Registration FormNATIONAL  
REGISTER

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in *Guidelines for Completing National Register Forms* (National Register Bulletin 16). Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.

United States Department of the Interior  
National Park ServiceNational Register of Historic Places  
Continuation SheetSection number 7 Page 1Summary

The Engelberger House is a two-and-one-half story, brick residence designed in the Queen Anne Revival style. Its hipped roof body is surrounded by several projections of various roof types arranged in an irregular, picturesque plan.

Elaboration

The Engelberger House is a two-and-one-half story, brick residence designed in the Queen Anne Revival style. The main section of the house is covered with a hipped roof, though its assortment of projecting side and corner bays of various shape each exhibits a different type of roof. The result is a building which is asymmetrical and picturesque in both plan and elevation. Two corbelled brick chimneys project from the roof: one from the southern flank of the hipped roof section and the other from the ridge of the gable-on-hip roof which covers the rear section of the house. The roof is covered with composition shingles, the walls are constructed of brick with stone sills and lintels, and the continuous foundation is constructed of ashlar-faced granite.

The eastern or front elevation consists of a three-sided corner bay to the north and a full-height gabled bay to the south, with the first floor, single-leaf entrance placed in the wall between them. A wrap-around, single-story porch extends from the corner bay to the south and onto the south elevation. The corner bay is capped with an eight-sided turret roof which retains its original slate shingles. The octagonal drum immediately below is sheathed with scalloped wood shingles and fenestrated with pyramidal single-pane fixed windows. The three-sided bay is fenestrated on both floors with a single one-over-one wood sash window in each face. The wall above the entrance is lighted with a single window opening which is glazed with leaded glass. The weatherboarded peak of the gabled bay to the south is lighted with a single, square fixed window. The second floor below is fenestrated with two one-over-one wood sash windows set beneath a shed roof balcony roof supported on turned wood posts. Two one-over-one wood sash windows light the first floor also. The wrap-around porch has had its original turned wood posts replaced with brick piers and a partial brick balustrade beneath the pediment, but otherwise is original.

The northern elevation is divided into three principal bays, with the house wall on either side of a projecting full-height gabled bay. The wall to the east is fenestrated with a one-over-one wood sash window in each story near the eastern wall and a single identical window to the west which lights the stairwell behind. The gabled bay is identical to that seen on the eastern (front) elevation. The wall to the west is sheathed in scalloped wood shingles on the second story, which is lighted by a single one-over-one wood sash window. The first floor below is punctuated by two small arched window openings, which have since been filled.

The western elevation is fenestrated with a single two-over-two window in the first floor which is set into an arched opening. The wall directly above is lighted with two one-over-one wood sash windows. To the south a later Craftsman sun room and open porch below is attached in the place of what was probably an open two story porch complete with the same Eastlake spindlework which existed on the original front porch.

The southern elevation, like the northern elevation opposite, is divided into three principal bays by the central full-height, three-sided gabled bay. The sun room and open porch are placed to the west and are punctuated with three Craftsman windows in the sun room and a single-leaf entry and window in the wall below. The gabled bay features a rectangular fixed window in the pediment above though the wall surface directly below is blank. The flanking faces of the bay are lighted with a one-over-one wood sash window on each floor. The wall to the east is blank except for a single one-over-one wood sash window above the porch roof near the eastern wall and another identical window on the first floor, next to the central bay.

The interior retains a great deal of its original detail, including a stained wood stairway, panelled wood doors,

---

and elaborate wood mantelpieces on both floors. The finished attic was completed by 1899, as there are original children's drawings on the wall with names of the children of the attributed builder and alleged initial owner of the house, Alonzo Clayton, and the date.

The most significant alterations to the Engelberger House have been confined to the two porches and the balcony on the eastern elevation. The rear sun room was added some time in the 1930's and the original turned posts and spindlework on the porch and balcony was removed in the 1950's. The current owner is in the process of restoring all this work and returning the entire house to its original state.

Summary

The Engelberger House, in spite of the alterations to its porches, is one of two high-style Queen Anne Revival brick houses extant within the city of North Little Rock, the other being the Baker House (NR-listed 12/06/78). It also stands as the only Queen Anne Revival residence within a large residential neighborhood which contains virtually no other nineteenth century structures.

Elaboration

The Engelberger House, one of only two extant brick high-style Queen Anne Revival residences in the city of North Little Rock, was built in 1895. It is named for the family has owned it since 1912 (the wife of the current owner is a descendant of the first Engelbergers in North Little Rock) though original graffiti in the attic substantiates the oral history of the house which claims that a man named Alonzo Clayton and his family were the first residents. The graffiti lists the names of several children, including an Alonzo, Jr., and is followed by the date "1899" and the words "good bye."

The script is accompanied by a drawing of a young girl with two short and virtually horizontal pig-tails projecting from the sides of her head at right angles. This hair-style was popular among black children of the period (as has been seen in historic photographs of school children in particular) and thus has lent support also to that part of the oral tradition which maintains that Alonzo Clayton was a black jockey from England who built this house and was then forced to leave the neighborhood due to racial tensions. This legend needs to be viewed with suspicion, however, as the exact same legend was told about the builder of the Baker House, which later proved untrue.

Joseph Engelberger, who purchased the house in 1912, was a local saloon keeper who later became a prominent land owner in what was at first a ward of the city of Little Rock, then a separate city called Argenta, and ultimately re-named North Little Rock. A community of any size on the north side of the Arkansas River opposite Little Rock did not materialize until after the Civil War with the arrival of the commercial railroad. However, growth on this side of the river did not proceed at a rate commensurate with that on the other side of the river in Little Rock, largely due to the absence of bridges to connect the north side with downtown Little Rock, the commercial, social and political hub of the area. Thus a relatively small number of high-style residences were constructed here before the turn of the century. For this reason the Engelberger House -- a Queen Anne Revival style design which is relatively pure and virtually without other stylistic influences -- is even more significant. It remains one of the finest high-style residences from any period in North Little Rock and a rare, high quality local example of the Queen Anne Revival.
