

WARNING: Disinfectant in this water is intended to kill germs that cause illness and to help prevent the spread of disease. It does not make water safe to drink. To make water safe to drink, you must boil it for 1 minute. If you are in a high-altitude area, you must boil it for 3 minutes. Pour water between two containers to "kill" bugs after the water has cooled.

is being handled in a "Pack it upPack it out" cabin. You are required to use the highest of 3 primary packs, including this, which are for use in areas of frequent signs and other obvious electricity and heat.

is to be used with care and should comply with Coast Guard regulations regarding hazardous materials for each person on board.
