National Park Service

National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determination for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and area of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900A). Use typewriter, word processor or computer to complete all items.

1. Name of Property

historic name Graves Creek Ranger Station

other name/site number Graves Creek Guard Station, Graves Creek Ranger Station Historic District

2. Location

street & number Approximately 22 miles NE of Highway 101 on Quinault River Road:

not for publication

Quinault Sub-district

city or town Olympic National Park Headquarters, Port Angeles

vicinity

state Washington

code WA

county Jefferson

code 031

zip code 98362

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments.)

Narrative Description

(Describe the historic and current condition of the property on one or more continuation sheets.)

Summary: The Graves Creek Ranger Station Historic District is comprised of two contributing buildings within a heavily forested area near Graves Creek in the Quinault District of Olympic National Park. The buildings are rectangular, wood-frame structures with gable roofs and shake siding. The buildings are in good condition and continue to function much as they did historically. Both are basically intact and appear much the same as they did after their construction between 1939 and 1941 by the National Park Service. The complex is a fine example of two property types identified in the Multiple Property Documentation form for the Historic Resources of Olympic National Park: Government (National Park Service) and Architecture (Rustic). The district has integrity of location, setting, design, materials, workmanship, feeling and association, and meets the registration requirements set forth in the Multiple Property Documentation form.

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B** Property is associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in prehistory or history.

Areas of Significance

(Enter categories from instructions)

Criterion A: Government / Politics

Criterion C: Architecture

Period of Significance

Criterion A: 1939 - 1941

Criterion C: 1939 - 1941

Criteria Considerations

(Mark "x" in all the boxes that apply.)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or grave
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

Significant Dates

Significant Person

(Complete if Criterion B is marked above.)

Cultural Affiliation

Architect/Builder

National Park Service
Civilian Conservation Corps

Narrative Statement of Significance

(Explain the significance of the property on one or more continuation sheets.)

9. Major Bibliographical References

Bibliography

(Cite the books, articles, and other sources used in preparing this form on one or more continuation sheets.)

- Previous documentation on file (NPS):**
- preliminary determination of individual listing (36 CFR 67)
 - previously listed in the National Register
 - previously determined eligible by the National Register

Verbal Boundary Description

The boundary of the district is formed by lines completing a rectangle 200 feet out from the ranger station residence.

Boundary Justification

The district includes the ranger station residence, the garage/woodshed, and the immediate surrounding natural setting of the facility to convey a sense of the historic setting.

Section number 7

Graves Creek Ranger Station: Jefferson County, WA

Page 1

Narrative Description: The Graves Creek Ranger Station Historic District was built between 1939 and 1941. It is distinctive for its use of native building materials applied in a modern (late) interpretation of the Rustic Style of architecture. A hallmark of the style is the use of local, natural materials applied in a manner so the building fits into the landscape. That, in conjunction with careful siting of the building in the landscape and adding plant materials so the structure appears to "grow" out of the ground, are the basic tenets and philosophy of the Rustic style.

The Graves Creek Ranger Station residence was constructed between 1939 and 1941 with the assistance of Public Works Administration funding and Civilian Conservation Corps labor. Beginning in 1939 the area for the new ranger station was cleared and prepared for construction to begin. Within the next few months the CCC transported materials for the construction of the building. Near the end of the actual construction of the building, the CCC completed the water supply and the sewage disposal systems, and landscaped the grounds around the ranger station. The CCC also built the combination garage/wood shed building, and a generator house that is no longer standing.

The residence at the ranger station is a rectangular structure, measuring 25' x 23', and 1-story in height. It has wood-frame construction set on a mortared fieldstone foundation. Exterior siding is cedar shake. The gable roof is also sheathed with cedar shakes. Windows are 2-over-2, double-hung sash with narrow surrounds/trim. The residence has an enclosed porch on the north elevation, which appears to be the only alteration to the structure. Overall, the building appears much as it did when completed c. 1940.

The garage/wood shed was completed by CCC crews in 1941. It is rectangular in shape, measuring 22' x 24' and is 1-story in height. Of wood-frame construction set on a stone and mortar foundation, the garage portion of the building is set on concrete. The exterior siding is wood shake. The wood-shaked gable roof has slightly extended eaves with exposed rafter ends and purlins. Windows are 1-over-1, double-hung sash (side elevations) and multi-paned fixed sash (rear elevation). A wide, wooden garage door and wooden entry door are on the main facade. This building is about 30' from the residence. The garage/wood shed appears much the same as it did historically when finished in 1941.

The Graves Creek Ranger Station Historic District continues to exhibit the qualities of its original design and method of construction as built by the National Park Service as part of its efforts to establish a presence as the managing agency for the new national park. It is representative of the types of buildings and structures that were being built in national parks throughout the west, but executed in a modern (late) fashion. Using local, natural materials on buildings that were carefully sited on the landscape, the visual impact of the new structures was lessened by using appropriate paint colors (natural earth tones) and landscaping to soften the edges of the building. This complex of buildings stands out as a distinct example of wood-frame and stone construction in the Rustic Style of architecture. Although one original building in the complex no longer stands (generator house), overall, the district retains a high degree of integrity in its location, setting, design, materials, workmanship, feeling, and association, and exhibits the registration requirements identified in the Multiple Property Documentation form for the Historic Resources of Olympic National Park.

Section number 8 **Graves Creek Ranger Station: Jefferson County, WA** Page 2

Statement of Significance:

Summary: The Graves Creek Ranger Station Historic District is significant for its association with politics and government (National Park Service) activities within Olympic National Park (criterion A). Both contributing buildings within the district relied heavily on the financial and labor assistance provided by President Franklin D. Roosevelt's New Deal PWA, WPA, and CCC Depression-era programs. The district also is an example of the distinctive type of architectural style, the Rustic Style, utilized by the National Park Service in its early years of managing former national forest lands on the Olympic Peninsula (criterion C). Built 1940-1941, the two buildings in the historic district are representative of a modern version (late) of the Rustic style as applied to administrative facilities in the new national park. These buildings embody the characteristics of the Rustic philosophy of design but they have been applied in a modern way, taking advantage of new building technologies and methods while respecting and incorporating the tenets of the Rustic ethic. The complex exhibits a high degree of craftsmanship and is indicative of two property types identified in the Multiple Property Documentation form for the Historic Resources of Olympic National Park: Government (National Park Service) and Architecture (Rustic). The district has integrity of location, setting, design, workmanship, materials, feeling, and association, and meets the registration requirements set forth for these properties in the Multiple Property Documentation form.

Narrative: Soon after the creation of Olympic National Park in 1938, National Park Service administrators requested Public Works Administration (a Depression-era program) assistance. Beginning in 1939, the area for the ranger station was getting cleared and prepared for construction activity with assistance from Camp Elwha enrollees, CCC crews from the only camp in the park. Within the next few months they transported materials for the construction of the building.

In early March of 1940, Olympic National Park received assurance of allocation for its second CCC camp, to be located near Lake Quinault, at the Norwood Guard Station. During the early months of the summer, construction of the new camp was rushed to completion. On August 12, the camp was occupied when a full company of enrollees was transferred from the Millersylvania Camp near Olympia to Lake Quinault. With facilities for 200 enrollees, the new camp at Quinault would provide for double the manpower available for park projects when fully occupied.

Work projects undertaken by the CCC at the Quinault camp were proposed for several front and backcountry areas. Early on in the life of this CCC camp, enrollees focused attention at Graves Creek. In 1942, crews at the new camp developed the public campground at Graves Creek, constructed a powerhouse (lighting plant), and completed additional landscaping projects at the Graves Creek Ranger Station.

The structures built at Graves Creek have historic significance because they were among the first administrative buildings constructed under the auspices of the National Park Service after the 1938 creation of Olympic National Park. Like the Park Headquarters Historic District, Graves Creek is a noteworthy example of a late

United States Department of the Interior
National Park Service

National Register of Historic Places

Continuation Sheet

Section number 8 and 9 Graves Creek Ranger Station: Jefferson County, WA Page 3

period in the application of the Rustic Style of design that was popular for decades in the national forests and national parks, particularly in the western states (criterion C). The Graves Creek Ranger Station Historic District exhibits a high degree of craftsmanship, and continues to reflect the values and philosophies of its builders in its architectural expression and use. The Graves Creek Ranger Station Historic District is an example of two property types identified in the Multiple Property Documentation form for the Historic Resources of Olympic National Park: Government and Architecture. It retains a high degree of integrity in its location, setting, design, materials, workmanship, feeling, and association, and meets the registration requirements set forth in the Multiple Property Documentation form.

(Continued from page one)

Service established new administrative sites. Early in the park's history, in addition to a cadre of new buildings that formed the Park Service headquarters in Port Angeles, four new ranger station buildings were constructed by the Park Service, and one already-existing group of buildings was converted to a park ranger station.

Rectangular in shape; measures 22' x 24'; 1 story; wood-frame wall construction sheathed with cedar shakes; gable roof with cedar shakes and exposed rafters; stone and mortar foundation; concrete slab in garage portion; 1-over-1, double-hung sash (side elevations) and multi-light fixed sash (rear elevation) windows; wide, wood garage door and wood pedestrian door on main facade. Alterations: building originally unpainted. Siting: approximately 30' from Graves Creek ranger residence at end of gravel driveway; encroached upon by dense trees and shrubs on rear and side wall.
