DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

This historic site, which is located on a 7.6 acre tract, includes 9 buildings. The buildings, all constructed in the summer of 1909, are very similar in nature being constructed of brick, poured concrete, wood and steel. The signal facilities consist of the octagonal brick light tower, which houses the original two-paneled lens manufactured in Paris, the attached service building and the fog signal building. These two structures were built on a solid rock dome which rises 15 feet above the land behind. Back of these two buildings is the original fuel oil storage building now used for paint and general storage. Of the remaining six structures three are two-story brick dwellings and three are wood frame barns. Except for minor changes in the use of some of the buildings. such as the barns being used as garages and the introduction of electric lights in the mid 1900s, there have been no major changes at this site in the last 60 years.
