DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The United States Customs House (now the Trayser Museum) in Barnstable is located on Cobbs Hill at the eastern end of the village, facing north on Main Street (Route 6A). Across the street is the Unitarian Church, and beyond that, Barnstable Harbor. There are no other buildings immediately adjacent to the Customs House except for the Old Jail (on the National Register) which was moved to its present location beside the Customs House in 1973. The building is located on one third of an acre with decorative iron fencing marking the back boundary. A small hip roofed carriage house with two large double doors is situated behind the Customs House.

The Customs House, a 2 story hip roofed red brick building, rests on a high granite foundation. A string course topped by a dentiled molding marks the division between the first and second floor, and the cornice repeats this decorative detail with two rows of dentils and a string course below. The fenestration is regular and all the windows are identical, with 2/2/2 sash. The top lights in all the windows fit into a semi-circular opening which is in turn topped by a cast iron hood molding. There is a central doorway topped by a semi-circular arch identical to the window arches on either side of the door, in the facade and rear elevation. A cast iron balcony supported by elaborate brackets extends across the three second floor windows in the shallow pavilion of the facade. A flight of granite steps leads up to the facade entrance.

The original low pitched hip roof was of corrugated iron, and supported a balustrade between the five brick chimneys which served the interior fireplaces. When the steam heating system was installed four of the chimneys and the balustrade were removed. A new higher slate hipped roof was installed over the old roof, and the flag pole which was placed on the new roof is now used as a landmark by the United States Geological Survey. The slate on the new roof was replaced by asphalt in 1971 because of the high cost of maintenance.

The interior contains most of the original cast iron structural and decorative features. Five square cast iron columns with Corinthian capitals support the second floor, and a broad cast iron staircase with an ornate banister rises along the west wall. Other interior features include Doric and Tuscan pilasters, plain plaster walls, and maple floors. Most of the wood paneled partitions from the building's Post Office days were taken out when the building was converted in 1960 into the Donald G. Trayser Museum.

SPECIFIC DATES 1855-56 BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The Barnstable Customs House is significant not only for its architectural merit but also for its role in the shipping industry on Cape Cod in the nineteenth century.

The architect of the building cannot definitively be named. Local sources claim that Alfred B. Mullett designed the building. However, this seems unlikely because Mullett was not connected with the Treasury Department when the Customs House was built in 1855. Ammi B. Young, Supervising Architect of the U.S. Treasury during the 1850's was most likely the architect because he was involved with the design of most of the customs houses and post offices built during that decade. The large number of these buildings, reflecting the tremendous economic growth of the United States in the mid-nineteenth century attest to Young's proficiency in his field. Many of these Federal buildings were designed in the rather heavy Italian style exhibited by the Barnstable Customs House. The Customs House, the first "fireproof" building on Cape Cod, and its style, massing, and materials were in marked contrast to the typical wood frame buildings which had traditionally been constructed in the area.

The Seventh Customs District was established by an act of Congress in 1789, and encompassed all of Barnstable County except Falmouth. The district ranked fourth among the Massachusetts Customs Districts, following Boston, Salem, and New Bedford. By 1850, 91,102 tons of shipping had been reported and the need for a customs house was obvious. Prior to the construction of the Barnstable Customs House each Collector had been required to use his own place of business to collect the taxes. After the Civil War however, the shipping receipts in the Seventh Customs District gradually decreased until the District was made part of the Boston District in 1913. The building continued to be used by the Post Office until 1958, and the Cape Cod Extension Service used the second floor from 1924 until 1957. In 1960 the building was turned over to the Donald G. Trayser Memorial Museum and now contains exhibits relating to the maritime history of Barnstable, as well as artifacts from the eighteenth and nineteenth centuries.

Grant wasn't president in 1855-56. In fact he didn't become president until 1869, so Alfred Mullett had not been appointed by Grant in 1855. I wonder do they have their dates straight or was this just a mistake. Has architectural significance and commercial significance.

Mr. Charles Herrington, Chief
Registration
National Register of Historic Places
National Park Service
U.S. Department of the Interior
Washington, D.C. 20240

Dear Charles:

Enclosed please find two National Register nominations for the following properties:

1. Plainville, North Attleboro, Angle Tree Stone
2. Franklin, Red Brick School

Also enclosed is the re-submission of nomination for the U.S. Customs House in Barnstable.

These properties have been voted eligible for submission by the Massachusetts Historical Commission (the State Review Board) and have been signed by the State Historic Preservation Officer, Elizabeth R. Amadon.

Sincerely yours,

Patricia L. Weslowski
Survey Director
Massachusetts Historical Commission
