	(Check One)			(Check One)		
	<input type="checkbox"/> Altered	<input checked="" type="checkbox"/> Unaltered		<input type="checkbox"/> Moved	<input checked="" type="checkbox"/> Original Site	

DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The Spanish Bridge over Taelayag Creek south of Agat is an example of Spanish stone and mortar bridge construction of the nineteenth century. The bridge consists of one arch eight feet, ten inches wide spanning the stream with the arch rising five feet, five inches above the stream surface. The road surface of the bridge is twenty-seven feet long and nine feet, five inches wide with the road surface located six feet, eight inches above the water level.

To the north of the bridge structure is an embankment for the approach road to the north end of the bridge. On the western edge of this embankment is a low cut stone wall extending twenty-nine feet north of the bridge.

The bridge is in excellent condition with no stones of the arch or walls missing. The road surface is now sodded over with a few stones missing along the edges of the road surface of the bridge.

STATEMENT OF SIGNIFICANCE

At one time a coastal road connecting Agana and Umatac traversed the Agat area. This road was originally constructed in 1785 under the administration of Governor Cerain utilizing wooden bridges. By the administration of Governor Felipe de la Corte Calderan (1855-1866) the road had deteriorated and the Governor subsequently declared it should be rebuilt utilizing stone bridge instead of wood bridges. One of these stone bridges was constructed over the Telayag Creek between 1866 and the American takeover of Guam in 1898. By 1917, certain segments of the original road was still being used. However, the Spanish bridges had fallen into disuse by this time.
