4. IDENTIFICATION		

The picture is the view of the house as it stands on the east side of the street, North Cascade. It shows the west and south facades as seen from a position which is approximately a 45 degree angle to the south from a direct frontal and western view. The view admirably captures the most outstanding of the architectural features which distinguish the House, i.e.: the bay window, the gothic window, the hooded window, the quoins, the roof shape and trim, the porch design.
