

National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, *How to Complete the National Register of Historic Places Registration Form*. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions.

1. Name of Property

Historic name: Oktribbeha Gardens Subdivision Historic District

Other names/site number:

Name of related multiple property listing:

N/A

(Enter "N/A" if property is not part of a multiple property listing)

2. Location

Street & number: Roughly bounded by N. Montgomery St., Critz St., Old West Point Rd. & Dr. Martin Luther King Jr. Dr. E.

City or town: Starkville State: MS County: Oktribbeha

Not For Publication: Vicinity:

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended,

I hereby certify that this X nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60.

In my opinion, the property X meets does not meet the National Register Criteria. I recommend that this property be considered significant at the following level(s) of significance:

 national statewide X local

Applicable National Register Criteria:

X A B X C D

Narrative Description

(Describe the historic and current physical appearance and condition of the property. Describe contributing and noncontributing resources if applicable. Begin with a **summary paragraph** that briefly describes the general characteristics of the property, such as its location, type, style, method of construction, setting, size, and significant features. Indicate whether the property has historic integrity.)

Summary Paragraph

The Oktibbeha Gardens Subdivision Historic District is located to the northeast of downtown Starkville in a primarily residential area that is bounded to the south by residential and commercial development lining Dr. Martin Luther King Jr. Dr. W. (Mississippi Highway 182). Platted in 1937, the district represents the first major planned subdivision constructed in the city. The district includes a total of 163 resources, of which 139 (85%) are contributing and 24 (15%) are non-contributing. Of the contributing resources, all but one are residential in use and include 129 dwellings, five duplexes (Resources #97, #99, #101, #102, and #147), two garage apartments (Resources #11 and #49), and one apartment building (Resource #127). The remaining contributing resource is a drainage system for the subdivision (Resource #163). The district generally is bounded to the west by the rear property lines of the properties along N. Montgomery St., to the north by the rear property lines of the properties along Critz St., to the east by Old West Point Rd. (formerly Glenn St.), and to the south by the rear property lines of properties fronting along Dr. Martin Luther King Jr. Dr. W, and Broad St.

Narrative Description

The boundary streets of N. Montgomery St., Critz St., and Old West Point Rd. are part of the traditional street grid of Starkville, with N. Montgomery St. running north- south, Critz Street east-west, and Old West Point Rd. from southeast to northeast. The streets within the subdivision are characterized by curvilinear shapes set into the natural topography of the site. The site itself is typified by gentle rolling hills with large mature trees. Deed restrictions originally required at least a forty-foot setback from the street, although variances were later granted for shorter setbacks. Properties typically have landscaped yards with mature trees and shrubs.

The majority of the contributing residential resources, 125 (91%), are one story in height, with 4 (3%) being one and one-half stories, 6 (5%) being two stories, and 2 (1%) being split level. Frame construction accounts for 79% of the contributing residential resources (109 resources), with 26 (19%) being brick veneer and 2 (2%) being stone veneer. Stylistically, 73 (54%) contributing resources were classified as Minimal Traditional, 32 (54%) as Ranch, 32 (24%), Cape Cod (4%), Colonial Revival (4%), Contemporary (3%), Craftsman (3%), Tudor Revival (4%), and the remainder (5%) having no style. There is only one nonresidential contributing resource in the district (Resource #163). Thirty-three (23%) of the contributing resources were constructed prior to the start of World War II in 1941, 8 (6%) were constructed toward the end of the war in 1945, 72 (52%) were constructed in the post-war period of 1946 to 1955, and the remainder, 26 (19%), were constructed between 1956 and 1967.

The district contains the following street numbers:

Broad St.	401 – 501
Critz St.	235 – 606

Oktibbeha Gardens Subdivision Historic District

White Dr.	101 – 420

Integrity

The Oktibbeha Gardens Historic District retains integrity of location, design, setting, materials, workmanship, feeling, and association. Please see the expanded discussion of integrity in Section 8. Typical alterations include the application of artificial siding and the replacement of windows.

Inventory of Resources

C = Contributing element; NC = Non-contributing element

The inventory is arranged alphabetically by street name in ascending numerical order. Buildings are classified as "contributing" (C) or "non-contributing" (NC) to the historic character of the district.

The field inventory was completed by Schneider Historic Preservation, LLC in January 2017.

Broad Street

- 1 C Broad St., 401 Bettersworth, John, House, 1946
Johnson, Jones & Reynold, Architects

One-story concrete and frame Colonial Revival style dwelling with a hipped composition shingle roof with two arched dormers and a central ventilation cupola, side gable roofs at the flanking wings, one exterior end shouldered brick chimney; faces south, rectangular 2x2 bay reinforced concrete core with 3x2 bay frame wing at the east elevation and a 2x1 bay frame wing at the rear bay of the west elevation with a rear gable wing that connects to a carport to the rear; slightly recessed entrance at the west bay of the east wing flanked to the east by two single 9/9 replacement windows (ca. 1990) and to the west at the core by two similar double windows, triple 6/6 window at the south bay of the west elevation of the core with similar double windows at the west wing; painted concrete walls and foundation at the core with a wood weatherboard frieze, applied artificial siding (ca. 1990) at the wings with continuous concrete foundations.
- 2 C Broad St., 402 Boyette House 1941

One-story frame Minimal Traditional style dwelling with a cross-gable composition shingle roof; faces north, 4x3 bay rectangular core with a side gable wing at the front bays of the east elevation with an attached carport; off-center entrance with a gable hood supported by shaped brackets flanked to the west by a single 6/6 window and to the east by two similar single windows and a casement window at the wing, similar windows at the side elevations; cementitious shingle siding; continuous brick foundation.

windows at the wings and side elevations; cementitious shingle siding; continuous concrete block foundation.

- 147 C White Dr. East, 308 Duplex 1940 ca.
One-story frame Ranch style duplex with a hipped composition shingle roof; faces west, rectangular 6x3 bay core; no porch; entrances at the 2nd and 5th bays of the facade with tripartite picture windows in the two center bays with fixed central lights flanked to either side by narrow single horizontal 2/2 windows, double horizontal 2/2 windows in the outer bays, similar single and double windows at the side elevations; exposed brick veneer at the center bays and foundation of the outer bays with cementitious single siding above at the outer bays and at the side elevations; continuous brick foundation at the side elevations.
- 148 C White Dr. East., 310 House 1960 ca.
One-story frame Contemporary style dwelling with a front-facing gable composition shingle roof; faces west, rectangular 2x3 bay core with a carport extension to the south; less than full façade gable porch with wood posts; central entrance at the facade flanked to the south by a double sliding window, similar single and double windows at the side elevations with a large picture window at the west bay of the north elevation; wood shake siding over a raised brick veneer foundation.
- 149 C White Dr. East., 311 Meyer, Henry F., House 1940 ca.
One-story frame Ranch style dwelling with a cross gable industrial metal roof, one interior brick chimney; faces east, rectangular 3x2 bay core with a front-facing gable wing at the northern bay of its facade, a cross gable addition to the south, and attached garage to the north; entrance bay shed porch with a wood posts now partially enclosed; entrance is located at the south elevation of the porch enclosure and is flanked to the north by a bay window with a double 1/1 replacement window and the south by similar double window, similar single windows at the wings and side elevations; wood weatherboard siding with stone veneer highlights; continuous brick foundation.
- 150 C White Dr. East, 312 House 1960 ca.
One-story brick veneer Ranch style dwelling with a side gable composition shingle roof; faces west, rectangular 5x1 bay core; less than full façade engaged porch with wood posts; off-center entrance at the facade flanked to the north by a single 2/2 synthetic replacement window (ca. 2010) and to the south by two similar single windows and a similar double window, similar windows at the side elevations; painted brick exterior walls and foundation.
- 151 C White Dr. East, 313 House 1950 ca.
One-story brick veneer Ranch style dwelling with a side gable industrial metal roof, one exterior end brick chimney; faces east, rectangular 4x2 bay core; entrance bay shed porch with narrow wood posts on wood pedestals; off-center entrance at the facade flanked to the north by 6-light picture window, to the south side a small single window, a double clerestory window, and an open carport, similar single windows at the wings and side elevations; painted brick veneer exterior walls and foundation.
- 152 NC White Dr. East, 314 Apartment Building 1970 ca.
Modern 2-story brick veneer apartment building with a side gable composition shingle roof; faces southwest, 6x1 bay core; full façade recessed two-tier porch with decorative

metal supports and railing, exterior metal staircase; entrances at the second and fifth bays at each level flanked to either side by single 6/6 synthetic windows, no windows of the side elevations; brick veneer exterior walls at the side elevations and lower level of the façade with plywood siding at the upper level of the facade; concrete slab foundation.

- 153 C White Dr. East, 406 House 1950 ca.
One-story frame Minimal Traditional style dwelling with a side gable composition shingle roof with a front facing gable projection; faces west, rectangular 3x3 bay core with a rear shed extension; less than full façade partially recessed gable porch with decorative paired wood posts; off-center entrance at the facade flanked to either side by single 6/6 windows, similar windows at the side elevations; cementitious shingle siding; continuous brick foundation.
- 154 C White Dr. East, 407 House 1944
One-story frame Minimal Traditional style dwelling with a side gable industrial metal roof with a front facing gable projection; faces east, rectangular 3x2 bay core with a 1-bay wide side gable wing and a rear gable extension at the north end; entrance bay shed porch with a wood posts and exposed rafter ends; central entrance at the facade flanked to either side by 1/1 synthetic replacement windows (ca. 2000), similar 3-unit grouped windows at the side wing, similar single windows at the side elevations; cementitious shingle siding; continuous brick foundation.
- 155 C White Dr. East, 408 House 1949
One-story frame Minimal Traditional style dwelling with a cross gable composition shingle roof; faces west, rectangular 3x3 bay core with a front facing gable wing at the south bay of the facade; less than full façade partially recessed shed porch with decorative metal supports; off-center entrance at the facade flanked to either side by single 6/6 windows, similar windows at the side elevations; cementitious shingle siding; continuous brick foundation; contributing frame shed to the rear.
- 156 C White Dr. East, 409 House 1950 ca.
One-story frame Minimal Traditional style dwelling with a side gable composition shingle roof; faces east, rectangular 3x2 bay core with the two northern bays of the core projecting slightly; entrance bay partially engaged shed porch with wood posts, open carport at the north elevation; central entrance at the facade flanked to either side by 8/8 windows, similar 6/6 windows at the side elevations; cementitious shingle siding; continuous brick foundation.
- 157 C White Dr. East, 410 Easley, Oby W. House 1949
One-story frame Minimal Traditional style dwelling with a side gable composition shingle roof; faces west, rectangular 3x2 bay core with a secondary side gable wing at the south elevation with a rear extension and a rear gable wing at its north end; entrance bay gable porch with a decorative metal supports; central entrance at the facade flanked to either side by 8/8 windows, similar windows at the wing with similar single and double 6/6 windows at the side elevations; applied vinyl siding (ca. 1990); continuous brick foundation. A 1950 photograph of this house shows that it originally had cementitious shingle siding, that the south wing was originally an open carport, and that the porch was supported by wood posts.

- 158 C White Dr. East, 411 House 1949
One-story frame Minimal Traditional style dwelling with a side gable composition shingle roof; faces east, rectangular 3x2 bay core with a front-facing gable projection at the two northern bays of the facade; entrance bay recessed porch with a wood post, open carport at the north elevation; central entrance at the facade flanked to either side by 8/8 windows, similar 6/6 windows at the side elevations; cementitious shingle siding; continuous brick foundation; 2 frame utility sheds at the rear, the northernmost of which appears to be contemporary with the house.
- 159 C White Dr. East, 412 House 1950 ca.
One-story frame Minimal Traditional style dwelling with a cross gable composition shingle roof; faces west, rectangular 3x2 bay core with a front-facing gable wing at the two southern bays of the facade and a side gable wing to the south with a recessed carport; entrance bay recessed porch with a wood post and modern railing; central entrance at the facade flanked to either side by 8/8 windows, similar windows at the side elevations; cementitious shingle siding; continuous brick foundation.
- 160 C White Dr. East, 414 House 1950 ca. ca.
One-story frame Minimal Traditional style dwelling with a side gable composition shingle roof; faces west, rectangular 3x3 bay core with a rear shed extension; less than full façade partially recessed gable porch with wood posts; off-center entrance at the facade flanked to the north by a single 6/6 window, similar windows at the side elevations; cementitious shingle siding; continuous brick foundation.
- 161 C White Dr. East, 416 House 1950 ca.
One-story frame Minimal Traditional style dwelling with a side gable composition shingle roof; faces west, rectangular 3x1 bay core with a secondary rear wing to the east and an addition at the west side of the rear elevation that extends to the west (1986), southern bay of the core projects slightly; entrance bay engaged shed porch with wood posts; central entrance at the facade flanked to either side by single 8/8 windows, narrow single clerestory windows at the side elevations; plain weatherboard siding; continuous brick foundation.
- 162 C White Dr. East., 418 House 1950 ca.
One-story frame Minimal Traditional style dwelling with a side gable composition shingle roof; faces west, rectangular 3x4 bay core; recessed porch at the northern bay of the façade with paired wood posts, insect screening and an aluminum canopy; off-center entrance at the facade flanked to either side by single 6/6 windows, similar windows at the side elevations; cementitious shingle siding; continuous brick foundation.
- 163 C Oktibbeha Gardens Drainage System 1937 ca.
System of concrete drainage culverts and bridges that carry water through the subdivision.

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

Oktibbeha Gardens Subdivision Historic District
Name of Property

Oktibbeha County, MS
County and State

- A. Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B. Property is associated with the lives of persons significant in our past.
- C. Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D. Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply.)

- A. Owned by a religious institution or used for religious purposes
- B. Removed from its original location
- C. A birthplace or grave
- D. A cemetery
- E. A reconstructed building, object, or structure
- F. A commemorative property
- G. Less than 50 years old or achieving significance within the past 50 years

Period of Significance (Justification)

The period of significance for the Oktibbeha Gardens Subdivision Historic District extends from 1937, the year the subdivision was platted and its earliest resources were constructed, through 1967, when its most recent contributing resource was completed.

Statement of Significance Summary Paragraph

(Provide a summary paragraph that includes level of significance, applicable criteria, justification for the period of significance, and any applicable criteria considerations.)

The Oktibbeha Gardens Subdivision Historic District is locally significant under National Register Criterion A in the area of Community Planning and Development for its role as the center of the city's first planned residential subdivision. The district is also locally significant under Criterion C for its excellent examples of early to mid-20th century residential architecture.

Narrative Statement of Significance

(Provide at least **one** paragraph for each area of significance.)

Community Planning and Development

The Oktibbeha Gardens Subdivision Historic District is eligible for listing in the National Register of Historic Places under Criterion A in the area of Community Planning and Development for its role as one of the city's first modern suburban residential subdivisions. While bordered by the city's traditional street grid, the subdivision itself utilized a pattern of curvilinear streets and uniform house setbacks that contrasted with the city's traditional building pattern. The neighborhood was developed in the years immediately preceding World War II, but the majority of its resources were constructed after the war, making it also significant for its role in responding to the city's post-war housing shortage.

Architecture

The contributing buildings in the Oktibbeha Gardens Subdivision Historic District are architecturally significant as being representative of the modest-size residential architectural styles popular in the immediate pre- and post-World War II periods. Of the houses within or adjacent to the subdivision constructed in or after 1937, several are representative of styles that became popular in the early to mid-20th century. These include Colonial Revival style houses and Tudor Revival style houses. The remaining houses are typical of styles that became popular in the immediate pre-World War II period and in the post-war years through 1967. The post-war housing consists predominantly of Minimal Traditional and Ranch style houses. The district is also representative of a typical mid-20th century suburban development plan, characterized by the use of curvilinear streets and uniform house setbacks and represents the first such subdivision plan in the city.

Narrative History

The *Official Map of the City of Starkville Miss.* dated July 2, 1935, shows the property on which the Oktibbeha Gardens subdivision would later be developed as the farm of John McKinstry White

Oktibbeha Gardens Subdivision Historic District
Name of Property

Oktibbeha County, MS
County and State

(1862-1937).¹ Several houses are shown along N. Montgomery Street, outside the boundaries of the eventual subdivision; one house is shown along Old West Point Road, and another house that still stands along Chapin Street just south of the subdivision is depicted.² The latter appears to have been White's farmhouse that he transferred to his sisters Mabel (1859-1948) and Lucy White (1865-1946) in 1914.³ John White sold the remainder of the farm, the site of the subdivision, to Mabel and Lucy on March 16, 1937, just prior to his death on July 4th of that year.⁴ J. P. Broadstreet and the Oktibbeha Development Corporation purchased the property from the White sisters between May and July 1937.⁵

The front page of *The Starkville News* of April 2, 1937 announced: "New City Subdivision Planned; Recognize District as Solution to Residential Shortage Here."

The completion of plans for a new and exclusive residential district was announced Wednesday by a group of men composed of Messrs. J. P. Broadstreet, Grady Imes, R. P. Colmer, J. B. VanLandingham, D. M. McCain and others. The new subdivision, located between N. Montgomery St. and W. Point Rd., bordered on the north by Critz Street, is seen as a solution to the cramped housing conditions. It is said that it is the last desirable exclusive site for a subdivision within the city limits.⁶

The article continues:

A thought that has long been entertained by leading Starkville and college citizens, the land represents a beautiful district such as can be only found in some of the largest cities. Winding hard surface roads will be constructed, interceded by many parks with all grounds landscaped. Restrictions will be made as to the type of houses that can be constructed, thus ensuring any person against devaluation of property by the construction of cheap houses. The property is close to the business district, only one block off of Lee street, which will soon be U.S. 82 highway. Roads will be located in such a way that outlets are convenient to all other sections of town and the college.

Oktibbeha Gardens was announced as the name of the subdivision in an article in *The Starkville News* on June 25, 1937:

Seen as the solution to the "drastic" housing situation now existing here, those in charge of the new project announce that five homes will be started as soon as construction contracts can be let. As the realization of a long dream, the area will be made as modern and convenient as present-day utilities will permit. Flowering

shrubs will be placed over the division. Roadways have been surveyed and partially completed. They will be hard surface with concrete gutters. One of the most outstanding features of the lots is the fact that they will be exclusive, yet being served with all public utilities. Lots are available at a minimal cost. Besides the five already sold, 38 more are offered. These are of different sizes and anyone can have any type of lot desired. Home owners will be protected against the devaluation of property by an amendment providing for a minimum cost of the homes to be constructed. That is, the person who builds a five thousand dollar home need not have any fear that the value of that home will be lowered by a cheaper house on the next lot.⁷

An advertisement in the same issue refers to the development as “Starkville’s most beautiful residential section” and states that many lots had been sold but that a limited number were still available at \$300: “Large lots, many with beautiful shade trees. Winding drives have been graded are to be graveled. Erection of several homes costing \$3000 and above will begin within two or three weeks. Price of lots will advance when construction work is underway. Select your lot today before the price advances. Deeds can be delivered immediately. Oktibbeha Gardens - restricted exclusively to homes and apartments cost \$3,000.00 and more. J.P. Broadstreet, Sales Agent.”⁸

In the early 20th-century, landscape architects such as the Olmstead brothers and Warren Manning developed strategies for laying out picturesque residential suburbs. They accommodated curving roadways to irregular topography and left creek beds and flood-prone areas in a natural state, often dedicating them to recreational use. Though smaller in area than the developments typically designed by these men, the original Oktibbeha Gardens plan is consistent with their design philosophies, suggesting that the designer was familiar with their work.

A plat for Oktibbeha Gardens phase 1 prepared by “D. M. McCain, Civil Engineer”, was recorded on June 21, 1937.⁹ Grady Imes and J. P. Broadstreet are listed on the deeds as the “Proprietors of the Oktibbeha Development Corporation”. A subsequent plat for phase 2 of Oktibbeha Gardens, also prepared by “D. M. McCain, Surveyor”, was recorded on December 11, 1937 with Fred M. Smith and W. W. McClanahan as owners.¹⁰

As the country was trying to lift itself out of the Great Depression, home ownership was established as a priority for the U.S. government as it responded to the economic challenges to the home-building industry with both new ideas for mortgage financing and plans for quality affordable housing, all with the desire to stimulate the economy through construction activity. The National Housing Act of 1934 was passed with these goals in mind:

Signed into law on June 27, 1934, the National Housing Act began a new chapter for American single-family housing and government involvement in the housing market. The objective of the Act was to make funds available for home repair and construction while providing jobs and improving the country’s economic conditions resulting from the Great Depression. Longer range objectives were “to reform

County and State

mortgage lending practices, to broaden opportunities for home ownership, and to raise housing standards.” It was these policies that influenced home ownership and residential development patterns well beyond the 1930s, especially during the housing boom following World War II.¹¹

Sales of home sites in Oktibbeha Gardens were spurred in 1938 by amendments to the National Housing Act that reduced mortgage rates by removing a one-half per cent mortgage insurance charge that had previously been tacked on to five percent fixed FHA mortgages. The amendments also changed the way the FHA charged for mortgage insurance premiums, by basing the premiums on the outstanding balance rather than the original face value alone. This typically resulted in a savings of approximately one percentage point. In addition, the rules reduced the required down payment from twenty percent to ten percent, making it much easier for buyers to afford the down payments.¹²

An advertisement in the March 24, 1939 issue of *The Starkville News* by the Starkville Lumber and Coal Company, J.B. VanLandingham manager, general contractors, announced that the 90% FHA loan program would expire on June 30, 1939.¹³ In a subsequent advertisement in the April 9th edition, the company stated: “Never in the history of America has it been so easy to build a home. Anyone can build one, and most people are. Why don’t you look into this business of homebuilding... a home in which you can relax in security... a place to rest for your old age.”¹⁴ VanLandingham was active in building houses in Oktibbeha Gardens and served for a time as a member of the Board of Directors of the Oktibbeha Development Corporation.

Only limited information has been found to document the earliest residents of the neighborhood, as city directories are not available for Starkville until 1961. Original deed records provide names of the early owners, and research indicates that the residents were typically businessmen, professionals, and people associated with the Agricultural and Mechanical College of the State of Mississippi (later Mississippi State College, 1932, and Mississippi State University, 1958) and its associated Agricultural Experiment Station. Jack D. and Vermelle Mullen acquired lot #32 and twenty-foot strips off the adjacent parcels for \$500 on October 9, 1939. Mullen (1898-1964) graduated from the Agricultural and Mechanical College in 1927 and worked for the U.S. Post Office. He later served as a Lieutenant Colonel in the U.S. Air Force during World War II.

The 1940 census records Charles R. Ashford, Soil Conservationist, Mississippi State College living at 208 N. Montgomery Street and Ernest H. Haddock, a teacher at the college living at 206 N. Montgomery Street. (Both houses are in this district but are outside but adjacent to the limits of the actual Oktibbeha Gardens subdivision.) No other listings have been located in these records for addresses within the subdivision.

Deeds for properties in the neighborhood carried the follow restrictive covenants:

- 1) The property above described shall be used for residential purposes only and no dwelling that this construction thereon shall cost less than \$3000.

- 2) The property above described shall at no time be conveyed by the owner to any person of any race other than the Caucasian race.
- 3) No structure shall be built closer than 40 feet from the street on which it is located and the front of such structure shall be as nearly as practicable parallel to such street.¹⁵

New housing construction came to a virtual halt during World War II. After the war, the demand for housing mushroomed, due both to rising general prosperity and the large number of veterans who had access to the benefits of the G.I. Bill. Between 1945 and 1954, more than 13 million houses were built in the U.S. In anticipation that the war would eventually come to an end and recognizing the increased demand that would result, a plat for phase 3 of Oktibbeha Gardens was recorded on June 3, 1942, listing R. J. Goodman, President, and Mrs. Robert Brannin, Secretary of the Oktibbeha Development Corporation and D. M. McCain as the Surveyor.¹⁶

A Model for Identifying and Evaluating the Historic Significance of Post-World War II Housing published by the Transport Research Board describes the changed Post-War housing circumstance:

Postwar suburban growth can be attributed to new prosperity, housing demand, government and private encouragement of home ownership, a shift in standards of living, and the readily available suburban land that was suitable for residential development. In addition, the growing automobile age and improved infrastructure, through new roads and the Interstate Highway System, contributed to suburban development further from cities' central cores by improving access to available land for development. It is this combination of social, economic, and political factors that shaped the development of the postwar residential suburbs, resulting in 60 percent of individuals owning their own single-family home by the 1960s.¹⁷

The majority of the residential resources constructed in Oktibbeha Gardens, slightly more than fifty percent, date from the post-war period that lasted from 1945 until 1954, with an additional eighteen percent built between 1955 and 1967.

Pre 1941	22.8%
1941-1944	5.9%
1945-1954	52.9%
1955-1967	18.4%

By 1947, the Oktibbeha Development Corporation was comprised of R. J. Goodman, President, Mrs. Robert Brannin, Secretary, J. B. VanLandingham, Jr., H. W. Raines, Norma W. Raines, Mrs. Henry F. Meyer, John A. Long, Henry F. Meyer, and George S. Shepherd.

County and State

John K. Bettersworth, a professor at the college, purchased a lot in February 1946 and engaged Johnson & Jones Architects (later Johnson, Jones & Reynolds) to design his house in the neighborhood which was constructed in 1946 (Resource #1). Born in 1909 in Jackson, MS, Bettersworth attended Millsaps College and graduated magna cum laude in 1929. He taught high school in Jackson for 5 years and then went on to obtain a Ph.D. in history from Duke University in 1937. He was a professor at Mississippi State College (Mississippi State University) for over 40 years. He became the Associate Dean of Liberal Arts in 1956 and Vice President for Academic Affairs in 1961. He was editor of the Mississippi Historical Commission from 1948 to 1968 and Director of the Mississippi Historical Society for over 50 years.¹⁸ Bettersworth published his textbook, *Mississippi, a History*, in 1959.

An example of the use of an FHA loan guarantee is found in the original construction, deed, and loan papers for the purchase of 410 White Drive (resource #157) by Oby Easley in late 1949 into early 1950. Mid-South Builders & Decorators, Inc. acquired the property in July 1949 with the intent of building a speculative house on the site.¹⁹ They obtained a waiver to reduce the thirty-foot setback to twenty-five feet.²⁰ Easley purchased the property subject to a \$6,000 mortgage with W. B. Leedy and Company with a term of twenty-five years at four and one-half percent. The loan was guaranteed by FHA as indicated by a title insurance policy that names both the Leedy Company and the Federal Housing Commissioner and/or assigns as beneficiaries.²¹

Starkville architect Thomas Shelton Jones (1913-2007) designed and built his own house at 402 Myrtle Street (Resource #69) in about 1949. Jones was born in Corinth, MS in 1913 and received his Masters in Architecture from Columbia University in New York in 1940. He worked in architectural firms in Memphis and Mobile before enlisting in the U.S. Army during World War II. He returned to Starkville in 1946 and joined local architect Thomas Henry Johnson, Jr. to form Johnston & Jones Architects (1946-1955, later Johnston, Jones & Reynolds, 1950-1953) and worked with that firm until he established his own firm, Thomas Shelton Jones & Associates, AIA, Architects and Engineers, in 1956.²² Thomas Henry Johnson, Jr. (1906-1979) was also born in Corinth and received a civil engineering degree from Mississippi State University in 1926 and a degree in architecture from the University of Pennsylvania in 1931.

A limited amount of additional construction and rebuilding has occurred in the neighborhood since 1967.

Architecture

Architecturally, Oktibbeha Gardens is typified by modest size houses that are typically frame and one story in height and that represent the styles popular in the immediate pre- and post-World-War II periods. For descriptive purposes, this study has utilized guidance contained within the following publications: Virginia and Lee McAlester's *Field Guide to American Houses* (New York: Alfred A. Knopf, 1986), Georgia State University's *Atlanta Housing 1944-1965* (Atlanta, GA: Georgia State University, 2001), Mead and Hunt, Inc.'s *A Model for Identifying and Evaluating the*

Oktibbeha County, MS
County and State

Historic Significance of Post-World War II Housing (Washington, DC: Transportation Research Board, 2012) and *The Ranch House in Georgia: Guidelines for Evaluation* prepared for the Georgia Transmission Corporation by New South Associates in 2010.

The nominated district includes 46 resources that are outside the boundaries of the Oktibbeha Gardens subdivision. Nine of these resources pre-date the subdivision and include one pyramidal-form house (Resource #53), one house thought to date from circa 1907 that appears to have been remodeled in the Colonial Revival style circa 1945 (Resource #55), one in the Classic Re-Revival style (Resource #15, ca. 1910),²³ three that are representative of the Craftsman style (Resources #41, #37, and #69), and three that are representative of the Tudor Revival style (Resources #39, #44, and #48).

Of the houses within or adjacent to the subdivision constructed after 1937, several are representative of styles that became popular in the early to mid-20th century. These include Colonial Revival-style houses (Resources #1, #17, #26, #45, #47, #56, and #92) and the Tudor Revival-style houses (Resources #3, #43, #and #50).

The remaining houses are typical of styles that became popular in the immediate pre-World War II period and in the post-war years through 1970. For descriptive purposes, this survey identified and classified resources in this period using the following styles.

In *A Field Guide to American Houses*, Virginia and Lee McAlester define Minimal Traditional as follows:

With the economic Depression of the 1930s came to this compromise style which reflects the form of traditional Eclectic houses, but lacks their decorative detailing. Roof pictures are low or intermediate, rather than steep as in the preceding Tudor style. Eaves and rake are close, rather than overhanging as in the succeeding Ranch style. Usually, but not always, there is a large chimney and at least one front-facing gable, both echoing Tudor features. In fact, many examples suggest Tudor cottages with the roofline lowered and detailing removed.²⁴

The earliest and plainest of these (contributing Resources #24, #25, #27, #32, #73, #95, #97, #99, #101, #102, #116, #117, #120, #127, #128, #130, and #132) typically have small footprints, are one story in height, and typically lack historical details. Slightly larger and more complex houses that sometimes feature stylized historical details include: contributing Resources #2, #6, #8, #10, #12, #16, #19, #20, #21, #22, #29, #36, #38, #42, #51, #52, #59, #60, #61, #62, #64, #65, #66, #70, #74, #76, #77, #85, #89, #90, #93, #94, #104, #106-111, #113-#115, #119, #122, #124, #134, #135, #142, #146, #153-162. As defined in this survey, Cape Cod houses (Resources #75, #91, #120, #129, and #144) are similar to Minimal Traditional houses but are typically differentiated by their symmetry, typical central entrance, and use of Colonial Revival details.

A Field Guide to American Houses defines Ranch as follows:

²³ The Classic Re-Revival style was described in John Linley's *Architecture of Middle Georgia: The Oconee Area* (Athens, GA: University of Georgia Press, 1972). The style is something of a catch-all for classically inspired post-Civil War buildings that do not fit into other architectural style categories or that may be more vernacular in character.

²⁴ Virginia and Lee McAlester, *A Field Guide to American Houses* (New York, Alfred A. Knopf, 1986), p. 478.

Oktibbeha Gardens Subdivision Historic District
Name of Property

Oktibbeha County, MS
County and State

This style was originated in the mid-1930s by several creative California architects. It gained popularity during the 1940s to become the dominant style throughout the country during the decades of the '50s and '60s...The style is loosely based on early Spanish Colonial precedents of the American southwest, modified by influences borrowed from Craftsman and Prairie modernism of the early 20th century. Asymmetrical one-story shapes with low-pitched roofs dominate. Three common roof forms are used: the hipped version is probably the most common, followed by the cross-gabled, and, finally, side-gabled examples. There is usually a moderate or wide overhang. This may be either boxed or open, with the rafters exposed as in Craftsman houses. Both wooden and brick wall cladding are used, sometimes in combination. Builders frequently add modest bits of traditional detailing, usually loosely based on Spanish or English Colonial precedents. Decorative iron or wooden porch supports and decorative shutters are the most common. Ribbon windows are frequent as are large picture windows in living areas. Partially enclosed courtyards or patios, borrowed from Spanish houses, are a common feature. These private outdoor living areas to the rear of the house are a direct contrast to the large front and side porches of most late 19th- and early 20th-century styles.²⁵

Ranch style houses in the survey include: contributing Resources #4, #7, #9, #14, #28, #30, #31, #40, #58, #62, #72, #78, #79, #84, #88, #96, #98, #100, #105, #121, #123, #125, #131, #133, #138, #140, #143, #145, #147, #149, #150, and #151.

During the 1950s and 1960s, some architects began to abandon historical precedents and the resulting houses are referred to as Contemporary (contributing Resources #82, #83, #113, and #149). A substyle of this style, Contemporary Gable Front, is represented by contributing Resources #112 and #148.

Context

In addition to the commercial Downtown Starkville Historic District (NR, 2012), there are three other residential districts in the City of Starkville. According to its nomination, the Greensboro Street Historic District (NR, 1982, expanded, 2008) "possesses fine examples of vernacular architecture dating from the 1860s to the 1920s and preserves the scale and ambience of its historical appearance better than any similar street in Starkville." The Overstreet School Historic District (NR, 1992) nomination describes its significance as "an important physical expression of the growth and development of Starkville during the period 1870 to 1940, when Starkville changed from a small courthouse village with an agricultural economy to one of Mississippi's major educational and industrial centers." Of these districts, the Nash Street Historic District (NR, 1993) is the only other district that is representative of the city's 20th century suburban development. However, the period of the significance for the district ends at 1940 and its architectural character is more related to pre-World War II than postwar development. Oktibbeha Gardens reflects the transition from one to the other.

Integrity

²⁵Ibid. p. 479.

Oktibbeha Gardens Subdivision Historic District
Name of Property

Oktibbeha County, MS
County and State

The Oktibbeha Gardens Historic District retains integrity of location, design, setting, materials, workmanship, feeling, and association. The resources within the district typically remain in their original location. The basic designs of the resources within the district are largely unaltered from the district's period of significance and 85% of the resources in the inventory are classified as contributing. Only 8 resources (5% of the total) that were constructed prior to 1967 have been altered to the degree where they no longer retain integrity and have been classified as noncontributing. Only 17 additional resources (10% of the total) were constructed after 1967. The district's setting is largely unchanged from 1966. Resources within the district typically retain their historic materials and workmanship. Given the overall retention of its historic appearance and character, the district also retains integrity of feeling and association.

Verbal Boundary Description (Describe the boundaries of the property.)

The boundary of the Oktibbeha Gardens Historic District is shown on the accompanying map, entitled "Oktibbeha Gardens Historic District." The scale is 1" equals 200'.

Boundary Justification (Explain why the boundaries were selected.)

The nominated property contains properties that are historically associated with Oktibbeha Gardens Subdivision. In addition, boundaries include adjacent properties that face the perimeters of the district and help define the perimeter streetscapes and the overall setting of the district. The boundary of the nominated property follows historic boundaries as determined by the re-survey of the district.

11. Form Prepared By

name/title: David B. Schneider
organization: Schneider Historic Preservation, LLC
street & number: 411 E. 6th Street
city or town: Anniston state: AL zip code: 36207
e-mail: dbschneider@bellsouth.net
telephone: 256-310-6320
date: April 3, 2017 ; revised April 28, 2017

Additional Documentation

Submit the following items with the completed form:

- **Maps:** A **USGS map** or equivalent (7.5 or 15 minute series) indicating the property's location.
- **Sketch map** for historic districts and properties having large acreage or numerous resources. Key all photographs to this map.
- **Additional items:** (Check with the SHPO, TPO, or FPO for any additional items.)

Photographs

Submit clear and descriptive photographs. The size of each image must be 1600x1200 pixels (minimum), 3000x2000 preferred, at 300 ppi (pixels per inch) or larger. Key all photographs to the sketch map. Each photograph must be numbered and that number must correspond to the photograph number on the photo log. For simplicity, the name of the photographer, photo date, etc. may be listed once on the photograph log and doesn't need to be labeled on every photograph.

Mr. Paul Loether
Program Director, National Register of Historic Places
National Park Service
Mail Stop 7228
1849 C St, NW
Washington, D.C. 20240

Dear Mr. Loether:

We are pleased to enclose the nomination form and supporting documents to nominate the following properties to the National Register of Historic Places:

Oktibbeha Gardens Historic District, Starkville, Oktibbeha County

The property was approved for nomination by the Mississippi National Register Review Board at its meeting on July 20, 2017.

We trust you will find the enclosed materials in order and will let us hear from you at your convenience.

Sincerely,

Katie Blount
State Historic Preservation Officer
