DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The United States Post Office in Winona is located in the central business district. It is Colonial Revival in style. A brick basement level rises above grade to a very wide, double-course limestone water table. The elevated main floor is made accessible by a flight of limestone steps in two runs with cast iron railings. The exterior walls consist of one full story crowned by a limestone frieze, cornice and brick parapet which is continuous on all four sides. A tile-covered mansard roof above the cornice line conceals a partial mezzanine level which has a flat, built-up roof in the interior. Windows in this level are recessed dormers with wooden casement sash; these correspond to window bays in the main level. The street facade consists of five bays reading window-window-door-window-window. The central doorway is highlighted by a portico with two, limestone, Corinthian columns in antis supporting an architrave and a modillioned limestone pediment. The doorway is flanked by a pair of wooden pilasters. A transom light above the doorway is unique--a leaded glass window with an eagle motif. A medallioned architrave and cornice, both wood, complete the detailing. Additionally, two masonry abutments flank the stairs in front of the portico and two free-standing lanterns are positioned on them. Windows in the main facade are wooden, double hung, twelve over twelve sash with limestone lintels and flat brick arched lintels with limestone keystones. Unadorned limestone panels set flush with the brick are positioned above each window. The east and west facades each consist of six bays of windows. A mailing vestibule and platform project from the center of the rear (north) facade. Brick masonry laid in the common bond is used throughout and quoins articulate the building's corners. A full basement level exists.

The interior plan (see attached plan drawings) consists of an L-shaped public lobby with a staircase to the mezzanine level next to the west wall. The postmaster's office is located behind the staircase. The remaining first floor space is given over to a large workroom. A lookout gallery is positioned over the vault area. The mezzanine level contains space for governmental offices and storage. The lobby contains a polychrome glazed tile floor, wooden wainscoting, an altered screenline; the original entry vestibule remains intact.

BUILDER/ARCHITECT

Unknown

Office of the Supervising Architect

STATEMENT OF SIGNIFICANCE

Politics/Government

The first Public Buildings Act of 1913 and the second Public Building Act of 1926 were supplemented in 1933 by Congress, on the urging of Franklin Delano Roosevelt, with the Federal Emergency Administration of Public Works. Between 1933 and 1941 a tremendous amount of construction resulted in the United States, including four post offices in Mississippi constructed under the 1926 Act and thirty-two post offices in Mississippi constructed under 1933 PWA legislation.

The U.S. Post Office in Winona, Mississippi, built in 1932, is significant as one of four constructed in the state under the Public Buildings Act of 1926. It was designed by the Office of the Supervising Architect. The building also holds the distinction of being the first federal building constructed in Montgomery County. The Post Office in Winona, Mississippi was a part of a stepped up Public Works program designed by Herbert Hoover to relieve unemployment during the early stages of the Great Depression. (See also narrative entitled "Federal Construction Work 1913-1941").

Architecture

This Post Office, the City Hall and Courthouse, represent the three most important governmental public buildings within the community. Of the thirty-six post offices within this thematic nomination all but six of them were designed in the Colonial Revival Style, or at least show influences of this style; the Winona structure recalls both Georgian and Federal Styles with its meticulous brickwork and limestone articulation. The projecting limestone portico with twin columns in antis is the most notable feature. Nobly proportioned and carefully detailed, this portico produces a refined monumentality which is unequaled elsewhere in Winona.
