DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

The President's House at Gallaudet College is a large, red brick high Victorian Gothic Revival house located on a knoll at the southwest corner of the campus planned by Olmsted, Vaux & Co. The house erected in 1867-68 and designed by F.C. Withers is approximately sixty feet north of Florida Avenue. It is surrounded by informally landscaped open space. A circular drive separates it from a row of three High Victorian Gothic Revival Professors' Houses at the north. A large green separates it from academic and administrative buildings at the northeast. The house is oriented so that its main facade faces north toward the faculty houses. Most of the buildings on the campus visible from the President's House were designed by F.C. Withers and were built between 1867 and 1885.

The house is very suburban or rural in character and it is important to remember that in the 1860's the school had a suburban location. The building's design is in the mid-mineteenth century Downing tradition of a dwelling with informal landscaping, picturesque features, and an open plan. There are also features characteristic of post-Civil War architecture such as the "constructional coloration" and the greater plasticity (particularly present in the entrance portal).

The building has a number of parts and numerous accents from dormers, gables, chimneys, and projections. However, there is a unity from the general compactness of the outline and the careful organization of openings. This unity is enhanced by the use of similar decorative motifs.

The house has a 2-1/2-story, brick main block approximately 53'8" by 48'. This block has a broadly overhanging, steep mansard roof broken over each bay by a dormer, gable, or hipped gable. The main block has three bays on its north-south facades and two on its east facade. Centrally located on the north side is a projecting 2-1/2-story brick entrance bay, 14'5" by 10'. Extending the full length of the east side is a one-story frame veranda. A semi-elliptical, one-story bay projects from the southwest bay of the south facade. At the west is a two-story brick service wing, 30'9" by 26'. This wing has a steep mansard roof broken by gables over 2nd story windows. Attached to the service wing at the west is an enclosed, one-story, frame porch, one bay wide. A frame, 1-1/2-story stair wing with shed roof occupies the northwest corner between the main block and the service wing.

The main block and service wing have red brick walls laid in common bond in Flemish variation. There is variegation due to the brownstone foundation and the brownstone bands connecting window lintels. Most openings are rectangular with 2/2-lights. Over major windows are alternating brick and brownstone voussoirs in pointed arches. The arches are filled in with thin bricks laid in a recessed herringbone pattern. Around the main entrance is a very plastic, one-story brownstone portal with buttresses. The ornament on this portal and on the tympanum of the window above the door is derived from James K. Colling's <u>Art Foliage</u> (1865).¹ The frame porch at the east

The Joint Committee on Landmarks has designated the President's House, Gallaudet College, a Category II Landmark of importance which contributes significantly to the cultural heritage and visual beauty of the District of Columbia. The large, red-brick, High Victorian Gothic Revival residence was designed by Frederick C. Withers of the leading mid-nineteenth century firm of Vaux, Withers & Co. It is a well-preserved and handsomely detailed example of a large residence in the tradition of Downing's rural houses of the 1840's. In addition, the house has the polychromy and plasticity characteristic of post-Civil War architecture. Since it was erected in 1867-68, the building has served as the home of the president of the nation's only college for the deaf. Its siting was determined by Olmsted, Vaux & Co. when that leading landscape architecture and planning firm made a general plan for the grounds in 1866.

In 1857 Amos Kendall established a primary school for deaf and blind children in the District of Columbia across the boundary line of the Federal City at Eighth Street, N.E. Edward M. Gallaudet became superintendent of the nascent school. Gallaudet had a vision of a government supported college for the deaf, and in 1864 the Columbia Institution for the Deaf and Dumb was given collegiate powers. (In 1865 blind students were taught elsewhere. In 1894 the college's name was changed to Gallaudet College in honor of Thomas Hopkins Gallaudet, Edward M. Gallaudet's father and the founder of the first school for the deaf in the United States.)

The school received support from the United States Government and care was taken to insure that it expanded in an orderly fashion. In 1866 Olmsted, Vaux & Co. made a master plan of the campus. From 1866 to 1870 substantial development took place and great care was taken to follow the 1866 plan.

On December 14, 1866, Edward Gallaudet, the school president, requested Olmsted, Vaux & Co. to proceed to design three buildings for the campus, as he hoped to begin the chapel, the president's house, and one professor's house the next year. The plans for these buildings were actually made by the architectural firm of Vaux, Withers & Co. This firm was closely associated with the school's planners, as Vaux was a member of both firms.

Frederick C. Withers (1828-1901) was the partner who designed the buildings at Gallaudet. Withers was an English architect who immigrated to the United States around 1852 to work with Andrew J. Downing, the popularizer of the (Continued on Form 10-300a)
