7. IMPORTANCE AND DESCRIPTION (<i>Describe briefly what makes site important and what remains are extant</i>)	

This is the type site for the Marksville culture, and the discovery of Hopewellian-like material at this site in the 1930's led to the recognition that this culture was widely spread over the East.

The site is in good condition with most of the mounds restored to their original condition. The surrounding earthwork is in good shape as well. There is a good onsite museum which interprets the site for the public.

This site is still the best example of the connections of Ohio Hopewell with that in the south, and, with the other sites in the locality, (Greenhouse, Av25) form the basis for what has been called the best known sequence in Southeastern United States.
