1905

The first part of the report is devoted to a general survey of the
 progress of the work during the year. It is followed by a detailed
 account of the various experiments conducted, and the results
 obtained. The second part of the report is devoted to a
 discussion of the various theories advanced to explain the
 phenomena observed, and a comparison of the results obtained
 with those predicted by these theories. The third part of the
 report is devoted to a summary of the work done during the
 year, and a statement of the conclusions reached.
