CALIFORNIA

## EVOLUTION

Southern California, noted throughout the world for its phenomenal growth, presents no more striking example than is the growth of this magnificent hotel from its seeming perfection in 1890 to an increased magnificence in 1892, and on to still greater perfection in 1897, as shown above. The Annex, with its additional accommodations, give to the traveling public a hotel containing over 400 rooms, 250 of which have bath rooms attached. The arcade connecting the two buildings is furnished with a beautiful miniature trolley car by which guests are conveyed from the office to the annex.
