National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name Maddux House
other names Maddux's Island, Maddux's Warehouse, Inclosure, Captain William T. Ford House S-160

2. Location

street & number 9084 Maddox Island Road not for publication
city or town Upper Fairmount x vicinity
state Maryland code MD county Somerset code 039 zip code 21867

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1966, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments).

[Signature] 11-14-02
Signature of certifying official/Title Date
State or Federal agency and bureau

In my opinion, the property meets does not meet the National Register criteria. (See continuation sheet for additional comments).

Signature of certifying official/Title Date

Narrative Description

(Describe the historic and current condition of the property on one or more continuation sheets)

Description Summary:

The Maddux house is located on a high ridge of land on a parcel historically known as Maddux's Island, which is located north of Upper Fairmount in Somerset County, Maryland. The two-story, six-bay, ell-shaped frame house faces southeast with the principal gable roof oriented on a northeast/southwest axis. On the northwest side of the house is the Manokin River and to the east is Back Creek. The property is approached by a long dirt road that crosses an expansive tidal marsh that surrounds the high ground on which the nominated house is located.

8. Statement of Significance

Applicable National Register Criteria

(Mark "X" in one or more boxes for the criteria qualifying the property for National Register listing)

- A** Property is associated with events that have made a significant contribution to the broad pattern of our history.
- B** Property associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "X" in all the boxes that apply)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

Narrative Statement of Significance

(Explain the significance of the property on one or more continuation sheets)

Area of Significance

County and State

Section 7 Page 1

Built in three distinct phases, the earliest portion of the Maddux house is a two-story, 29' x 20' timber frame structure erected during the last quarter of the eighteenth century. Around 1825 the eighteenth-century house was significantly improved with a new layer of Federal woodwork. Lastly, around 1850-60, the eighteenth-century dwelling was enlarged in two directions with substantial two-story additions to the southwest and northeast. Joining the house on the nominated lot is a non-contributing single-story, concrete block garage. Also on the property but not part of the nomination is a small family cemetery.

General Description:

Assembled in three periods, the Maddux house is a two-story, six-bay, ell-shaped frame house supported on a continuous brick foundation and the structure is sheathed with asbestos shingles. The steeply pitched roofs are covered with a layer of tin over wood shingles. The earliest portion of the house is the eastern three bays of the main block, which was erected around 1780 on a Flemish bond brick and stone foundation. The wrought nail frame structure stood unfinished for several decades and was not fitted with interior trim until the second quarter of the nineteenth century. The eighteenth-century frame structure was finished with Federal woodwork common to the 1820s and 1830s. Around 1850-60, the eighteenth-century frame dwelling was enlarged to the southwest with a two-story, side hall/parlor plan frame addition trimmed with Greek Revival woodwork. To the rear is a two-story, one-room plan service wing.

The southeast (main) elevation is a six-bay façade with an entrance in the third bay from the southwest corner. The mid nineteenth-century six-panel front door is framed by a five-light transom and three-light sidelights. The adjacent bays are fitted with six-over-six sash windows. Distinguishing the western window openings as well as the front door are plain surrounds topped by shallow pediment surrounds. The three windows east of the entrance are framed by narrow beaded edge surrounds. The second floor is lighted by six window openings; the three windows that light the mid nineteenth-century addition are framed by plain surrounds with shallow pediments. The eastern three windows are framed by narrow, beaded edge surrounds. Trimming the base of the roof is a mid nineteenth century boxed cornice with period bed and crown moldings. Piercing the roofline are three chimney stacks. A center stack and the western stack have two flues each and are distinguished by a dentiled brick cornice. The single flue brick stack at the east end has a dentiled cornice as well.

The southwest gable end is pierced by a symmetrical fenestration of six-over-six sash windows on the first and second floors. All of the windows are framed by plain surrounds with shallow pediment lintels. The attic is lighted by four-over two sash windows. Trimming the edge of the roof is a molded bargeboard.

The northeast (rear) wall is partially covered by the two-story, one-room plan rear wing. The section of wall not covered by the wing is pierced by a combination of early and mid

County and State

Section 7 Page 2

nineteenth-century window and door openings. Located in the eastern of the four bays is a nine-over-six sash window that lights the one of the room in the eighteenth-century section. The rear hall entrance is fitted with a mid nineteenth-century six-panel door and to the west are mid nineteenth-century six-over-six sash windows topped by shallow pediment lintels. The easternmost bay is defined by an early nineteenth-century six-over-six sash window.

The balance of the rear wall is covered by the two-story, two-bay, one-room plan rear wing built around 1860. The first and second floors are lighted by six-over-six sash windows which are trimmed with shallow pediment lintels. The windows on the north gable end flank an interior end brick stack finished with a decorative cap. Attached to the east side of the wing is a single-story, gable roofed frame pump house.

The east gable end of the main block is pierced by a combination of six-over-six sash window openings and a six-panel door that provides a side entrance into the present kitchen. The window openings flank an interior end brick stack finished with a decorated cap. The edge of the roof has an extended eave with returns at the base of the roof.

The interior combines elements of eighteenth- and nineteenth-century architectural finishes. The main entrance opens into a wide stair hall that survives with a mid nineteenth-century staircase. A turned mahogany newel post and series of tapered round oak balusters support a ramped handrail. The stringer is embellished with a graceful scroll decoration. Below the stringer the wall surface is treated with five vertical panels framed with a Greek Revival edge molding. The perimeter of the room is trimmed with a high baseboard topped by an ogee cap molding.

West of the stair hall is the parlor, which is entered through a doorway trimmed with a Greek Revival surround featuring side pilasters that rise to a shallow pediment lintel. The mid nineteenth-century six-panel door retains a layer of dark brown graining executed in an oak pattern. The parlor interior is lighted by six window openings which are framed by elaborate Greek Revival surrounds with shallow pediments and pilasters that stretch to the floor and flank flat panels below the window sills. A paint decorated slate mantel that framed the firebox was taken from the house several years ago. The perimeter of the room is fitted with a high baseboard molding topped by a decorative cap.

East of the hall is a narrow dining room that features a Federal mantel and a Federal chair rail molding. The mantel has tall proportions with an early nineteenth-century backband molding that frames the firebox. The firebox surround supports two plain end blocks, which in turn, visually support a boldly molded and broken mantel shelf. The doors and windows were retrimmed during the mid nineteenth century with bold, crosssetted surrounds featuring heavy ogee backbands and shallow pediment lintels. A four-panel door, framed by crosssetted Greek Revival surround, is located in the northwest corner of the room and opens into a small closet under the staircase.

County and State

Section 7 Page 3

Adjacent to the dining room is the current kitchen, which is simply finished with plaster walls and a plain mid nineteenth-century mantel on the east wall. The mantel has plain pilasters, a plain frieze, and a thick board shelf.

North of the kitchen is a rear service stair as well as an additional first floor room which has been converted into rustic den. An exposed brick chimney with a corbelled base is centered on the north wall. The plaster ceiling has been removed from this room to expose the mid nineteenth-century joists.

The second floor of the ell-shaped house is divided into five principal chambers. The parlor chamber at the western end of the house is finished with mid nineteenth-century woodwork including shallow pediment surrounds that frame the door and windows as well as a mid nineteenth century mantel centered on the west wall. The mantel has plain pilasters that rise to a plain board frieze topped by a thick board shelf. The perimeter of the room is fitted with a plain baseboard.

The adjacent stair hall is dominated by the continuation of the main stair which provides access to the finished attic. The handrail ramps before each newel post and the stringer is embellished with the scroll decoration. The window and door openings in the hall are framed by shallow pediment Greek Revival surrounds. The second floor has several reused six-panel doors dating from the eighteenth- and early nineteenth centuries.

The dining room chamber is a narrow room fitted with a mid nineteenth-century mantel and eighteenth-century window and door moldings. The narrow eighteenth-century molded surround consists of a half-inch backband finished with a half round profile which stands forward of a plain inner surround trimmed with a beaded edge. The eighteenth-century surround on the inner wall frames a raised six-panel door.

The inner door in the dining room chamber opens into a back hall that provides access to another chamber in the southeast corner as well as a bathroom and the rear service staircase. The southeast chamber, entered through a raised six-panel door, is plainly finished. The chamber on the north side of the service stair is trimmed with mid nineteenth-century woodwork that includes a plain Greek Revival mantel and plain window surrounds. A mid nineteenth century paneled door in the southeast corner of the room has a grain painted finish.

The attic of the house is partly finished and partly unfinished. The space over the mid nineteenth-century addition is roughly plastered. Riven lath is evident where sections of plaster is missing. A small board hatch opens into the unfinished section over the eighteenth-century section. Evident within the eighteenth-century roof frame are wrought nails that fasten collar beams to common rafters. The end wall studs in many places are fastened with wrought nails as well. An inside surface of shiplap siding, now covered on the exterior, is evident in places on each gable end. The common rafters rest on a board false plate.

A crawl space is accessible under the eighteenth-century section, where the stone and brick foundation is clearly evident. The floor framing for the eighteenth-century section was replaced during the nineteenth century. One floor joist has beaded edges and was taken from

another structure and reused when the floor was reworked. Located at the west end of the crawl space is an arched niche associated with the center stack. Directly adjacent to the stack on the north side are the remnants of several timber steps and a bulkhead entrance that was covered over when the mid nineteenth-century addition was attached.

County and State

Section 8 Page 1

Summary Statement of Significance:

Located on an isolated site on a ridge surrounded by river and marsh landscapes, the Maddux house derives its significance from three periods of distinct architectural change, thereby representing the process of rebuilding that took place in phases across the lower Shore between 1780 and 1860. Encapsulated in this six-bay house is a late eighteenth-century frame structure that was modified initially around 1820-30 with a layer of Federal woodwork. A second and more extensive rebuilding took place around 1850-60. The blend of these architectural forms and finishes reflects the changing priorities and needs of the Maddux family, principally Henry S. Maddux, as he and wife were influenced by traditional vernacular plans and nationally popular architectural woodwork.

The isolated site of Maddux's Island was developed as a location of export and import during the late eighteenth century when a road was built across the marsh to access this high parcel of land and the deep water moorings off shore. As a location for the transshipment of local goods and produce, it served the population of Somerset County and the lower Shore during the preindustrial era when the Manokin River was a principal artery of transportation and communication.

Resource History and Historic Context:

Construction of the late eighteenth-century two-story frame section of the Maddux house occurred during the ownership of John Maddux (1720-1801), who inherited the lands through his father Thomas Maddux's will, filed in the Somerset County Courthouse in 1763.¹ Thomas Maddux had the 590 acres of his land resurveyed in 1740 as "Maddux's Inclosure." At some point during the ownership of Thomas Maddux, or his son John, a road was built across the marsh to the ridge of land bordering the Manokin River. By the time Dennis Griffith published his map of Maryland in 1795, "Maddux's Warehouse" was a key location in the region and warranted inclusion as an important site.

Four years later, the Federal assessors visited the Maddox Inclosure tract and described its improvements. John Maddux was the owner and occupant of

1 Dwelling House built of wood 28 feet by 20 feet, Two Story high, 10 windows, 5 feet by 2 feet, 1 Cook House 16 feet by 12 feet, 1 Milk House, 8 feet square, 1 Smoake House, 8 feet square, the Dwelling House never was Finish'd, the others Houses Indifft.²

The land assessment described the river plantation as,

Section 8 Page 2

1 Tract of Land called Maddux's Inclosure, 590 acres on which is 1 Store House 20 feet by 16 feet, one story high of wood, 1/2 acre deducted, the above Land near all marsh.³

The slave schedule in the Federal Direct tax assessment states that John Maddux owned 29 slaves, 9 of whom were between the ages of 12 & 50.⁴

The 1798 tax assessment clearly identifies a 28' by 20' frame structure on the property. The dimensions of the eastern half of the main block agree in size, and the wrought nail construction found in the roof frame indicates that the extant house and the unfinished frame structure listed in 1798 are one in the same. The dwelling was joined on the site with a normal assortment of outbuildings as well as the 20' by 16' "store house," which points to the commercial nature of the site.

John Maddux died three years later, and in his 1801 will he bequeathed to his wife Sarah "all plantation whereon I now live for her natural life and the use of personal estate" and after her decease the property was to be divided between Daniel Maddux (son of Daniel) and Littleton Dennis Maddux (son of Elzey).⁵

The northern portion of the Maddux's Inclosure" plantation went to Daniel Maddux, who held title to the island property until his death in 1819. In his will he states

I give and devise unto my son Daniel Maddux all that part of the land and marsh which was left to me by my relation John Maddux, deceased....beginning at the mouth of Cedar bridge gut, thence running up said gut to the Warehouse Road and thence with the said Warehouse Road to the extent of the said land...⁶

Maddux's Warehouse was an important fixture in the region during the late eighteenth and early nineteenth centuries, and its significance is inferred in the diary of Thomas Seon Sudler, a local planter, who owned Sudler's Conclusion. On November 16, 1799, Thomas Seon Sudler commented that he had "carried two hogshead of tobacco to the warehouse." A second item, entered on March 19, 1802, states that he had 7 hogshead of tobacco inspected at Maddux's Warehouse from where they were shipped.⁷

By the early 1820s Daniel Maddux's son, Henry S. Maddux was in possession of the Maddux Island plantation. Henry Maddux married Ann S. Turpin on September 23, 1823 and it was probably after this event that the old and unfinished eighteenth-century frame house was fitted with Federal woodwork. Henry S. Maddux resided on the island plantation through the

extent of his life. He is listed in the 1850 United States census as a 54-year old farmer with his wife Ann, another adult, Major Maddux, aged 65, as well as two daughters, Elizabeth and Ellen, and a son Gustavus.⁸

In 1858, Gustavus A. Maddux married Elizabeth Ballard Maddux, daughter of Daniel Maddux.⁹ In his last will and testament Henry S. Maddux left his estate to his wife Ann during her widowhood, and then to his son Gustavus.¹⁰ Gustavus and Elizabeth Maddux retained ownership of the island property until July 1871 when they transferred ownership to William T. Ford for \$7,100, excepting a small parcel containing the family burial ground.¹¹ Captain William T. Ford is located on the island site on the 1877 Fairmount map contained in the Lake, Griffing, and Stevenson Atlas, and he is listed in the patron list as a "sailor and a farmer" with ownership of 50 acres.¹² Captain Ford retained ownership of Maddux's Island through the balance of the nineteenth century and until 1904 when it passed to Herschel Ford.¹³ During the twentieth century "Maddux's Island" has passed through several owners. Despite many owners, few modifications were made to the house during the twentieth century. In April 2001, the present owners, John Orth and Dana Simson, acquired approximately 300.42 acres, of which 45.38 acres is high ground.¹⁴ A small parcel of 1.17 acres with the house has been isolated for the purposes of the nomination.

Maddux House, S-160

Name of Property

Somerset County, Maryland

County and State

Section 10 Page 1

Verbal Boundary Description:

Beginning at a point marked "A" on a plat drawn by George E. Young, III, as recorded as a "Minor Subdivision of the lands of Richard J. Bouchard, et als., recorded in the Somerset County Land Record 292/461 along the course of the Manokin River, thence by and with the course of the Manokin River for a distance of 170' to a point along the said Manokin River marked "B" on the plat, thence by and with a boundary line in a southeasterly direction for 300' to a point marked "C" to a point coincidental with the Young survey, thence North 63 degrees 21 minutes 52 seconds East for 98.76' to a point marked "D", which is coincidental with a lot line on the Young survey, thence North 16 degrees 35 minutes 54 seconds East for 110.97' to a point marked "E", which is coincidental with a lot line on the Young survey, thence North 51 degrees 41 minutes 39 seconds West for 325.06' feet to the place of beginning marked "A" containing approximately 1.17 acres more or less.

Boundary Justification:

The 1.17 acres that join this house in nomination is the immediate ground surrounding the house and includes the expanse of yard between the house and the Manokin River. The boundary line is partially coincidental with the current lot lines. Other than the single course that runs along the edge of the Manokin River, the balance of the boundary lines are completely arbitrary in relation to the historic landscape.

Proved
4/13/1819

Daniel Maddux
I give and devise unto my son Daniel Maddux all that part of the land and marsh which was left to me by my relation John Maddux, deceased....beginning at the mouth of Cedar bridge gut, thence running up said gut to the Warehouse Road and thence with the said Warehouse Road to the extent of the said land to heirs and his heirs forever....

I also give and devise unto my son Daniel part of my dwelling plantation as followeth—all all my woodland, one negro boy named Cesar, and one named Isaiah...
I give and bequeath unto my two sons William and Daniel Maddux my still & worm with equal priviledge to said still & worm to each & their heirs...
