7 DESCRIPTION

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The following will be divided into discussions of the SITE AND GROUNDS and the BUILDINGS.

SITE AND GROUNDS

In 1850, the Rector, Wardens, and Vestrymen[1] of St. Paul's Episcopal Church of Milwaukee chose an outlying site for a yet unnamed cemetery which was four miles from downtown and 1.5 miles from the city's southernmost boundary. The original parcel, purchased on July 6, 1850 from Polly Hull, Eleanor S. Hull and John B. Hull, included 72.58 acres. The property deed provided that five of these acres, known as Faith Hill, be set aside so that "destitute members of the Protestant Episcopal Church shall be interred free of charge for their graves or interments." Silas Chapman described the site as "situate at the junction of the Janesville Plank Road and the Kilbourn Road" (now Forest Home Avenue and Layton Boulevard respectively) on unsettled lands which were "well wooded, gently undulating in surface and well adapted for the purposes for which they were set apart." The nearest structure of any size was the Layton House (which still stands), an inn built by John Layton circa 1844 on the Janesville Plank Road opposite the cemetery. A few scattered pioneer farms lay in the vicinity.

The original part of the cemetery, planned in 1850 by Increase Allen Lapham,[2] consisted of a layout of curvilinear roadways forming irregularly shaped "blocks" of various sizes. (This forms the portion of the present cemetery outlined in red on Map B.) There is no record of plantings in the 1850's; existent trees on the site probably consituted the early cemetery vegetation. In 1860, the Minutes of the Cemetery Committee show purchase of evergreens, elms, and "grape" (? illegible) trees. The first burial took place in 1850, and in May of 1851, the name Forest Home was adopted.

Today the Forest Home Cemetery totals 198.5 acreas within the city's southwest side. The bulk of the property, including that south of Cleveland Avenue, was conveyed through a series of deeds by 1880. These parcels were purchased from the Hull family and from Heinrich Vianden, whose farm lay south of what is now Cleveland Avenue. Present vegetation is predominately trees of a variety of ages and species, such as white oak, pine, elm, purple beech, fir, maple, and basswood. Horticulturally, a group of large purple beech at the south end of the pond are the most significant trees in the cemetery. The oldest trees, however, appear to be the white oaks, although their exact age is undetermined. Mature evergreens, viburnum, and other shrubbery make up the other major element of vegetation.

Referring to Maps B and C, one can observe the growth of the cemetery and its present layout of roads, blocks and lots, and other design features. Most of the cemetery was platted by the end of the nineteenth century. The general scheme of the original plan has been repeated in most areas laid out after 1850. Blocks and roadways have remained asymmetrical and curvilinear in form but have increased in size.

Significant gravemarkers range from the earliest simple white marble tablets, to obelisks of marble or other stone popular in the late nineteenth century, to

7. DESCRIPTION (continued)

sculptural pieces, to large turn of the century Neoclassical monuments such as
the Blatz Vault.   /
    Other design features of the cemetery include a fountain, pond and bridge,
and a bridge over Cleveland Avenue. None, with the possible exception of the
fountain, were part of the 1850 plan. The stone fountain, designed to resemble
a natural waterfall, marks the entrance to cemetery roadways. Its date is un-
certain, but it clearly appears on a 1871 lithograph of the cemetery drawn by
Charles Von Borcke. The pond and bridge date from the late nineteenth century,
although the balustraded double arch stone and concrete bridge has been altered.
An artesian well, dug in the 1870's, fills this pond and supplies irrigation to
the grounds. The bridge over Cleveland Avenue is a single-span concrete arch
structure with metal sculptural relief. Engineer Charles S. Whitney built the
bridge in 1932, replacing an earlier one constructed in 1889 by Weinhagen Brothers.

BUILDINGS

        As far as can be determined, no structures were planned with the cemetery
in 1850. The earliest record of construction on the site comes from the Minutes
of the Cemetery Committee in 1861, which mention a contract for the building of
a brick "Sexton's House." The 1871 Von Borcke lithograph, the earliest pictorial
work of the cemetery, illustrates this house with an intersecting gable roof,
and also shows greenhouses, horse barns, and what appears to be a small gable
roof chapel. No record could be found regarding this chapel. None of the above
buildings now exist. The 1861 house was demolished sometime after 1927, when it
appeared on William Currie's map, and before 1947, when the present Service
Building was constructed on the site.

        Chapel (1890-92; 1896. Archts: George B. Ferry and Alfred C. Clas, Milwaukee.
Source: Minutes of the Forest Home Cemetery Committee, 1889-1896). The chapel is
the oldest existing building in Forest Home Cemetery. (See Map B for location.)
In 1889, the Minutes of the Cemetery Committee reported that "plans for a conser-
vatory chapel were presented from E.T.[Edward Townsend] Mix, G.B. [George B.] Ferry,
and H. [Howland] Russel. The plans of Mix and Co. were considered the best...."
(Edward Townsend Mix designed St. Paul's Church in 1882.) In April of 1890, however,
the Cemetery Committee decided to employ the Milwaukee architectural firm of Ferry
and Clas, who had just entered into partnership that year. Construction began that
spring, and the completed chapel opened for services on July 11, 1892. A crematory
was added to the east end in 1896, also designed by Ferry and Clas.

Forest Home Cemetery and Chapel, Milwaukee, Wisconsin

CONTINUATION SHEET   ITEM NUMBER   7   PAGE   2

The style of the Forest Home Cemetery Chapel draws its inspiration from English Gothic forms. The chapel proper is a rectangular gable roof structure flanked by conservatory wings. A square central tower with a polygonal spire extends from the main (west) facade. Masonry-bearing walls support the chapel, while the conservatories are wood frame. The exterior is red sandstone with rock-faced coursed ashlar finish. The foundation is limestone. The chapel roof is slate; those of the conservatories are glass and copper. Windows are mullioned with stone surrounds. All feature patterned leaded glass; tracery enriches the upper panels of the conservatory gables and the tower windows. Brown wood trim is found on the bargeboard on the spire as well as on the porte cochere. One enters the chapel through an oak paneled double door.

The interior of the chapel is rectangular in plan, with a pale brick wall finish similar to Cream City Brick. The timber truss roof and four-centered arches recall English Gothic forms. The wood paneling and altar are original to the austere interior, while the art glass and lanterns (the latter from St. Paul's Church) are later additions. Carpeting covers the original hardwood floors. The pews, rebuilt in 1933, incorporate the carved ends of the first ones.

The only major structural alterations to the chapel occurred in 1933-34, when the cemetery hired the Milwaukee firm of Eschweiler and Eschweiler to remodel the interior and repair the conservatories. On the interior, the conservatories were reduced to about half their original size. New dividing arches of stone and plaster created new side aisles to the chapel. The original tracery windows between the chapel and conservatories were removed and replaced by open arches. On the exterior, in order to accomodate interior changes, half of each conservatory's glass roof was replaced with a copper standing seam roof. Chapel renovation in 1973 included roof repair, a new boiler, and cosmetic repairs.

Office Building (1909; addition 1929. Architect: Alexander C. Eschweiler, Milwaukee; addition by Thomas Van Alyea. Sources: Eschweiler Plans, Wisconsin Architectural Archives; Minutes of the Cemetery Committee; Building Permit Records, City of Milwaukee). The Office Building is located just inside the main gate. Its style alludes to that of the chapel. It, too, is a rectangular gable roof structure with cross gables, constructed of red sandstone with stone coping and surrounds. Bands of mullioned windows, a projecting bay, and an open arcade of four-centered arches complete the composition. A display room and greenhouse were added to the southeast end of the structure in 1929. Thomas Van Alyea chose to continue the general motif of the building, but included multiple projecting bays and a section of contrasting limestone.

CONTINUATION SHEET   **ITEM NUMBER** 7   **PAGE** 3

Service Building (1947. Archt: Fitzhugh Scott, Milwaukee. Source: Building Permit Records, City of Milwaukee). A large L-shaped service building stands to the west of the Office Building. Functional and unobtrusive in design, the structure is built of red-brown brick, and highlighted with stucco gables and dormers, and brown wood trim. Multiple gable roofs break up the large roof expanse. A square belfry accents the northwest corner of the building, visible from the cemetery entrance and adjacent street.

Chapel Garden Crypts (1955 and later. Landscape Archt: Edmund Gruettner. Archts: Peter Zirolli, Kloppenburg and Kloppenburg. Source: Building Permit Records, City of Milwaukee, 1955-1976). The mausoleum complex is situated at the north end of the cemetery opposite the Office Building. Its size and formal classical planning do not intrude to a great extent upon the original character of the cemetery because of the discreet siting of the complex, slightly recessed and in a corner of the property.

FOREST HOME CEMETERY AND CHAPEL, Milwaukee, Milwaukee Co., Wisc.

Continuation sheet   **Item number** 7.   **Page** 4.

DESCRIPTION (cont.):

Greenwood Cemetery, located at the northwest corner of the Forest Home Cemetery, is not included in the nomination becuase it has no prior or present affiliation with Forest Home, and does not share any of the landscape design or architectural features which the nomination recognizes. Originally an independent Jewish ceme-tery founded in 1870, it is presently associated with Congregation B'ne Jeshurun.

                                        amended by D. Filipowicz
                                                October 28, 1980

8 SIGNIFICANCE

STATEMENT OF SIGNIFICANCE

The Forest Home Cemetery and Chapel are significant in the areas of landscape architecture and architecture. The property meets an exception to the usual exclusion of cemeteries from the National Register both because of its distinct design features and the architectural value of the chapel.

Landscape Architecture. The landscape design of the Forest Home Cemetery is significant because of its association with the development of the "non-urban" or "park cemetery" in nineteenth century America. The cemetery is perhaps the oldest example of such romantic landscape planning in the region. It also derives significance from its planner, the renowned naturalist-scientist, Increase Allen Lapham.

The curvilinear layout and naturalistic site together comprise the romantic planning of the original cemetery, whose aesthestic intention was "to connect pleasing associations with the place where rest the remains of departed Christians..."[3] The design is comparatively simple and unsophisticated. Even so, its picturesque qualities made the Forest Home Cemetery unique in Milwaukee's mid-nineteenth century landscape. The frontier city numbered about twenty thousand in 1850, and its community planning amenities were few. As was true for most "park cemeteries," Forest Home became a popular spot for picnics and excursions; large public parks were not established in the city until the late 1880s and 1890s. The Janesville Plank Road provided early access to the grounds; later an electric railway line on Forest Home Avenue connected the cemetery with the urban population.

Parish records of St. Paul's in 1850 document that "the grounds are being laid out under the direction of I. A. Lapham, Esq."[4] The connection of the cemetery's planning with Lapham is a significant one. Increase Allen Lapham (1811-1875) was, at the time he worked on Forest Home Cemetery, Wisconsin's foremost scholar. Beginning as an engineer and a surveyor, he became well-known for his early geological and natural history surveys of Ohio and Wisconsin. He devoted much time to a systematic study of "aboriginal earthworks" in Wisconsin, publishing his findings under the title of Antiquities of Wisconsin with the Smithsonian Institution in 1855. Lapham also conducted scientific observation of the weather and is know as "the father of the U. S. Weather Bureau."

8. STATEMENT OF SIGNIFICANCE (continued)

It is in his lifelong botanical studies, however, that the correlation between Lapham, Forest Home Cemetery, and the evolution of landscape architecture becomes important here. In his cataloging and collecting of plant life, his studies on native grasses, and his writings on forest trees, Lapham corresponded extensively with the learned and prominent men of his time. Botanist Asa Gray and naturalist Louis Agassiz were among those with whom he exchanged ideas and information. He also travelled widely in his scholarly pursuits; in 1848, for example, Lapham visited Cambridge, Massachusetts, where he might have seen Mount Auburn, the first "rural cemetery" in America. Lapham probably came across articles on rural cemeteries which appeared in horticultural magazines during the 1840's, essaying on "the laying out, planting and managing of cemeteries...on the basis of Loudon's work." [5] From all these sources, Lapham the botanist fused with Lapham the mapmaker in producing the plan for Forest Home Cemetery. As such, the planning of the cemetery represents a stage in the development of landscape architecture in America, which in the mid-nineteenth century was emerging from "the botanical atmosphere of horticulture" into a new field of landscape planning and design. [6]

ARCHITECTURE. The Forest Home Cemetery Chapel is significant not only as a component of the cemetery but also as an individual work of architecture. The design of the English Gothic building, described in detail on the opposite page, is an unusual combination of chapel, conservatory, and crematory. The structure is well-recognized in Milwaukee as a valuable contribution to the city's religious architecture, and has been designated a City of Milwaukee Landmark.

The chapel also derives significance as part of a body of work by the notable Milwaukee architectural firm of Ferry and Clas. George B. Ferry (1851-1918) and Alfred C. Clas (1860-1942) formed a partnership in 1890, and this is one of their first designs of their productive years together until Ferry's death in 1918. Their work included some of Milwaukee's most distinctive turn of the century architecture, many of which are now Milwaukee Landmarks: Milwaukee Public Library, Northwestern National Insurance Company, First Unitarian Church, Matthews (Woolworth) Building, and numerous large homes on the city's upper east side. Their repertoire included revival styles such as the Gothic, Romanesque and Tudor, and the Neoclassical and Beaux Arts styles. Ferry and Clas also designed the building which houses the State Historical Society in Madison.

Addendum to <u>Statement of Significance</u> under <u>Landscape Architecture</u>:

Research thus far suggests that Forest Home Cemetery is the earliest romantically-planned "park cemetery" in the Upper Midwest. The nearest such cemetery which predates Forest Home is the Spring Grove Cemetery in Cincinnati, Ohio, designed in 1845.
