7. Description

Architectural Classification:

other: Folk Victorian

Materials: foundation STONE roof METAL
walls Weatherboard other BRICK

Describe present and historic physical appearance:

Summary

Built circa 1906, the Art Scanlan House is a demure one-story Folk Victorian residence. A concrete and field stone foundation supports the weatherboard-clad frame walls. Two symmetrically placed brick interior end chimneys grace the roofline. Originally covered in wood shingles, the gable-on-hip roof is now covered by corrugated metal. Fortunately, despite the addition of the corrugated metal the original roof cresting, with shamrock cut-outs, remains. Oral tradition states the shamrock pattern is a reminder of the original owner's Irish heritage. The cottage is sited on a hill west of U.S. Route 65 in the town of Bee Branch and access is gained to the property by an unnamed gravel road. Also located on the property are a modern concrete swimming pool and a garage; neither contribute to the nomination.

Elaboration

The front, or eastern, elevation is distinguished from the high-styled Queen Anne Victorian by its strict symmetry and simplicity. Access is gained to the porch by concrete and fieldstone stairs. At an unknown date the original Tuscan columns and turned-spindle balusters were removed from the front porch. The

three quarter length porch is now supported by four paneled box columns and a turned spindle balustrade. During the recent restoration, a limited number of the original spindles were discovered in the attic and used to recreate the appearance of the original balustrade. The owner intends to complete the balustrade restoration by reproducing the missing spindles.

Above the front porch, the eastern elevation is dominated by a centered cross gable wall dormer with jigsawed verge detail and a rectangular wood louvered vent. Originally, the cross gable featured a small lunette window divided into four lights. An ovular light door flanked by sidelights is also centered on this elevation, strengthening the symmetry of the design (this single leaf door is of modern design). A pair of windows is located on either side of the first floor of this elevation. With but a few exceptions, all windows are double-hung one-over-one windows.

The northern elevation is dominated by a three-sided beveled bay projection with three windows. Above the bay projection in the gable is a small amount of gingerbread detailing similar to that found on the front elevation. The rest of the elevation contains the gable-roofed L-projection and is fenestrated by a pair of windows and two smaller single windows.

The rear, or western elevation has been converted from a porch to a family room. This has become the preferred entrance to the residence and has a modern window and door. The southern portion of this room has a modern patio door leading to the pool area.

Unlike the northern elevation the southern elevation is relatively simple and contains a pair of modern French doors and a window. Above in the gable end of the gable-on-hip is a small amount of jigsawed detail.

The interior is rather plainly adorned, but does feature multiple-pane, double-leaf French doors between the entry hall (east elevation) and south bedroom. These same type French doors are also located on the south wall of the bedroom and lead to the pool area. Other details of note are the interior doors which have the original transoms and original hardware.

The garage/storage building and the concrete swimming pool are both non-historic and do not contribute to the nomination.

Areas of Significance: ARCHITECTURE

Period(s) of Significance: c. 1906

Significant Dates: c. 1906

Significant Person(s): N/A

Cultural Affiliation: N/A

Architect/Builder: Unknown

State significance of property, and justify criteria, criteria considerations, and areas and periods of significance noted above:

Summary

The Art Scanlan House is significant locally under Criterion C as a well-maintained example of a small Folk Victorian style house with its a gable-on-hip roof, an unusual feature among buildings designed in this style. With this in mind, the Collums-Baker House (NR listed 11/24/92) in the Bee Branch vicinity also displays this particular roof pattern. Future research may confirm the two houses share a common builder. What sets the Art Scanlan House apart from the Collums-Baker is the abundance of original detail and ornament, including the verge trim on the northern, southern and eastern elevations, the metal roof cresting, and the location of the two small brick chimneys that rise through the ridge. The unusual roofline and all of these features combine to make the Art Scanlan House locally significant and worthy of National Register listing.

Elaboration

The Art Scanlan House was built in 1906 for Art Scanlan and his new bride, Myrtle Maddox Scanlan. The house was a wedding gift from Art's father, J. E. Scanlan, who had built the first frame residence in Bee Branch in about 1881. Art's residence remained in the Scanlan family until 1947. It is now owned and occupied by Jimmy Don and Carolyn Bradford.

The area around the modern community of Bee Branch was settled circa 1830 by pioneers from Tennessee, Kentucky, Mississippi, Alabama, and the Carolinas. More

accurate information is unavailable due to the loss of all records in the Van Buren County Courthouse fire of 1859. After the Civil War, several families from Illinois and Kansas moved to the Bee Branch area along with a few settlers from Tennessee, Georgia, and Alabama. The next major wave of immigration came in 1873, when four families from Newburg, Mississippi stopped their oxen-pulled wagons in Bee Branch and decided to abandon their westward journey and settle in the area. The first mention of any mercantile activity in the area occurred in 1881-1882 when J. E. Scanlan arrived in a slatted "chicken or peddling" wagon. According to A History of Van Buren County, Scanlan "put up a second store in Bee Branch, having a line of pins, thread, buttons, notions, and a few bolts of cloth." Coinciding with this development, the post office was moved from Cross Roads to a new log house in Bee Branch, where it remained until 1975.

The Art Scanlan House is significant locally under Criterion C as the best example, within the town of Bee Branch, of a small Folk Victorian style house with a gable-on-hip roof, the verge trim on the northern, southern and eastern elevations, and metal shamrock patterned roof cresting. The unusual roofline and all of these features combine to make the Art Scanlan House locally significant and worthy of National Register listing.
