National Register of Historic Places Continuation Sheet

Section number 7 Page 1

RECEIVED 413
APR 7 1995
INTERAGENCY RESOURCES DIVISION NATIONAL PARK SERVICE

Description

Spanning a tributary of Driver's Creek on County Road 2E (approximately 1.2 miles northwest of the end of State Highway 389), the Van Buren County Road 2E Bridge is of the open masonry substructure type. It consists of three spans, the longest of which is 12 feet. The total bridge length is 36 feet, the curb width is 19.9 feet, and the maximum width is 21.5 feet. The two piers and the two abutments are stone and concrete, and the deck is a gravel and asphalt mix over a concrete bed.

National Park Service**

**National Register of Historic Places
Continuation Sheet**

Section number 8 Page 1

Significance

Constructed in 1940 under the auspices of the Works Progress Administration, the Van Buren County Road 2E Bridge is associated with the *World War II Era* historic context and is of the open masonry substructure type. Though the identity of its original designer does not survive, it was constructed in conjunction with the Arkansas State Highway Commission and thus may well have been designed by one of that state agency's engineers, if not by one of the public works engineers. Given its relatively intact condition it retains sufficient integrity to remain associated with both the WPA and its historic period; it is thus locally eligible under Criteria A and C.

ABSTRACT/SUMMARY COMMENTS:

The Van Buren County Road 2E Bridge is significant under NR Criteria A and C as a good intact example of bridge construction from the period 1940-1945. The bridge was constructed as a WPA-funded project in conjunction with the early 1940-era efforts of the Arkansas State Highway Commission. The selection process for identifying eligible bridges under this study involved the review and evaluation of approximately 300 bridges in the State.
