DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

Farm Content is situated on the south side of Old New Winsor Road, one half mile west of Maryland Route 31, three miles south of Westminster, Maryland.

The house is of brick construction, five bays wide at the principal facade and two stories high beneath a qable roof. On three sides of the house, east, west and north, the brick walls are laid in Flemish bond, while the south end is laid in common bond. On all elevations the mortar joints are penciled in white. The centered entrance on the principal facade was enlarged in about the mid nineteenth century and the opening now frames a panelled double door and transom. Each of the two windows flanking both sides of the door are of six over six pane sash. Across the second floor level and positioned directly over those openings below are five windows, also of six over six lights each. All of the windows have flat arches of splayed stretcher bricks and louvered blinds. In the late nineteenth or early twentieth century the existing one story farm porch with six square tapered columns was built against this elevation. On both the front and rear sides are stepped brick eave cornices with one course of brick laid on the diagonal in sawtooth fashion.

On both ends of the house the gable walls rise above the roof line to form low parapets. Single flush gable chimneys stand at each end of the roof ridge and on the outside wall of the north chimney there is a marble date plaque which reads "D R S 1795."

On the rear elevation of the house, toward the south end, stands a two story brick wing with a recessed porch on its north side. This addition, which has a later shed roofed addition on its south side, incorporates into its plan a formerly detached one story kitchen contemporary to the main block in its date of construction.

In the main block the first floor room configuration consists of a centered stair hall flanked by single parlors. This same room arrangement is repeated on the second floor except that there is a small room at the head of the stair where a modern bathroom is located. The stair, simple in design, rises in four flights to the attic and is characteristically Federal in both styling and detail. The south first floor room has an attractive fireplace mantle with a molded cornice shelf above a frieze decorated with applied moldings in a geometric pattern. On the right side of the mantle is a full height cupboard with doors of fielded panels. Also decorating the room is a molded chairrail and two-piece surrounds framing the doors and windows. This same treatment is repeated in the north room, except that the mantle is of a heavier styling and probably dates from about the mid nineteenth century. On the second floor level the treatment is somewhat more restrained, with simple

STATEMENT OF SIGNIFICANCE

In 1760 David Shriver, an ancestor of the prominent Shriver family of Carroll County, acquired the property now known as Farm Content. Shortly after the acquisition of the property David married Rebecca Ferree of a socially prominent Lancaster, Pennsylvania family. They lived in a small log house adjacent to the site where, in 1795 they were to build the existing brick house. Davið Shriver began the operation of a grist mill and tannery, among other occupations, and soon became a large landowner and socially prominent figure. In 1776 David Shriver was appointed to represent Frederick County at the Maryland Constitutional Convention. An active partiot, he was of sufficient consequence to be elected a member of the Convention that formally adopted and established the Maryland In 1776 he was elected a member of the Maryland Constitution. House of Delegates and twenty-eight years later was appointed to the Maryland Senate. David Shriver died in 1826 at the age of eighty and lies buried in the family cemetery at Farm Content.

Following the death of David Shriver, Jacob, his youngest son, assumed ownership of the property. Jacob served for three years (1825-28) as a member of the Maryland House of Delegates, like his father representing Frederick County. (Later boundary changes placed the Shriver property in Carroll County rather than Frederick.) It was Jacob who named the property Farm Content.

At Jacob Shriver's death in 1841, the property came into the possession of Jacob's son Augustus. Augustus Shriver, to whom the alterations of the house, including the addition of the rear wing, is attributed was an active and successful businessman. He was one of the first Presidents of the Western Maryland Railroad and was a President of the First National Bank of Westminster and the Carroll County Agriculture Society.

In 1903 Farm Content left the hands of the Shriver family, but in 1969 it returned to family ownership when it was acquired by the present owners.

Farm Content is one of the finest examples of rural Federal architecture in Carroll County, and as the home of

7. DESCRIPTION, continued

mantels framing the fireplaces and surrounds similar but narrow than those of the first floor, framing the doors and windows.

The front first floor room of the wing was modernized in recent years to house a modern kitchen. The remainder of the wing, including the original kitchen, was renovated for use as a private apartment and was not accessible at the time that the house was recorded.

Farm Content has several domestic dependencies arranged close to the rear of the house (see site plan). One of these is a stone chimneyed log structure sheathed with vertical boards. Another building is a frame, pyramid roofed privy (see attached drawing). This small structure is of an undetermined but early date of construction. It is entirely possible that it is contemporary to the house and if so is one of the few eighteenth century privys extant in Maryland. Near the north end of the house is the site of a log dwelling house that preceeded the present brick house. It was torn down some years ago but the site continued to yield related artifacts.

In a field northeast of the house is the Shriver family cemetery containing, among others, the grave of David Shriver, builder of Farm Content.

8. SIGNIFICANCE, continued

David Shriver, proginator of the Shirver family in Maryland, it is recognized as a local historic landmark. Despite minor alterations and the addition of a large rear wing the house retains a sufficient enough amount of original detail to establish it as a regionally significant example of its particular form. Of the dependencies the privy is the most noteworthy. Since privys were usually the least adaptable they have nearly completely disappeared and their presence among surviving collections of domestic dependencies is becoming increasingly rare.
