Describe the present and original (if known) physical appearance

The Yaguez is a traditional horseshoe-shaped theater dating from the 1920's eclectic in style. Throughout its notorious history, the theater has housed most of the performing arts and cinema presentations, thus endowing the building of historical and cultural significance, in a very few other theaters in the Island can claim.

The Yaguez is located at the corner of McKinley and Basora Streets in the gridded town of Mayaguez, now the largest city in the Southwestern part of Puerto Rico. The City Hall and a Community Center with additional performing space sit on the same block; the building occupies about one third of the whole lot.

The building has undergone several transformations. The original structure was built in wood in 1909, according to a design by Felix and Julio Medina González. A three-leveled arrangement of orchestra, balcony and gallery areas faced, at the time, towards a proscenium arch with pasteboard and sackcloth decorations. It was all ravaged by a fire in 1919 during a movie presentation.

Architect Sabas Honoré then designed a completely new theater on the same site. It was built in 1920 by Engineer Manuel Font. Although for years the seat of cultural life in town, the Yaguez theater would deteriorate by the 1950's, exhibiting until recently serious damage to its structure. Recently reinaugurated, its last restoration started in 1977 under the auspices of the Municipal Government and according to designs by Architect Carlos Arcilla and Engineer Germán Rivera.

Highly articulated in elevation, the building exhibits different facades towards each street and an imposing portico whose chamfered feature is echoed by the three other structures at the intersection. The portico is topped by a pointed dome identifying the location of the main access to the theater. Both facades are different because, although the building is entered at a corner, the theater's longitudinal axis lies parallel to its Basora street facade. The additional entrance at McKinley Street becomes the building's main elevation, as evidenced by the huge pediment that crowns it. Here the name of the theater is to be found.

Raised on a stepped podium, the building exhibits a wide array of eclectic motifs in the form of detached columns, pilasters, mouldings, cornices, finials, french doors and many others. The facade is recessed from Basora Street, in order to allow room for the loading dock area. This section, the tallest part of the building, houses the lift space for the stage around five to six stories high. The building ends at Ramos Antonini Street where the facade is four stories high with small stained glass colored windows at the ground level and rectangular windows with colored glass at the others. Here the facade is less articulated, and the roof is flat. The building's rectangular plan, like that of most theaters, includes a tickets purchase area, a horse-shoe shaped three-leveled seating area, a stage, a loading dock and backstage areas, with the dressing rooms. Concrete, cement block, wood and glass in French doors and windows, and paving in terrazo with metal joints, are common features. Projecting elements of the facade are painted in white, in order to make them stand out from the beige used at the lower wall. Bronze from the original rails was molten to construct the new ones, red velvet and Italian marble are used for the wall finishes, woolen fabric rugs, adorned with the Mayaguez city shield at the lobby. Smallboard and Nicaraguan plank wood were used for the stage floors. Located underneath the reinforced concrete ceiling and covered by a soffit are the technical systems such as the: air conditioning, diffusers and returns, illumination, sound and theater lights. The lamps and other interior ornaments were brought from Spain and Italy to complement the spaces.

Specific dates 1909–1920

Builder/Architect Felix and Julio Medina González (1909)
Sabás Honoré (1920)

Statement of Significance (in one paragraph)

The Yaguez Theater is the most important performance space in Mayaguez and in the western area of Puerto Rico. Presently, it ranks fourth among the best Island theaters. Both its history and the building itself underline the structure's relevance.

Since 1909, the theater and movie house has been the forerunner of art and culture in Mayaguez, presenting grand opera, and also shows such as the Cuban "Bufos", dramas, Spanish "zarzuelas", and international dance companies, etc. The Yaguez Sextet, a chamber orchestra of noted musicians of the early 1900's, played in the Yaguez stage. Here, the town dwellers, rich and poor, have had the opportunity to engage in all the performing arts, both as artists and as audience.

The Yaguez was a pioneer movie house. It is well remembered for its "La Revista Yaguez", one of the first film periodicals in the Island, edited under the auspices of the Theaters' administration. The Yaguez was known as "La Catedral del Arte Sonoro" (The Cathedral of musical art).

For decades the Yaguez has been an urban landmark in the city. The building's eclectic design, striking both in concept and realization, is the product of one of the most brilliant architects of the era, Sabás Honoré. He was responsible for some of the best structures erected at the time, all of which indulge in stylistic considerations of a truly eclectic spirit of great merit and, so far, awarded little recognition. 1

The original owner, Francisco Maymon, requested his son before dying that it was his wish that the theater would never lose its role as a catalyst of culture. His son, Miguel Maymon, inherited the theater and struggled to preserve it. In 1977 it was declared by the Institute of Culture in Puerto Rico, a Historic Monument and bought by the municipality with federal Bicentennial funds issued to preserve buildings of important historical value. Recently, the Yaguez reopened its doors after considerable restoration efforts. The life of the theater was prolonged, revitalizing its cultural relevance in the Island's artistic development. The Yaguez is, no doubt, one of the important edifices in Mayaguez.

The present restoration took seven years to complete, from 1977 to 1984. This last revitalization project included the provision of new windows and colored glass, seats in red velvet, and red carpeting. The basement area was rehabilitated to include new stained glass windows of modern, geometrical patterns. New colors were added to the facades, now painted in beige and white. Modern theater equipment has been installed in the stage and dressing room areas which were re-designed to accommodate different performance needs. Accessibility for the handicapped was taken into consideration in all public areas.

Sabás Honoré and his father Víctor Honoré were well-known architects in Mayaguez, their hometown. Many of their original plans are preserved in the city's archives. Among Sabás' best buildings are: the Logia Adelphi, the Bechara Residence and the Gonzalez Residence, all in Mayaguez. Sabás Honoré studied in Spain; his descendents still live in Mayaguez.
