGROUND HISTORY INCLUDING CONSTRUCTION DATE(S), PHYSICAL DIMENSIONS, MATERIALS, MAJOR ALTERATIONS, IMPORTANT BUILDERS, ARCHITECTS, ENGINEERS, ETC.			CURRENT USE <i>NPS housing</i>		ORIGINAL USE <i>Rental cabin</i>

Cabin. Wood frame set on stone and mortar foundation (concrete partial); rectangle (18' x 21') with screened porch (8' x 5') on north; 3 bays wide; 1-story (with loft inside); vertical 1/2-round log construction with vertical boards on gable ends; wood-shaked gable roof with slightly extended eaves and exposed log rafters; center entrance on south with wood door and split log surrounds; metal stovepipe on east slope. Exterior features include horizontal 4-pane casement sash with split log surrounds; 1/1 double-hung sash with plain surround and split log surround; square, screened opening with interior wooden shutter on north; log fascia boards; raised entrance deck with log railings on south supported by rock and concrete piers; pedimented porch on north with vertical wood board siding with screens above and log posts.

This rustic cabin was built by the Ashmead's in 1945-46 when they owned the Golden West Lodge property. It was built as a rental cabin. The addition of incompatible materials (clapboards) on the cabin's northeast corner is the only noticeable alteration.

SIGNIFICANCE

This building is an important and integral component of the Golden West Lodge complex. Although built later, this cabin's use of natural materials is consistent with the earlier structures' rustic appearance and thus contributes to the "wilderness-resort" atmosphere of the complex as a whole. It possesses integrity of design, materials, location, setting, workmanship, feeling, and association.

---	----------------------------------	-------------------------------------

Cabin. Log construction set on rock foundation; square (14' x 14') with wood frame addition on east (9' x 14'); 3 bays wide; 1 1/2-stories; round logs with hewn planked ends and square-notched corners and wood shingle siding on gable ends; wood-shaked gable roof with extended eaves, exposed rafter ends, gable overhang on east; center entrance on east with wood-paneled door. Exterior features include 3, 6, and 9-pane hinged sash, some with plain surrounds; 6-pane sliding sash; 1-story, shed-roofed raised addition with wood shingle siding; shed-roofed porch on addition's north wall with wood-paneled door.

This cabin is believed to have been built by Jack Blankenship in the 1920s and moved to its present site c. 1926 from an undetermined location. The wood frame addition (once housing a kitchen and bathroom) may have been added in the 1940s when the lodge complex was expanding. A new roof was installed in 1982.
