C	<u> </u>	<u> </u>	<u> </u>	D	<u> </u>	<u> </u>	<u> </u>

 See continuation sheet.

Verbal Boundary Description: See continuation sheet.

The nominated property consists of a rectangle, 25 feet wide by 57 feet long, whose vertices coincide with the outside corners of the bridge abutments at each end of the bridge, and includes only the bridge superstructure and substructure.

Boundary Justification: See continuation sheet.

Because the bridge is located on a public road, there are no legal boundary lines for the ends of the bridge. Therefore, these boundaries are drawn to encompass only the superstructure and substructure of the bridge itself.

CONTINUATION SHEET

Section number 7 Bridge No. 47-151-389 Page 6
=====

Bridge No. 47-151-389 is located 13.1 miles east and 4.1 miles north and carries a local road over spring Creek. The 52 foot span rests on a solid concrete abutment with wing walls. The deck consists of concrete with a gravel wearing surface. The railing is a concrete balustrade with many of it decorative crowns missing. The bridge retains very good integrity.

=====

8. Significance

Bridge no. 47-151-389 is being nominated to the National Register of Historic Places as part of the "Historic Bridges in South Dakota" Multiple Property Nomination. It is related to the historic context of "Historic Bridges in South Dakota, 1893-1943" and is classified with the associated property type for reinforced concrete highway bridges. This bridge is individually eligible for the National Register under Criterion C as an example of an early vernacular concrete design. The bridge retains good integrity.

By the early 1910s, reinforced concrete came into use in South Dakota for the construction of bridges. The earliest concrete bridges in South Dakota were built in the southeastern portion of the state, and many, if not all of these structures were professionally designed. However, while the construction of steel bridges had been monopolized by out-of-state firms, these same out-of-state steel bridge companies never seemed to monopolize the concrete bridge building market. Instead, many local contractors successfully competed in this aspect of the bridge building business.

Bridge No. 47-151-389 is an example of an early vernacular concrete design. This bridge represents an attempt by a local, non-professional designer to enhance a crossing. The bold castellated shapes of the guard rail fit the pattern of early concrete bridges built in South Dakota by non-professional designers. The bridge was probably built in the late 1910s, when comparable concrete bridges were built elsewhere in South Dakota, and before the South Dakota State Highway Commission standardized designs for concrete bridges.

Section 8: Applicable Criteria

93001266 Larson Bridge Codington County

Criterion C should be checked and not A to be consistent with bridge's significance in engineering for its method of construction.

Section 8: Period of Significance

93001266 Larson Bridge Codington County

Period of significance is amended to read "1917" to indicate date of construction and to be consistent with significance in engineering.

93001281 Red Shirt Bridge Custer County

Period of significance is amended to read "1943-1944" to cover the period of construction.

93001278 South Dakota Dept. of Transportation Bridge No. 12-503-230
Faulk County

Due to typographical error, period of significance is corrected to read " 1920-1943."

93001265 South Dakota Dept. of Transportation Bridge No. 15-210-136
Codington County

Period of significance is amended to read "1917" since significance is under criterion C in engineering and the date of construction should be entered.

**United States Department of the Interior
National Park Service**

**National Register of Historic Places
Continuation Sheet**

Section number 3 Page 5

93001262 South Dakota Dept. of Transportation Bridge No. 25-380-
142 Faulk County

Period of significance is amended to read "1902" because the area of significance is engineering and the period of significance should be based on the date of construction. The bridge was moved from its original site in 1955.

Section 8: Date of Significance

93001308 Eighth Street Bridge Minnehaha County

"1977" is deleted because the date lies outside the period of significance.

93001317 Hall Bridge Spink County

"1904" is deleted because bridge is significant under criterion C for engineering and the move in 1904 falls outside the period of significance which is based on the date of construction and does not appear to have particular importance.

93001286 South Dakota Dept. of Transportation Bridge No. 20-153-
210 Deuel County

"1960" is deleted because the date lies outside the period of significance.

93001262 South Dakota Dept. of Transportation Bridge No. 25-380-
142 Faulk County

"1955" is deleted because the date lies outside the period of significance.

93001302 South Dakota Dept. of Transportation Bridge No. 44-212-
090 McCook County

"1960" is deleted because the date lies outside the period of significance.

**United States Department of the Interior
National Park Service**

**National Register of Historic Places
Continuation Sheet**

Section number 3 Page 6

93001267 South Dakota Dept. of Transportation Bridge No. 50-200-
035 Minnehaha County

"1935" is deleted because the date lies outside the period
of significance which is based on the date of construction.

93001311 South Dakota Dept. of Transportation Bridge No. 56-117-
123 Sanborn County

"1905" is deleted because the date lies outside the period
of significance and does not appear to have particular
importance.

Melissa Dirr, architectural historian, of the South Dakota State
Historic Preservation Office was notified of the above-mentioned
amendments by telephone on December 09, 1993.
