A columned portico extends across the facade and halfway down the east side, supporting a broad entabulature. The fluted shafts of the columns rest on the ground and terminate in modified Corinthian capitals. The porch features a stone railing and a dec-

18. sidelights and transom, has a glass-paneled door which is not original. Flanking the doorway are two, large, single-light sash windows with molded stone sills. At the roofline, wide eaves are supported by large stone brackets. Small windows pierce the frieze between brackets along the sides of the building.

To the rear of the portico, the building is a full two stories. A side entry is sheltered by a stone porch with balcony above. The entire structure is covered by a hipped, green tile roof. A one-story, stucco addition at the rear dates from 1973.
