Brown's Hole, long the famed hide-out for Butch Cassidy and other outlaws of similar status, first set up a school for its children in 1910. The land for the building was donated by a Mrs. Harry Hoy. The building itself was constructed by Carpenters Evers, Hunt and Noover and was 50 feet Class sessions were held continuously from 1911 by 30 feet. to 1947. In 1954 the building ceme under the maintenance and control of the Brown's Park Women's Club for use as a community center. In 1970 it was acquired by the Fish and Wildlife Resources Development Services, but it still receives heavy use as a community center.

Although the building was built and used to serve the purpose of educating the surrounding ranch children, it quickly became the rcognized center of the community in and around Brown's Park for such events as dances, school plays, funerals, community parties for every sort of mejor occasion in the area. Notices appear continuously in the EMPIRE COURIER from 1911 to 1947 concerning the need for parents to send their children to the school, for community dances, for fund raising events relative to the World War I patriotic leagues. There are references to children whose parents have moment into town in order to send their children to school, other references as to where parents might beard their children during the The first teacher was Miss Winford Denny who was hired term. on a monthey salary of \$65.00. By 1947 wages had climbed to \$150.00 per month.

The school hall is significant in its cultural service to citizens of Colorado, Wyoming, and Utah. It is the only such center for the people of this isolated area to gather and outside of its discontinued use as a school it functions in the same ways as it did when first constructed. Concerned citizens in all three states have contributed information by phone and by letter to further its landmarking and notice by the National Register. It is a fine example of the social life of isolated ranch people both in earlier times and now. It shows how the ties of social interdependence exceed the political boundaries and physical boundaries which would otherwise separate groups of people from their neighbors.
