## National Register of Historic Places Continuation Sheet

Section number 7 Page 1

---

### Description

The Anthony Luna House is a two-story, wood frame residential structure designed in the Plain Traditional style with some Folk Victorian influences. A total of three chimneys vent the building: one small brick chimney rises through the ridge of the main gable near its western end, the second rises through the peak of the ell near its center, and the third -- an exterior end stone chimney -- is attached to the eastern gable end wall. The roof covering the ell-shaped plan is accented with a number of intersecting gable features, and all roof surfaces are covered with composition shingles. The weatherboarded walls are supported upon a continuous stone foundation.

The northern or front facade is dominated by the two-story, balustraded porch that extends across its full length. The shed roof and second story porch deck are supported upon large, square, integral wood columns that are connected with a jig-sawn balustrade on the second story and decorated with small gingerbread details at their intersection with the bottom of the second story deck. The wall behind is symmetrically-organized, with the four window bays on each floor placed around the central entrances on each floor. The single-leaf first story entrance is flanked by half-sidelights and surmounted by a three-pane transom, while the second story entrance features only the half-sidelights. All the windows are four-over-four wood sash. The elevation is completed by the two wall dormers that rise above the porch roof. Each dormer is without a window, and is instead ornamented with a central wood six-pointed star placed within a circle in the peak.

The western elevation is composed of the porch to the north, the central original section, and the inset ell addition to the south, with its combination shed roof. The original section is symmetrically-fenestrated with two windows on each floor, while the addition is punctuated only with a single modern aluminum window. The eastern elevation opposite features a unique double-gable configuration that is dominated by the stone chimney rising through the peak of the northern gable end. A single four-over-four wood window is placed to the south of the chimney on each floor, and two more identical windows are symmetrically-placed within the southern gable end on each floor thereof.

The southern elevation is composed of the later shed roofed inset section to the west and the gable end of the original ell to the east. It contains two historic windows on the second floor and a smaller modern window in the first floor below.

As a Plain Traditional design overall, the Anthony Luna House does not boast of an abundance of detail overall. However, the inset stars in the front wall dormers are also repeated

---

on the stone chimney, with a single central star carved into one of the stones near the cap. Apart from the afore-mentioned gingerbread, the only other feature of note is the abundance of gables (a total of five).

The main facade of this building is remarkably intact, with the principle alterations consisting of the shed roof additions concentrated within the original ell; however, these are lower than the original structure and are largely invisible from the front.

**Significance**

## Criterion C, local significance

The Anthony Luna House was constructed in 1891 by the builder D. J. Thomas for Anthony Luna, the Searcy County sheriff at the time. Though it is not a high-style design, it remains one of the largest and most visually impressive residences in Marshall and Searcy County.

The Anthony Luna House was constructed as a residential building on Main Street near downtown Marshall. Its construction date of 1891 and its simple Plain Traditional style (with some additional detail) represent the historic context *Searcy County History, 1865-1910: Reconstruction, Railroads and Renewal*. As noted in this context, this was a period of county-wide growth and prosperity, relatively speaking, and thus a period during which there was much new immigration and new construction. The county seat of Marshall, with its county courthouse and its propitious location on the Missouri and North Arkansas Railroad, looked forward to many years of growth and prosperity. With its traditional "L"-shaped floor plan and minimal "high-style" touches, such as the jig-sawn gingerbread and balustrade, and the six-pointed stars that adorn its front gables and chimney, the Anthony Luna House is thus eligible with local significance under Criterion C as the best and most well-preserved example of this ostensibly plain but nevertheless distinctive residential style in Marshall during this period.

\_\_\_ See continuation sheet.

Verbal Boundary Description: \_\_\_ See continuation sheet.

Beginning at a point formed by the intersection of the western edge of Spring Street with a perpendicular line running along the southern edge of Main Street, proceed westerly along the latter line for a distance of approximately 100 feet to its intersection with a perpendicular line running parallel with the building's western elevation; thence proceed southerly along said line for a distance of approximately 100 feet to its intersection with a perpendicular line running parallel with the building's southern elevation; thence proceed easterly along said line for a distance of approximately 100 feet to its intersection with a perpendicular line running along the western edge of Spring Street; thence proceed northerly along said line for a distance of approximately 100 feet to the point of beginning.

Boundary Justification: \_\_\_ See continuation sheet.

This boundary includes all the property historically associated with this resource that retains its integrity.
