Appendix B

DENNIS BAY HISTORIC DISTRICT

DESCRIPTION:

Dennis Bay Plantation is located on the small peninsula that seperates Trunk and Hawknest Bay. The lands of the plantation included the relatively flat and easily arable land of the peninsula as well as the steep hillsides to the south of it.

The plantation was claimed and cleared by 1728 and appears to have been devoted very early to the cultivation of sugar cane. The plantation buildings included a windmill tower and a horsemill sited on the high bluff on the west side of the peninsula, both post-dating 1800, while the rest and older buildings of the plantation are clustered on the shoreline of Dennis Bay between 200 and 250 yards east-northeast of the windmill tower. From east to west they are the Plantation House, the Factory Building, the Still and a Storage Building, the original Horsemill, an Oxpound and Stable, a village with 5 standing masonry cabins, as well as a small masonry bridge, walls, gateposts, drinking troughs and 2 wells and the remains of a masonry aquaduct for conducting the canejuice from the windmill site to lower elevations of the factory. This latter feature and the masonry cabins of the village are unique for St. John plantations.

The plantation house is the best preserved example of the traditional type within the V.I. National Park.

The buildings of Dennis Bay have exceptionally well executed masonry work and although quite simple in general design are of interest for their rarity and architectural quality.

STATEMENT OF SIGNIFICANCE:

Dennis Bay is significant because of its many well preserved buildings from the 18th and early 19th centuries of a well developed sugar producing plantation and for their architectural interest.

There are no UTM References on any published maps of the U.S. Virgin Islands.

VERBAL BOUNDARY DESCRIPTION

Dennis Bay Historic District is bordered to the east, north and west by the North Atlantic and to the south by the North Shore Road. The boundaries include the presence of all parts of the historical resource and their setting defined by the natural barrier of the sea and the man made North Shore Road.

LOCATION OF STRUCTURE: 200 yards north of North Shore Rd at Dennis Bay UTM REFERENCE: A CLASS VI LAND ACREAGE (if not part of a complex or district: Zone Easting Northing acres.
STRUCTURE: Type of, and composition: Rectangular one story rubble masonry
building.
Physical Description: The one story rubble masonry still and storage building is located 4' south of the factory. It measures approximately 24'x30'. The still which
is built against the west side of the storage building is in ruins, and as in the factory
there are no apparent traces of the chimney. The cistern for the cooling coils of the
still has been preserved and retains water. The walls of the storage building stand
to a full one story height and the building has a corrugated metal shed roof. The
interior has been converted into residential use.
The texture, material and workmanship of the original walls are the same as in the
factory and the building appears to be part of the 18th century remains of the planta-
tion although the modern alterations tend to obscure its original character.

LOCATION OF STRUCTURE 200 yards north of North Shore Rd. at Dennis Bay	===
UTM REFERENCE: A CLASS VI LAND ACREAGE (if no part of a complex or distric zone Easting Northing acres	t:

STRUCTURE: Type of, and composition: A rectangular masonry and wood structure in two stories. Physical Description: The plantation house is a rectangular two story building placed immediately behind the berm of the beach of Dennis Bay and east of the factory. It has a masonry ground floor supporting a second story in wood construction with a hipped roof. A roofed second story wood gallery carried on masonry columns extend around the east, north and west side of the building. The exterior masonry staircases provide access to the second story, a modern one centered on the north side and an original one one the south side of the building at its east end. The latter is constructed in brick with masonry side walls that at the bottom of the staircase flare outward and terminate in cylindrical posts forming an "Open arms staircase" a typical feature of the late 18th century and early 19th century Virgin Islands architecture. The columns supporting the east second story gallery are 2' square piers and appear to be original while the columns of the north and west gallery are slender concrete columns of a more recent date. small concrete or concrete block addition has been made to the ground floor on the west side within the space of the gallery. The masonry of the first story is stuccoed and the exterior of the second floor is clapboard. The balcony rails of the second story are wood lattice work with picket gates at the head of the staircases.

PRESENT CONDITION: Excellent Good X Fair Deteriorated

Ruins Unaltered Altered X Original Site X Moved

The building is in good condition and is in use as a residence.

The date of its construction is not known, presumedly early 19th century appearance then can be assumed to be much the same as it is now except north and west gallery. The additions and changes were made, reportedly the 1930s.

A part of a complex or district: Zone Easting Northing acres.
STRUCTURE: Type of, and composition: A small arched bridge constructed in stone.
Physical Description: Dennis Bay Plantation was brought under cultivation at an
unknown date during the second quarter of the 18th century. Prior to 1780 it had
the basic facilities such as a mill and factory of a sugar producing plantation and was connected by road to Susanneberg plantation on the high ridge land to the
south. It can be concluded from the notable extension of cleared land indicated
on the Oxholm map of 1800 that it was an expanding operation during the last two decades of the 18th century and from the post 1800 addition of a windmill and a
second horsemill to its production facilities that it continued as a viable operation
into the early decades of the 19th century.
A small stone bridge with a clear span of 5' crosses the gut of an intermittent
stream that runs through the front yard of the plantation house and on its east
side. It provided a dry shod connection between the access road through the mair
gate and the path to the large staircase at the southeast corner of the plantation house. The bridge is in poor condition.

STRUCTURE NAME Windmill Tower, Dennis Bay		STRUCTURE NO. H-24, 17
ORDER OF SIGNIFICANCE: National	State X	Local
	•	
LOCATION OF STRUCTURE: 200 yards north of North	Shore Road a	et Dennis may.
UTM REFERENCE:	CLASS VI	LAND ACREAGE (II not
Zone Easting Northing	part of a	complex or district:
•		
STRUCTURE: Type of, and composition: A truncat in tapered rubble masonry wall.	ed cone shape	ed tower constructed
Physical Description: A windmill tower is locate	ed on the high	point of the ridge
250 yds west of the factory. It is a truncated co of 24 - 29'. The floor level of the interior is 4'	above the su	rrounding grade. At
floor level the interior diameter is 18' decreas:	ing to 13' at t	he crown of the tower
The tapered walls have a thickness of 4' at floor	r level and of	2' at the crown. The
entrance to the tower is on the west side. It is reached by an earth fill ramp. The tall and nar	a 82 100t W10	slif for replacing
the interior works faces north. the cane juice	outter led out	through an opening
towards the south and between it and the entry i	s the bagasse	discharge opening.
A fifth opening is opposite the entrance faces ea	ast. All openi	ngs in the walls have
semicircular arches. The entrance has a proje	cting surroun	d and above the key-
stone a shallow niche that probably at one time	contained a d	ate stone or the
builder's name. The walls still reveal the trace	es of the inter	cior framing. The
interior towards the northeast has a fireplace r flue spiralling up through the heavy wall and dis	aised 4' abov	e crown above the
entrance. There are no remains of the interior	works or of	the movable wood
superstructure that carried the sails. The mas	onry is in a f	air condition only.
